

Philipp Hilbert. *Product Manager, higher-education technology.*

Positioning, 13 years shipping roadmaps in regulated B2B SaaS, bringing rigorous discovery, data-driven decisions, and AI-native execution to Modern Campus.

§ WHY MODERN CAMPUS

Modern Campus sits at a genuinely interesting inflection point: higher education is under enrollment and retention pressure, and the institutions that survive will be the ones that digitise the non-traditional student journey end-to-end. The role calls for someone who can hold the product backlog, read the analytics, and translate messy operational workflows into shippable increments, a pattern I have run repeatedly across defence AI platforms, national labour-market data systems, and insurance SaaS. The explicit focus on AI and automation evaluation is where I spend much of my discretionary time right now. *That combination of domain complexity and emerging-technology ambiguity is exactly the environment where my strengths compound.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and edge-case generation
- **GitHub Copilot**, assisted implementation and review
- **Cursor**, IDE-native refactoring loops
- **Lovable**, rapid front-end prototyping
- **GPT**, research synthesis and stakeholder drafts
- **Gamma.app**, roadmap and discovery decks
- **n8n**, agentic workflow automation
- **Framer**, interactive concept prototypes

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

PostgreSQL, MongoDB, REST APIs, Python, Kotlin (Spring Boot), Dagster, dbt, Kafka, Kubernetes, Docker, ArgoCD, Jenkins, GitLab, Azure DevOps, Jira, Confluence, Figma, Miro, Matomo, MicroStrategy.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, anonymity-until-payment, run by one person with LLM agents.

- Zero-to-one build: anonymity-until-payment model that protects both sides until commitment is confirmed.
 - WhatsApp and Telegram as the primary product surface, meeting users where they already work.
 - LLM agents handle intake, qualification, and matching across the funnel, replacing headhunter overhead.
 - Funnel and conversion analysis in SQL; validates product metrics work from the first week of a new role.
-

§ HOW I WOULD WORK AT MODERN CAMPUS

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow customer success calls and support queues to map where institutions actually get stuck in the Modern Campus workflows, then cross-reference with existing analytics to separate loud opinions from real friction.

WEEK 2

Slice and prioritise.

Take the gap inventory into the backlog, apply a value-versus-feasibility lens with engineering and UX, and produce a first draft of the near-term roadmap for stakeholder alignment.

Ship, measure, iterate.

Drive the first increment to production, instrument it with the agreed KPIs, and run a lightweight retrospective to close the learning loop before the next sprint begins.

I COVER LETTER

Dear Hiring Team at Modern Campus,

Higher education is facing the same structural shift that retail and insurance faced a decade ago: the customer, today's non-traditional, stop-out, working-adult student, expects a digital experience that matches what they get everywhere else, and institutions that cannot deliver it will lose enrollment to ones that can. Modern Campus is building the operating layer that makes that shift possible. That is a meaningful problem, and a hard one.

I bring 13 years of product ownership in regulated B2B SaaS to this role. At Rohde & Schwarz I managed a cross-functional team of 15+ engineers and data scientists through Scrum, delivering an internal AI and Data platform for the FCAS European programme. I used instrumented workflow analysis to redirect the product strategy, the competing UI-led approach recorded exactly zero production clicks, and the developer-code-first pivot drove a 200% increase in pipeline runs. At the Bundesagentur für Arbeit I owned a national labour-market analytics platform, integrated Dagster and dbt to eliminate manual intervention on quarterly data updates, and cut per-update effort by nearly 75%. Both roles required translating complex operational workflows into a prioritised roadmap, agreeing KPIs upfront, and then checking whether the outcomes actually happened.

I evaluate AI and automation opportunities as part of standard discovery rather than as a separate initiative. My current side project, a two-sided construction-staffing marketplace, runs on LLM agents across the intake, qualification, and matching funnel, with one person operating the day-to-day. I have used Claude Code, GitHub Copilot, Cursor, and Lovable in production prototyping contexts, which means I can speak with engineering precisely about what AI-enabled product features are and are not ready to ship.

The higher education technology preference in the requirements is something I am acquiring rather than bringing. What I do bring is a pattern that transfers directly: regulated, multi-stakeholder SaaS where the end user (a student, a clinician, a labour-market researcher) is never the economic buyer, and where product decisions have to satisfy compliance, institutional IT, and executive sponsors simultaneously. At CLINET Platforms I cut a backlog to the top 10% of features against agreed success measures and saw user acceptance rise more than fivefold. At EMIL Group I restructured an 18-person delivery organisation into three lean teams after near-

total senior-engineer attrition and shipped Claims Center from concept to production with no prior template. The mechanics transfer.

I am available at four weeks' notice and happy to discuss the role at your convenience.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Manager and Product Owner with 13 years of product ownership in regulated B2B SaaS across defence AI, public-sector analytics, insurance, healthcare, and payments. I run continuous discovery, translate strategy and user needs into a prioritised roadmap, and lead cross-functional Agile teams from backlog to production. I define KPIs before building and measure outcomes after shipping; I evaluate AI and automation opportunities as a standard part of discovery rather than a separate workstream.

§ WHAT I CAN DO

Product Ownership: requirements engineering, user stories, acceptance criteria, epics, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support

Analytics and Data: KPI definition, funnel and churn analysis, Matomo, MicroStrategy, ETL, Dagster, dbt, PostgreSQL

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe, ART, PI planning, CI/CD, GitOps

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, change management

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI, DATA PLATFORM 2024-2025

Cross-functional team of 15+ through Scrum; GitOps rollout with ArgoCD cut deployment from days to 30 minutes; workflow instrumentation redirected strategy, driving a 200% increase in pipeline runs on the internal AI and Data platform for FCAS.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR SAAS 2023-2024

Owned national labour-market analytics platform; introduced Dagster and dbt, cutting per-update effort by 75%; migrated bare-metal to containers; Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE 2023

Cut backlog to top 10% of features; user acceptance rose fivefold; CGM integration reduced digital anamnesis time from 30 minutes to 5 minutes.

EMIL GROUP · PRODUCT MANAGER · INSURANCE SAAS 2022

Restructured 18-person delivery org into three lean teams; attrition fell from near-total to one departure; shipped Claims Center concept to production; cut new-product launch from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL AND PAYMENTS 2021-2022

Moved research results into production in a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT 2021

Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE SAAS 2019-2020

Migrated legacy procurement webshop to Shopware for three AOK insurers and ~20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY 2019

Full site IT modernisation end to end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION
STAFFING SAAS 2025-2026

Zero-to-one two-sided B2B marketplace; LLM agents across intake and matching funnel; funnel and conversion analysis in SQL.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY 2016-2021

Quantum-secure encryption hardware and software; three-layer product installs in under two minutes; later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · AGTECH
2018-2021

Laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH 2013-2018

Mobile P2P payments built from zero to acquisition; acquired and operated by Sparkasse inside the girocard ecosystem.
