

Philipp Hilbert. *Product Manager driving activation and growth in B2B SaaS.*

Positioning, 13 years shipping product in regulated B2B SaaS, with a track record of turning onboarding flows and self-serve systems into measurable growth levers.

§ WHY SUMSUB

Sumsub sits at the intersection of compliance infrastructure and developer experience, a rare combination where onboarding quality directly determines whether clients reach production or churn at setup. The posting names activation speed and feature adoption as the core metrics, which is exactly the problem space I have lived in at EMIL Group and CLINET. The work on end-to-end activation flows, contextual hints, and a self-serve communication layer for 4,000+ clients across financial services, crypto, and iGaming is a scope I find genuinely interesting. *The stakes are high enough that a well-designed funnel is not a nice-to-have, it is the product.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, day-to-day coding support
- **Lovable**, rapid front-end prototyping
- **Cursor**, context-aware editing in VSCode
- **GPT**, research, summarisation, edge-case drafts
- **Gamma.app**, stakeholder decks
- **Framer**, design-heavy prototypes
- **n8n**, agentic workflow automation

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, REST APIs, Kafka, Docker, Kubernetes, ArgoCD, Jenkins, GitLab, Azure DevOps, Dagster, dbt, Jira, Confluence, Figma, Miro, Matomo, SQL.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built to zero in on conversion.

- Anonymity-until-payment model that protects both sides until commitment is confirmed.
 - WhatsApp and Telegram as the product surface, keeping acquisition costs near zero.
 - LLM agents across the funnel so one person runs the day-to-day operations.
 - Funnel and conversion analysis in SQL, directly transferable to activation-funnel work at Sumsu.
-

§ HOW I WOULD WORK AT SUMSUB

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow three to five client onboarding sessions in the dashboard, map the current activation funnel step by step, and identify where clients stall before reaching production deployment.

WEEK 2

Instrument and hypothesise.

Set up funnel tracking for the key drop-off points, write the first two or three A/B test hypotheses with clear success criteria, and align them with Marketing and Design before any build starts.

WEEK 3+

Ship, measure, close.

Run the first activation experiment end-to-end, from brief to production, and report results against the agreed activation speed and feature adoption metrics.

I COVER LETTER

Dear Sumsb team,

Sumsb's posting describes a specific problem: clients log in, get lost, and do not reach full production deployment without engineering hand-holding. I have solved a version of this twice. At CLINET Platforms I cut a bloated roadmap to the top 10% of features and watched user acceptance rise more than fivefold. At EMIL Group I shipped the Claims Center from concept to production in an organisation that had lost client trust, while restructuring the delivery team so it could sustain the pace.

The work you are describing, activation flows, product tours, a self-serve communication system, A/B tests on onboarding funnels, is product craft I have applied in B2B SaaS contexts, including insurance and healthcare platforms where the client is also a professional user managing a complex workflow. I know what it takes to get a non-technical buyer from first login to "this is working in our process." The answer is almost never more features; it is a shorter path to the first meaningful outcome.

I also bring relevant context from the crypto and fintech side. I co-founded Kvitt Payment Solutions, which was acquired and operated inside the Sparkasse girocard ecosystem. I have 8 years of hands-on crypto experience across CEX and DEX venues, and I spent time at Polygon working with L2 infrastructure. Sumsb's client list includes Bybit, Bitpanda, and Wirex, so I am not learning that world from scratch.

On the AI-native side: I prototype with Claude Code, Lovable, and Framer, and I build agentic workflows with n8n. When I investigated two competing workflow designs at Rohde & Schwarz, I could instrument and interpret the data myself rather than waiting for an analyst. That speed matters on a team building self-serve tooling.

I would welcome a conversation about the activation funnel challenges you are trying to solve. I am available at short notice.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in B2B SaaS, regulated industries, and crypto-adjacent platforms. I have shipped activation flows, self-serve tooling, and funnel experiments in insurance, healthcare, and fintech contexts. I run continuous discovery, turn user needs and technical constraints into a prioritised roadmap, and lead cross-functional teams through Scrum and Kanban delivery.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design, instrumented two competing workflows and the UI-led one recorded zero clicks.
- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes across multinational teams and making the platform hotfix-capable.
- Led a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023 - 07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt, saving almost 75% of the time per data update on quarterly imports and new indicators.
- Integrated test automation into the Jenkins pipeline, freeing several QA hours every week.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis dropped from 30 minutes to 5 from form to database.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent.
- Cut time-to-market for a new insurance product launch from months to less than a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

- Retail and payments, POS and forecourt systems. Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 - 06/2021

- Government, secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

- Health insurance, B2B SaaS procurement webshop. Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - PRESENT

- Construction staffing, two-sided B2B marketplace. Anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel so one person runs day-to-day. Funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

- IT security, quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes to meet enterprise buyers' constraints. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

- Fintech, mobile group-based P2P payments. Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

Product Management: continuous discovery, product vision and roadmap, A/B testing, funnel and churn analysis, user research and interviews, activation and adoption metrics, MVP definition, prototyping, go-to-market support, product lifecycle management.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, story-point estimation, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Agile and Scaled Delivery: Scrum, Kanban, SAFe (Scaled Agile Framework), ART (agile release train), PI planning.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); prototyping with Claude Code, GitHub Copilot, Cursor, and Lovable.

Analytics and Data: KPI definition, Matomo, MicroStrategy, ETL, Dagster, dbt, PostgreSQL, SQL, funnel analysis.

Technical Environments Owned: Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
-
