

Philipp Hilbert. *Product Manager building operator tools for autonomous operations.*

Positioning, 13 years shipping complex operational software, from defence AI platforms to clinical workflows, now focused on the orchestration layer that makes autonomous fleets manageable at scale.

§ WHY CARGOX

CoreConnect sits at a genuinely hard intersection: real-time robot telemetry, operator workflows under time pressure, and a user base that cannot afford confusion. That is exactly the kind of product that breaks if you get the abstraction layer wrong, and I have spent 13 years getting that layer right in equally unforgiving contexts, defence AI, public-sector data platforms, clinical mobile apps. The logistics specialisation I did at TU Berlin and the supply chain exposure across my career mean I can hold a conversation with field ops as readily as with the engineering team. *That combination is what a product like CoreConnect needs to move fast without breaking the people who depend on it.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, coding and review workflows
- **Cursor**, editor-level AI pair programming
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy prototypes
- **GPT**, research, drafting, edge-case generation

- **n8n**, agentic workflow automation
 - **Gamma.app**, stakeholder decks and presentations
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, Dagster, dbt, PostgreSQL, MongoDB, Kafka, REST APIs, Python, Kotlin (Spring Boot), Jira, Confluence, Figma, Miro, Matomo, MicroStrategy.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B staffing marketplace, built zero to one, solo.

- Matches construction firms with workers; removes the headhunter from the hire with an anonymity-until-payment model.
 - WhatsApp and Telegram as the product surface, keeping friction near zero for a non-desk workforce.
 - LLM agents across the funnel so one person runs day-to-day operations.
 - Demonstrates autonomous fleet-style orchestration thinking: one operator, multiple concurrent workflows, agent-managed handoffs.
-

§ HOW I WOULD WORK AT CARGOX

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow field operators on real missions, read every mission log and telemetry dashboard I can access, and map the CoreConnect workflows end to end to find where operators lose trust or lose time.

WEEK 2

Slice and validate.

Take the top two or three pain points from week one, write crisp opportunity statements with sizing logic from the telemetry data, and validate the prioritisation with engineering and field ops before touching the roadmap.

WEEK 3+

Ship, measure, close.

Pick the highest-confidence slice, define the instrumentation upfront, ship it, and confirm whether the metric moved, then feed that back into the next prioritisation cycle.

I COVER LETTER

Dear CargoX team,

I am applying for the Product Manager (CoreConnect) role. The job description describes a product that has to work in high-stakes, real-time environments where operators cannot afford a confusing interface or a missed alert. That is the category of software I have spent most of my career on.

At Rohde & Schwarz I owned the AI and data platform for the FCAS European defence programme. I ran a cross-functional team of 15+ engineers and data scientists, instrumented two competing workflows to find out which one operators actually used, and redirected the roadmap when the data showed the UI-led approach was getting zero engagement. That discipline, agree the metric first, instrument from day one, let the data make the call, is how I approach every product decision. It is exactly what the CoreConnect posting asks for when it says "dig into fleet telemetry, mission logs, and operational event data to diagnose root causes."

At the Bundesagentur für Arbeit I owned a national labour-market data platform and served as Deputy IT Security Officer. I migrated a bare-metal system into containers, introduced Dagster and dbt to eliminate manual data-update steps, and carried a full UI relaunch through the same period. The combination of infrastructure fluency and operator-facing product thinking is something I bring to every role, and it is directly applicable to a platform that translates robot and system behaviour into operator-facing features.

My logistics specialisation from TU Berlin and supply chain exposure across multiple roles means I understand how logistics teams actually work, their time pressure, their tolerance for system interruptions, and the trust they need to extend to any new tool before they rely on it. I know how to earn that trust through reliability and through interfaces that do not require training to use.

I can start on four weeks' notice and am based in Berlin with no visa requirement anywhere in the EU.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in complex operational domains: defence AI, public-sector analytics, insurance, healthcare, logistics, and payments. I run continuous discovery, translate technical constraints and user needs into a prioritised roadmap, and lead cross-functional teams through agile delivery. My logistics specialisation at TU Berlin and my work on data platforms and operator-facing tools transfer directly to autonomous fleet orchestration.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
- On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
- Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
- I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design. I instrumented two competing workflows and the beautiful UI-led one recorded exactly zero clicks.
- Championed GitOps delivery with ArgoCD, reducing rollout time from days to 30 minutes for a platform serving multinational teams, and making it hotfix-capable.
- Led a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers, putting the team in autonomous control of its own environments, and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis time dropped from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent, and cut time-to-market for new insurance products from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN,
MÖNCHENGLADBACH | 09/2021-03/2022

- Retail and payments, POS and forecourt systems. Moved research results into production in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN |
03/2021-06/2021

- Government secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

- Health insurance, B2B procurement webshop. Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

PROJECT LEAD, ENERCON, WISMAR / MAGDEBURG | 04/2019-12/2019

- Wind energy, full site IT modernisation end to end.
-

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025-
PRESENT

- Construction staffing two-sided B2B marketplace. Zero to one solo: anonymity-until-payment model, WhatsApp and Telegram as the product surface, LLM agents across the funnel so one person runs day-to-day. Funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN |
01/2016-12/2021

- IT security, quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes to meet enterprise adoption requirements. Later Chair of the board.

CO-FOUNDER, CDO AND CFO, SMART SOIL TECHNOLOGIES, BERLIN |
03/2018-08/2021

- Nanotechnology and agriculture. Took a fertiliser product from laboratory to investor rounds, owning financial planning and investor reporting.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN |
02/2013-11/2018

- Fintech, mobile group-based P2P payments. Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

Product Management: continuous discovery, product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Data and Supply Chain Analytics: funnel and churn analysis, KPI definition, ETL (extract, transform, load), Dagster, dbt, PostgreSQL, Matomo, MicroStrategy; logistics domain from TU Berlin specialisation.

Platform and Delivery (SDLC): Kubernetes, OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin, SQL, MongoDB, Kafka.

Agile and Scaled Delivery: Scrum, Kanban, SAgile (Scaled Agile Framework), ART (agile release train), PI planning.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, human-in-the-loop design, EU AI Act, Explainable AI; prototyping with Claude Code, GitHub Copilot, Cursor and Lovable.

Stakeholder and Leadership: cross-functional team leadership up to 15+ engineers, C-level reporting, workshop facilitation, conflict resolution, change management.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership and financial planning as CFO.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
