§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in complex operational domains: defence AI, public-sector analytics, insurance, healthcare, logistics, and payments. My logistics specialisation at TU Berlin and my work on data platforms and operator-facing tools transfer directly to autonomous fleet orchestration.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric.
