## § WHY MODON

Modon runs a holding group with subsidiaries across real estate, events and hospitality, and the AI solutions role sits at exactly the point where group-level governance meets subsidiary-level adoption. The job description names Claude, Synthesia, Telnyx and Midjourney as the current portfolio, tools I use daily, and asks for someone who can own both the roadmap and the rollout, not one or the other. The combination of vendor management, seat cost control, and cross-functional onboarding across a matrixed group is work I have done across public-sector and enterprise clients for over a decade. *That blend of delivery discipline and product ownership is where I operate best.*

---

## § AI-NATIVE STACK

*Daily tools, not buzzwords.*

- **Claude**, document drafting, spec generation, reasoning chains
- **GitHub Copilot**, in-repo code and review assistance
- **Cursor**, editor-level AI pair programming
- **Lovable**, rapid front-end prototyping
- **Gamma.app**, stakeholder presentations and briefings
- **n8n**, agentic workflow automation
- **GPT**, general research and summarisation
- **Midjourney**, visual asset generation

---

## § TECHNICAL ENVIRONMENT

*Shipped with, not just listed.*

Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin, Django, PostgreSQL, MongoDB, Kafka, Dagster, dbt, Jira, Confluence, Figma, Miro, Matomo, MicroStrategy.

---

## § SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

*Two-sided B2B staffing marketplace built solo from zero.*

- Matches construction firms with workers, removing the headhunter from the hire cycle.
  - WhatsApp and Telegram as the primary product surface, keeping onboarding friction near zero.
  - LLM agents run across the full funnel so one person manages day-to-day operations.
  - Directly relevant: shows I can scope, build and operate an AI-native product alone, which maps to the self-directed delivery this role requires.
- 

## § HOW I WOULD WORK AT MODON

*First weeks, concrete.*

### WEEK 1

**Listen, map, find the gaps.**

Interview the D&T leads and subsidiary contacts to build a current-state map of every AI tool in use, its owner, its contract dates and its actual usage versus licensed seats.

### WEEK 2

**Audit and prioritise.**

Run a gap analysis between that register and the posting's named portfolio, flag the renewals or SLA issues closest to expiry, and draft a prioritised backlog for the first quarter.

## Ship the quick wins.

Kick off the highest-value rollout or governance fix first, likely seat rightsizing or an onboarding programme for underused tools, and set up the reporting cadence for usage and cost that D&T leadership needs.

---

### *I* COVER LETTER

Dear Modon team,

Modon's AI solutions role is a direct match for the work I have been doing for the past several years: owning AI and data platform portfolios as a product manager and product owner inside large, multi-entity organisations, from a German federal agency to a multinational defence programme. I am applying because the combination of portfolio ownership, vendor governance and cross-subsidary rollout is exactly the problem I find most interesting.

The job description asks for someone who can own the roadmap for Claude, Synthesia, Telnyx and Midjourney while also acting as project manager for rollouts across Modon Holding and ADNEC Group. I have done both at the same time. At Rohde & Schwarz I owned an AI and data platform across multinational teams and drove adoption from near-zero to a 200% increase in pipeline runs by reprioritising based on actual workflow analysis. At the Bundesagentur für Arbeit I owned the full product lifecycle for a national analytics platform, including vendor and tool governance, and served as Deputy IT Security Officer, so I understand the IT Security, Legal and DPO coordination the role requires.

AI governance is a real part of my background, not a credential. I have worked with AI governance frameworks in regulated environments, public sector, defence, healthcare, and I have shipped products under GDPR and EU AI Act constraints. I know how to translate policy requirements into tool configuration and onboarding rules that business users can actually follow.

On the vendor side, I have managed contract renewals, SLA escalations and licensing negotiations across multiple platforms. At EMIL Group I restructured a delivery organisation that was losing its senior engineers and its client trust, and recovered both within a single quarter. I am comfortable sitting between a vendor and a business unit and translating in both directions.

I use the tools in Modon's portfolio daily. Claude is my primary reasoning and drafting tool. I work with Midjourney regularly for visual assets. I have built agentic workflows with n8n and prototyped interfaces with Lovable. This means I can evaluate new AI capability from a position

of real use, not just vendor briefings, which is what the role's market-tracking and recommendations work requires.

I am based in Berlin and willing to relocate to Abu Dhabi. I hold EU citizenship and need no visa sponsorship within the EU; for the UAE I am ready to proceed with whatever sponsorship Modon's standard process requires.

Best regards, *Philipp Hilbert*

---

## *II* CURRICULUM VITAE

---

### § PROFILE

Product manager and product owner with 13 years of product ownership, with direct experience managing AI and data platforms in regulated, multi-entity organisations. I own portfolios end to end: roadmap and prioritisation, vendor relationships, cross-functional rollouts, usage and cost reporting, and AI governance alignment under GDPR and the EU AI Act. I have led cross-functional teams through Scrum, Kanban and SAFe delivery across defence, public sector, healthcare, insurance and payments.

---

### § HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
- On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
- Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
- I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.

---

## § WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

*Defence and aerospace. Internal AI and data platform for the FCAS European programme.*

- Spearheaded development of the internal AI and data platform for the FCAS European programme, managing a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.
- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.
- Championed GitOps delivery with ArgoCD, reducing rollout time from days to 30 minutes and making the platform hotfix-capable across multinational teams.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023 - 07/2024

*Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.*

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers, carried a full UI relaunch and a large ETL migration through the same period, and served as Deputy IT Security Officer.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

*Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.*

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis dropped from 30 minutes to 5 from form to database.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

*Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.*

- Restructured an 18-person delivery organisation into three lean teams: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production and cut time-to-market for new insurance products from months to less than a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

- Retail and payments, POS and forecourt systems. Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 - 06/2021

- Government, secure data platform. Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

- Health insurance, B2B procurement webshop. Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

PROJECT LEAD, ENERCON, WISMAR / MAGDEBURG | 04/2019 - 12/2019

- Wind energy, full site IT modernisation end to end.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017 - 06/2018

- Healthcare, clinical network. Wifi infrastructure rollout across nine hospitals.

---

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - PRESENT

- Construction staffing, two-sided B2B marketplace built solo from zero. LLM agents across the funnel; one person runs day-to-day operations. Funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

- IT security, quantum-secure encryption. Shipped a three-layer product that installs in under two minutes for enterprise buyers; later Chair of the board.

CO-FOUNDER, CDO AND CFO, SMART SOIL TECHNOLOGIES, BERLIN | 03/2018 - 08/2021

- Nanotechnology and agriculture. Took a fertiliser product from laboratory to investor rounds, owning financial planning and investor reporting.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

- Fintech, mobile group-based P2P payments. Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.

---

## § SKILLS

**AI Products and Tooling:** LLM agents, agentic workflows, AI governance, EU AI Act, Explainable AI (XAI), prompt and context engineering, human-in-the-loop design, Claude Code, GitHub Copilot, Cursor, Lovable, GPT, Midjourney, Gamma.app, n8n.

**Product Ownership:** requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, sprint review, retrospective, story-point estimation, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

**Product Management:** continuous discovery, product vision and product roadmap, prioritisation (MoSCoW, RICE), MVP definition, PoC, A/B testing, user research and interviews, prototyping, go-to-market support.

**Agile and Scaled Delivery:** Agile, Scrum, Kanban, SAgile, ART, PI planning.

**Stakeholder and Leadership:** stakeholder management, cross-functional team leadership, C-level and executive reporting, workshop facilitation, vendor and contract management, change management.

**Analytics and Data:** funnel and churn analysis, KPI definition, data, Matomo, MicroStrategy, ETL, Dagster, dbt, PostgreSQL.

**Governance and Business:** GDPR (General Data Protection Regulation), Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

**Technical Environments Owned:** Kubernetes, OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, Git, GitLab, Azure DevOps, REST APIs, Python, PostgreSQL, MongoDB, Kafka.
