§ PROFILE

Product manager with 13 years of product ownership, with direct experience managing AI and data platforms in regulated, multi-entity organisations. I own portfolios end to end: roadmap and prioritisation, vendor relationships, cross-functional rollouts, usage and cost reporting, and AI governance alignment under GDPR and the EU AI Act.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog.
