

Philipp Hilbert. *Senior Product Manager, B2B SaaS.*

Positioning, 13 years shipping regulated B2B SaaS products, from discovery through cross-functional delivery to launch.

§ WHY JOBOT

The role centers on agentic AI systems, API-driven workflows, and revenue-focused product strategy, exactly the intersection I have been working in. The explicit call-out of agentic AI and strong workflows as core qualifications is a signal that this team is building something genuinely new rather than layering AI features on a legacy roadmap. The requirement to create wireframes and mockups alongside technical specs means I would stay close to both the customer and the build. *That kind of full-stack ownership is where I do my best work.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec generation and edge-case review
- **GitHub Copilot**, development acceleration and code review
- **Cursor**, in-context refactors across large codebases
- **Lovable**, rapid front-end prototyping before engineering picks up
- **Framer**, design-heavy mockups and interactive specs
- **n8n**, agentic workflow design and automation
- **GPT**, first-pass research, user story drafts, release notes
- **Gamma.app**, stakeholder decks and product narratives

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

REST APIs, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka, Kubernetes, Docker, ArgoCD, GitOps, CI/CD with Jenkins and GitLab, Dagster, dbt, ETL pipelines, Jira, Confluence, Figma, Miro, Azure DevOps.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built solo from zero.

- Anonymity-until-payment model that protects both sides until commitment is made.
 - WhatsApp and Telegram as the product surface, with LLM agents running the funnel end to end.
 - Funnel and conversion tracked in SQL; one operator runs day-to-day.
 - Demonstrates exactly the API-driven, agentic-workflow product thinking this role asks for.
-

§ HOW I WOULD WORK AT JOBOT

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Talk to sales, CS, and engineering to map the current product workflows, identify where the revenue funnel loses customers, and understand which API integrations are driving or blocking deals.

WEEK 2

Prioritise and slice.

Run a prioritisation session with stakeholders to rank the top user stories against revenue impact and engineering cost, producing a first draft roadmap with clear trade-offs documented.

WEEK 3+

Ship and close loops.

Move the highest-priority slice into sprint, set measurable acceptance criteria, and establish a weekly review rhythm so the team ships against outcomes rather than a task list.

I COVER LETTER

Dear Jobot team,

I have 13 years of product ownership across B2B SaaS, defence AI platforms, insurance, payments, and public-sector analytics. The Sr Product Manager role stood out because it asks for someone who can hold the full product lifecycle, from discovery and requirements engineering through to launch, while also bringing hands-on fluency in APIs, agentic AI systems, and wireframing. That combination matches how I actually work.

At EMIL Group I shipped the Claims Center from concept to production for a B2B SaaS insurance platform, while simultaneously restructuring an 18-person delivery organisation into three leaner teams. Attrition dropped from near-total to a single departure. At Rohde & Schwarz I led a cross-functional team of 15+ engineers on an internal AI and data platform, introduced GitOps delivery with ArgoCD, and cut rollout time from days to 30 minutes. Both roles required constant prioritisation trade-offs between customer experience, platform performance, and engineering capacity, exactly what your responsibilities section describes.

On the agentic AI side: I build with it, not just around it. I use Claude Code, GitHub Copilot, Cursor, and n8n daily for spec generation, workflow automation, and rapid prototyping. I have designed multi-agent orchestration patterns for my own projects and understand the product challenges that come with human-in-the-loop design, evaluation loops, and AI governance. That means I can write crisp technical requirements for your engineering team rather than handing over vague prompts.

The data-informed decision-making requirement is also a direct match. At the Bundesagentur für Arbeit I owned a national labour-market analytics platform, introduced Dagster and dbt for ETL, and reduced data update time by 75%. I define success metrics before we build and track them after. "Outcome over output" is not a slogan I use in interviews, it is how I actually run sprints.

I am fully remote, available on four weeks' notice, and ready to move fast. I would welcome a call to learn more about the specific workflows and customer segments this role targets.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in B2B SaaS, regulated industries, defence AI, public-sector analytics, insurance, healthcare, payments and retail. I run continuous discovery, turn strategy, user needs and technical constraints into user stories and a prioritised roadmap, and lead cross-functional teams through agile delivery (Scrum, Kanban, SAFe). Strong hands-on background in APIs, agentic AI systems, data-informed decisions, and mockup-to-spec workflows.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes for an AI and data platform across multinational teams.
- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.
- Led a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023 - 07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis dropped from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads: attrition fell from a near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent; cut time-to-market for a new insurance product from months to less than a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL &
CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

Retail and payments, POS and forecourt systems.

- Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 -
06/2021

Government, secure data platform.

- Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

Health insurance, B2B SaaS procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017 - 06/2018

Healthcare, clinical network.

- Wifi infrastructure rollout across nine hospitals.
-

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - PRESENT

Construction staffing, two-sided B2B marketplace.

- Built zero to one alone: anonymity-until-payment model, WhatsApp and Telegram as the product surface, LLM agents across the funnel, funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

IT security, quantum-secure encryption hardware and software.

- Shipped a three-layer product that installs in under two minutes to meet enterprise buyers' time constraints. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

Fintech, mobile group-based P2P payments.

- Built from zero to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.
-

§ SKILLS

Product Management: continuous discovery, product vision and product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, wireframes, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, sprint review, retrospective, story-point estimation, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable, n8n.

Analytics and Data: funnel and churn analysis, KPI definition, Matomo, MicroStrategy, ETL, Dagster, dbt, PostgreSQL, data-informed product decisions.

Technical Environments Owned: REST APIs, Python, Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, Kotlin (Spring Boot), SQL, PostgreSQL, MongoDB, Kafka.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe, ART, PI planning.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
