

Philipp Hilbert. *Senior AI Product Manager with a track record of shipping.*

Positioning, 13 years delivering AI, data and platform products in regulated industries, with hands-on technical depth from DevOps to LLM agents.

§ WHY THOMAS REN ASSOCIATES

Thomas Ren Associates is operating at the intersection of investment management and applied AI, a space where product decisions carry real financial weight and vague roadmaps get expensive fast. The posting mentions priority across investment, research, portfolio management and enterprise operations all at once, which is the kind of multi-stakeholder environment where a PM who can read technical constraints and speak to senior business owners at the same time is actually rare. The reference to "meaningful use cases with senior-level visibility" is exactly the kind of accountability I look for. *That is the environment where doing careful product work pays off.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, daily coding assistance
- **Cursor / VS Code**, LLM-assisted development
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy interfaces
- **GPT**, research and edge-case generation
- **n8n**, agentic workflow automation

- **Dagster** / **dbt**, data pipeline orchestration

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, Python, Kotlin (Spring Boot), Django, REST APIs, PostgreSQL, MongoDB, Kafka, Dagster, dbt, SQL, ETL pipelines, LLM agents, prompt engineering, agentic workflows, EU AI Act compliance, Explainable AI.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built solo from zero.

- Anonymity-until-payment model that protects both sides until commitment is made.
- WhatsApp and Telegram as the product surface, keeping adoption friction near zero.
- LLM agents running the funnel end-to-end so one person can operate the day-to-day.
- Direct proof of concept for AI-assisted product execution at enterprise funnel scale.

§ HOW I WOULD WORK AT THOMAS REN ASSOCIATES

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow investment, research and operations teams to map where data moves, where decisions stall, and which workflows are already instrumented versus running on gut feel.

WEEK 2

Rank the opportunities.

Stack-rank the AI use cases by value, feasibility and build cost, cut the long list to three bets worth a PoC, and get alignment from the senior stakeholders who will live with the outcomes.

WEEK 3+

Ship a first proof.

Deliver a working prototype on the highest-confidence use case, instrument it with real users, and set the feedback loop that drives the roadmap from that point forward.

I COVER LETTER

Dear Hiring Team,

Investment management runs on information advantage, and the gap between the firms that have it and the ones that don't is widening fast as AI tooling matures. The role you are hiring for, Senior AI Product Manager bridging business leaders, data scientists and engineers, is the exact position I have been building toward across 13 years in regulated, complex environments.

At Rohde & Schwarz I owned the internal AI and data platform for the FCAS European defence programme. I led a cross-functional team of 15+ engineers and data scientists, introduced GitOps delivery with ArgoCD that cut rollout time from days to 30 minutes, and redirected the product roadmap based on direct instrumentation of user workflows, one competing design recorded zero clicks, so we killed it. That kind of technical judgement applied to product decisions is what your posting is asking for, and it is how I work on every engagement.

At the Bundesagentur für Arbeit I owned a national labour-market analytics platform. I introduced Dagster and dbt for ETL automation, saving 75% of the time per data update, migrated the platform from bare metal to containers, and carried a full UI relaunch through the same period while acting as Deputy IT Security Officer. Data product ownership in a high-stakes environment with senior stakeholder visibility is not new territory for me.

Your posting flags fintech and investment management experience as advantageous. My background in payments includes building a P2P mobile payments product from zero to acquisition by Sparkasse inside the girocard ecosystem, and owning B2B SaaS platforms for insurance and financial services at EMIL Group. I am also a hands-on practitioner in crypto and DeFi infrastructure, perpetuals, DEX aggregation, cross-chain execution, and the data and analytics stack that sits on top of it. I understand how financial systems are built, not just how they are presented.

On the AI side: I do not just advise on AI products. I prototype with Claude Code, GitHub Copilot and Lovable, I have designed and shipped LLM agent workflows, and I understand model deployment, machine learning pipelines and the governance questions that come with both. I built my own agent framework and a backtesting engine for crypto markets. I know what a working prototype looks like and what it costs to turn one into a production system.

The role is a good fit on the technical depth, the regulated-industry background, and the senior stakeholder exposure. I am available at short notice and happy to discuss the specifics of the mandate.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Senior AI Product Manager and product owner with 13 years of product ownership in regulated industries. Delivered AI and data platforms for defence, public-sector analytics, insurance, healthcare, fintech and payments. Strong in machine learning product strategy, data product ownership, LLM agent design, and bridging business leaders with engineering and data science teams. Runs continuous discovery, turns strategy and technical constraints into a prioritised roadmap, and leads cross-functional teams through agile delivery (Scrum, Kanban, SAFe).

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
- On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
- Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
- I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Championed GitOps delivery with ArgoCD, cutting rollout time from days to 30 minutes for an AI and data platform across multinational teams.
- Redirected product strategy based on user workflow instrumentation, increasing pipeline runs by 200% by deprioritising a UI that recorded zero clicks in production.
- Led a cross-functional team of 15+ engineers and data scientists through Scrum, owning the full roadmap for an AI and data platform with senior stakeholder visibility.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt for ETL automation, saving 75% of the time per data update and eliminating manual quarterly imports.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows, reducing digital anamnesis from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams: attrition fell from a near-total exodus to a single departure.
- Shipped the Claims Center from concept to production; cut time-to-market for new insurance products from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN,
MÖNCHENGLADBACH | 09/2021-03/2022

Retail and payments. POS and forecourt systems in a full SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN |
03/2021-06/2021

Government. Secure data platform for Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

Health insurance. B2B procurement webshop. Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025-
PRESENT

- Construction staffing B2B marketplace with LLM agents across the funnel, WhatsApp and Telegram as the product surface, and an anonymity-until-payment model protecting both sides until commitment.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN |
01/2016-12/2021

- Quantum-secure encryption product. Shipped a three-layer installation in under two minutes to meet enterprise adoption requirements. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN |
02/2013-11/2018

- Mobile group-based P2P payments product. Built from zero to acquisition by Sparkasse, operated inside the girocard ecosystem.

§ SKILLS

AI Products and Tooling: LLM (large language model) agents, agentic workflows, machine learning product strategy, prototyping, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC (proof of concept), A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Analytics and Data: ETL (extract, transform, load), Dagster, dbt (data build tool), PostgreSQL, funnel and churn analysis, KPI definition, Matomo, MicroStrategy, fintech data pipelines.

Agile and Scaled Delivery: Scrum, Kanban, SAgile (Scaled Agile Framework), ART (agile release train), PI (program increment) planning.

Technical Environments: Kubernetes, OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, Python, REST APIs, PostgreSQL, MongoDB, Kafka.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, financial planning, ROI reasoning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
