§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in regulated industries, including fintech, B2B SaaS, insurance, public-sector analytics, and defence AI. Co-founded a P2P payments fintech acquired into the girocard ecosystem. Strong background in payments, platform product management, cross-border financial workflows, and digital assets. I run continuous discovery, translate commercial and regulatory requirements into prioritised roadmaps, and lead cross-functional teams through agile delivery.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
