

Philipp Hilbert. *Product Manager building investment products people actually use.*

Positioning, I turn complex financial mechanics into clean, compliant product experiences, across fintech, crypto, and regulated B2B platforms, for 13 years.

§ WHY N26

N26 sits at the point where retail banking and serious investment products meet, that is a hard design problem, not a cosmetic one. The posting calls out stocks, ETFs, crypto, and managed portfolios in a single team scope, which means the PM has to hold regulatory constraints and UX simplicity at the same time. That matches the work I find most interesting. The phrase "turn complex market mechanics into simple, engaging products" is the job I have been doing, just in different sectors. *That is the kind of challenge where having shipped in regulated environments actually matters.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, daily coding assist
- **Cursor**, VSCode-integrated AI edits
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy UX exploration
- **GPT**, research, edge-case generation
- **n8n**, agentic workflow automation
- **Gamma.app**, stakeholder deck drafts

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, REST APIs, Kafka, Kubernetes, Docker, ArgoCD, GitOps, Jenkins, GitLab, Azure DevOps, Dagster, dbt, SQL, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built solo from zero.

- Anonymity-until-payment model protects both sides until commitment is made.
 - WhatsApp and Telegram as the product surface; LLM agents run the funnel day-to-day.
 - Funnel and conversion analysis in SQL; one person operates the full platform.
 - Demonstrates the end-to-end ownership N26 asks for: discovery, build, ops, and iteration, alone.
-

§ HOW I WOULD WORK AT N26

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the existing investments flows, stocks, ETFs, crypto onboarding, talk to engineers and compliance, and map where the current customer journey loses people.

WEEK 2

Slice and prioritise.

Take the gap map into a prioritisation session with the team, apply outcome-over-output framing, and cut the roadmap to what moves retention and activation in the next quarter.

WEEK 3+

Ship, measure, iterate.

Drive the first delivery cycle: well-scoped stories, clear acceptance criteria, go-to-market alignment with marketing and compliance, and a defined metric that tells us whether it worked.

I COVER LETTER

Dear N26 team,

I have 13 years of product ownership in regulated industries, insurance, healthcare, public-sector data, and fintech, and I have been an active crypto and DeFi user and builder for eight years. The N26 Investments PM role sits at exactly the intersection of those two tracks: financial product complexity on one side, retail UX simplicity on the other, with compliance running through everything.

At EMIL Group I took a B2B SaaS platform for insurers and underwriters through a full delivery restructure. The team was losing senior engineers and client trust at the same time. I reorganised the delivery organisation, shipped the Claims Center from concept to production, and cut time-to-market for a new insurance product from months to under a week. That kind of work, holding regulatory requirements, stakeholder relationships, and engineering velocity together, is what the N26 Investments posting describes.

My crypto experience goes beyond user familiarity. I actively trade across centralised and decentralised venues including perpetual futures, DEX aggregation, and cross-chain bridging. I have built a backtesting engine for crypto markets and developed my own trading automation. I understand the execution mechanics, the regulatory surface, and the UX friction points that keep retail users from engaging with investment products. At N26 that means I can write requirements grounded in how these products actually behave, not just how they are described in a brief.

On the Data and analytics side: at Bundesagentur für Arbeit I owned a national labour-market analytics platform, introduced Dagster and dbt for ETL automation, and cut the time per data update by roughly 75%. I know how to use data to make product decisions rather than just to report on them.

I am based in Berlin, an EU citizen, and available in four weeks.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in regulated industries, Fintech, insurance, healthcare, and public-sector Data platforms. I run continuous discovery, translate user needs, regulatory constraints, and technical limits into a prioritised roadmap, and lead cross-functional teams through agile delivery. Strong domain overlap with N26 Investments: active crypto and DeFi practitioner, eight years of hands-on experience across CEX and DEX venues, perpetuals, and cross-chain infrastructure, alongside a Fintech founding track including a P2P payments product acquired into the girocard ecosystem.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

Defence and aerospace. Internal AI and Data platform for the FCAS European programme.

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.
- Championed GitOps delivery with ArgoCD, reducing rollout time from days to 30 minutes across multinational teams and making the platform hotfix-capable.
- Led a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023 - 07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving roughly 75% of the time per Data update.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into KIS workflows, reducing digital anamnesis time from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production; cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN,
MÖNCHENGLADBACH | 09/2021 - 03/2022

Retail and payments, POS and forecourt systems. Full SAFe setup with agile release trains and PI planning.

- Moved research results into production across a matrix organisation.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 -
06/2021

- Government, secure Data platform. Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

Health insurance. B2B procurement webshop for three AOK insurers and roughly 20,000 employees.

- Migrated a legacy system to Shopware; still in production.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - 06/2026

- B2B marketplace matching construction firms with workers. Anonymity-until-payment model; LLM agents across the funnel; funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

- IT security, quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes for enterprise buyers. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

- Fintech, mobile group-based P2P payments. Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

Product Management: continuous discovery, product vision and product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Fintech and crypto: P2P payments, crypto (CEX/DEX mechanics, perpetuals, cross-chain bridging), girocard ecosystem, PSP integration, regulatory compliance, GDPR.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, story-point estimation, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe, ART, PI planning.

Analytics and Data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy, SQL.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, EU AI Act, Explainable AI; Claude Code, GitHub Copilot, Cursor, Lovable.

Technical Environments: Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

B2B Platform and Governance: B2B SaaS delivery, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
-
