

Philipp Hilbert. *Payments product manager with a fintech founding track.*

Positioning, I founded a P2P payments product from zero through Sparkasse acquisition, and have since owned roadmaps in fintech, insurance and e-commerce across regulated markets.

§ WHY LANDMARK DIGITAL

Seven retail brands, one payments team, GCC markets, that scope means the work is never just integration tickets. It is payment method strategy across jurisdictions, PSP relationships that affect conversion for millions of transactions, and funnel data that tells a different story in each market. The posting is specific about Payment Success Rate, 3DS2, Mada, and BNPL orchestration, those are the exact problems I find interesting, not just familiar. *That combination of operational depth and market breadth is where I do my best work.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo specs and edge-case generation
- **GitHub Copilot**, development workflow
- **Cursor / VSCode**, daily coding environment
- **Lovable**, rapid front-end prototyping
- **GPT**, drafting and research
- **Framer**, design-heavy work
- **Gamma.app**, stakeholder presentations
- **n8n**, agentic workflow automation

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

PostgreSQL, SQL, Python, Kotlin (Spring Boot), Django, MongoDB, REST APIs, Kafka, Azure DevOps, Jira, Confluence, Figma, Miro, Dagster, dbt, Kubernetes, Docker, ArgoCD, GitOps, Jenkins, GitLab, Matomo, MicroStrategy, Shopware.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace for construction staffing, built solo from zero.

- Matches construction firms with workers, with an anonymity-until-payment model protecting both sides until commitment.
 - WhatsApp and Telegram as the product surface, with LLM agents across the funnel.
 - Funnel and conversion analysis in SQL; one person runs the day-to-day.
 - Shows I can instrument a two-sided conversion funnel, identify drop-off, and close the loop, the same muscle the payments role needs on PSR and checkout optimisation.
-

§ HOW I WOULD WORK AT LANDMARK DIGITAL

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

I read the existing PSR dashboards, trace one declined payment end-to-end across gateway logs and partner reporting, and sit with engineering and finance to understand where the current reconciliation and dispute workflows break down.

WEEK 2

Prioritise, slice, validate.

I draft a ranked shortlist of the highest-leverage funnel failures, retry logic, 3DS2 friction, BNPL drop-offs, map them against the backlog, and align with the Senior Product Owner on what the next sprint defends.

WEEK 3+

Ship, measure, close loops.

I own requirements and acceptance criteria for the first initiative, drive UAT and production validation, and set up the measurement frame so we know within two weeks whether the change moved PSR in the right direction.

I COVER LETTER

Dear Landmark Digital team,

I started my payments career building a group-based P2P payments product from scratch. Kvitt Payment Solutions was taken through founding, product design, PSP and girocard integration, and eventually acquisition by Sparkasse. That experience taught me what the payments funnel looks like from the inside: how a failed 3DS2 redirect becomes a chargeback, why reconciliation exceptions surface at the worst possible time, and how much conversion you leave on the table by not investigating decline codes properly.

Since then I have worked as a product manager and product owner across insurance, public-sector analytics, healthcare and retail, always in environments where the data infrastructure and the compliance requirements were non-trivial. At AOK ITSCare I migrated a legacy procurement webshop to Shopware for roughly 20,000 employees. At Scheidt & Bachmann I moved research results into production across a SAFe organisation that touched POS and forecourt payment systems. These were not the same as owning a multi-brand GCC payments stack, but the mechanics transfer: PSP coordination, payment gateway flows, UAT with external partners, and keeping a cross-functional team unblocked.

What draws me specifically to this role is the combination of scale and precision it demands. Seven retail brands, each with its own checkout surface, running across GCC markets with different authentication requirements, local payment methods like Mada, and BNPL providers to manage, that is a real analytical and operational problem. The posting asks for someone comfortable using SQL to get into payment and funnel data directly. I do that. I have used funnel and churn analysis in every senior role, I have written and maintained ETL pipelines, and at construct8 I use SQL daily to track conversion across a two-sided marketplace.

I am actively targeting the UAE and willing to relocate to Dubai. I hold an EU passport and need no visa sponsorship outside the EU. I can be available within four weeks of an offer.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in fintech, payments, e-commerce, insurance, healthcare and defence AI. I own roadmaps, run continuous discovery, translate business and compliance requirements into user stories and acceptance criteria, and lead cross-functional teams through Scrum and SAFe delivery. I am comfortable using SQL and funnel data directly to identify root causes and drive decisions.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes for an AI and data platform across multinational teams.
- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.
- Led a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023 - 07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Integrated test automation into the Jenkins pipeline and freed several QA hours every week; introduced Dagster and dbt so quarterly imports ran without hand-holding, saving almost 75% of time per data update.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut a backlog a five-person team could not deliver to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis went from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads; attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production. Cut time-to-market for a new insurance product from months to less than a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL &
CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

Retail and payments. POS and forecourt systems in a full SAFe setup with agile release trains and PI planning.

- Moved research results into production across a matrix organisation covering payment gateway and POS integration.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

Health insurance. B2B e-commerce procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production. Backlog refinement, user stories and acceptance criteria in Jira.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - 06/2026

Construction staffing. Two-sided B2B marketplace, zero to one.

- Built solo: anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel. Funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

IT security. Quantum-secure encryption hardware and software.

- Shipped a three-layer product that installs in under two minutes to satisfy enterprise buyers. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

Fintech. Mobile group-based P2P payments platform.

- Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem. Owned PSP and payment gateway integration end-to-end.

§ SKILLS

Payments and E-commerce: payment gateway flows, PSP and acquirer coordination, BNPL integration, 3DS2 authentication, Payment Success Rate (PSR), funnel and decline analysis, PCI-DSS, reconciliation and disputes, checkout optimisation, P2P payments, girocard, Shopware.

Product Ownership: user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, UAT (user acceptance testing), release planning, Jira, Confluence, Figma, Azure DevOps, Miro.

Product Management: continuous discovery, product roadmap, prioritisation, MVP definition, A/B testing, user research, prototyping, go-to-market support, product lifecycle management.

Agile and Scaled Delivery: Scrum, Kanban, SAgile (Scaled Agile Framework), ART (agile release train), PI planning.

Analytics and Data: SQL, PostgreSQL, funnel and churn analysis, KPI definition, ETL (extract, transform, load), Dagster, dbt, Matomo, MicroStrategy.

Technical Environments Owned: REST APIs, Python, Kotlin, Django, MongoDB, Kafka, Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, Azure DevOps, Git, GitLab.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, Claude Code, GitHub Copilot, Cursor, Lovable.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
