

Philipp Hilbert. *Payments product manager with a fintech founding track.*

Positioning. I founded a P2P payments product from zero through Sparkasse acquisition, and have since owned roadmaps in fintech, insurance and e-commerce across regulated markets.

Dear Landmark Digital team,

I started my payments career building a group-based P2P payments product from scratch. Kvitt Payment Solutions was taken through founding, product design, PSP and girocard integration, and eventually acquisition by Sparkasse. That experience taught me what the payments funnel looks like from the inside: how a failed 3DS2 redirect becomes a chargeback, why reconciliation exceptions surface at the worst possible time, and how much conversion you leave on the table by not investigating decline codes properly.

Since then I have worked as a product manager and product owner across insurance, public-sector analytics, healthcare and retail, always in environments where the data infrastructure and the compliance requirements were non-trivial. At AOK ITSCare I migrated a legacy procurement webshop to Shopware for roughly 20,000 employees. At Scheidt & Bachmann I moved research results into production across a SAFe organisation that touched POS and forecourt payment systems. These were not the same as owning a multi-brand GCC payments stack, but the mechanics transfer: PSP coordination, payment gateway flows, UAT with external partners, and keeping a cross-functional team unblocked.

What draws me specifically to this role is the combination of scale and precision it demands. Seven retail brands, each with its own checkout surface, running across GCC markets with different authentication requirements, local payment methods like Mada, and BNPL providers to manage, that is a real analytical and operational problem. The posting asks for someone comfortable using SQL to get into payment and funnel data directly. I do that. I have used funnel and churn analysis in every senior role, I have written and maintained ETL pipelines, and at construct8 I use SQL daily to track conversion across a two-sided marketplace.

I am actively targeting the UAE and willing to relocate to Dubai. I hold an EU passport and need no visa sponsorship outside the EU. I can be available within four weeks of an offer.

Best regards, *Philipp Hilbert*
