PROFILE

Product manager and product owner with 13 years of product ownership in B2B SaaS, regulated industries, and AI-enabled platforms, spanning insurance, public-sector analytics, defence AI, and healthcare. I run continuous discovery, translate strategy and user needs into a prioritised roadmap, and lead cross-functional teams through agile delivery (Scrum, Kanban, SAFe). I define KPIs before we build and check them after we ship.

HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
- On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
- Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
- I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
