

Philipp Hilbert. *Senior Product Manager, C3 case management and operations.*

Positioning, I own platform strategy across regulated, workflow-heavy B2B environments and have shipped production AI features with human-oversight guardrails built in.

§ WHY LIBRA SOLUTIONS

Libra is building C3 as the operational backbone for a complex, multi-domain business, underwriting, servicing, payments, document management, in an industry where a wrong workflow decision has real consequences. That is the kind of environment I have worked in repeatedly: defence AI at Rohde & Schwarz, regulated insurance B2B SaaS at EMIL Group, and public-sector analytics at the Federal Employment Agency. The job description is specific about using Claude and AI platforms daily for discovery and requirements work, not as a talking point. I already do this. *That specificity is what made this role stand out.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude**, discovery, synthesis, requirements drafting, UAT planning
- **Claude Code**, in-repo prototyping and spec generation
- **GitHub Copilot**, paired programming and code review support
- **Cursor / VSCode**, fast iteration on prototypes
- **Lovable**, rapid front-end MVP validation
- **Framer**, workflow and UX concept prototypes
- **Gamma.app**, stakeholder communication and roadmap decks

- **n8n**, agentic workflow automation
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, REST APIs, Kubernetes, Docker, ArgoCD, GitOps, Jenkins, GitLab, Azure DevOps, Dagster, dbt, Kafka, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace for construction staffing, built and operated solo.

- Anonymity-until-payment model that protects both firms and workers until commitment is made.
 - WhatsApp and Telegram as the product surface, with LLM agents running the intake funnel.
 - Funnel and conversion analysis in SQL; one person runs day-to-day operations.
 - Demonstrates exactly the AI-assisted, low-overhead B2B platform pattern relevant to C3 workflow automation.
-

§ HOW I WOULD WORK AT LIBRA SOLUTIONS

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow operations teams across underwriting, servicing, and payments to map the current C3 workflows end to end, identify where the biggest friction points are, and audit the backlog for orphaned items before writing a single line of requirements.

WEEK 2

Slice, prioritise, validate.

Take the top friction points, frame them as user stories with acceptance criteria, and run a fast round of stakeholder checks with operations and engineering leads to confirm sequencing before committing to sprint scope.

WEEK 3+

Ship, measure, iterate.

Get the first increment in front of users, instrument the outcome against agreed success metrics, and document the first iterate-or-pivot decision so the team builds the habit of outcome tracking from day one.

I COVER LETTER

Dear Libra Solutions team,

I have spent 13 years as a product manager and product owner in regulated, operations-heavy environments, insurance B2B SaaS at EMIL Group, national labour-market analytics at the Federal Employment Agency, and defence AI at Rohde & Schwarz. In each of those roles the core challenge was the same one C3 faces: complex operational workflows, multiple domain stakeholders, and a need to ship product increments that real users trust. I know how to do that work.

Your job description calls out hands-on fluency with Claude and similar AI platforms for daily product work. I use Claude, Claude Code, GitHub Copilot, Lovable, and n8n every day, for discovery synthesis, edge-case generation, UAT planning, and agentic workflow automation. At Rohde & Schwarz I redirected product strategy based on instrumented workflow analysis, which doubled pipeline runs. At EMIL Group I shipped the Claims Center from concept to production in an insurance B2B SaaS platform with no prior precedent in the organisation. I understand what it means to define guardrails and human oversight for AI-enabled features, because I have built those structures in environments where a production failure has real downstream consequences.

The C3 role spans underwriting, negotiations, servicing, payment processing, and document management. That breadth is familiar territory. At EMIL Group I worked across underwriting and insurance product launch workflows; at the Federal Employment Agency I owned a full ETL migration and UI relaunch simultaneously while managing data-update cycles for policymakers. I am comfortable holding multiple domain threads without losing backlog health or requirements quality.

I also bring a direct parallel from my own work. I built construct8, a two-sided B2B marketplace for construction staffing, as a solo founder using LLM agents across the intake funnel and WhatsApp as the product surface. The anonymity-until-payment model required careful thinking about trust, compliance, and fallback paths, the same design considerations that matter for AI features in a regulated environment like legal funding. It is a small project, but it reflects how I actually work.

I am looking for a role where I can own a platform that matters to a real business and where the team takes product quality seriously. The description of C3, and the specificity about AI tooling and outcome tracking, suggests Libra is that kind of company.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product manager and product owner with 13 years of product ownership in regulated industries, insurance, fintech, defence AI, healthcare, and public-sector analytics. I own platform strategy end to end: continuous discovery, translating business and user needs into prioritised backlogs and product roadmaps, and leading cross-functional teams through agile delivery. I have shipped B2B SaaS features in insurance and fintech, integrated AI into operational workflows with human-oversight guardrails, and managed multi-domain platforms serving complex, regulated workflows.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
- On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
- Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
- I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design. I instrumented two competing workflows and the beautiful UI-led one recorded exactly zero clicks.
- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes for an AI and data platform across multinational teams.
- Spearheaded development of the internal AI and data platform for the FCAS European programme, managing a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023 - 07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving almost 75% of the time per data update cycle.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut a roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis dropped from 30 minutes to 5 from form to database.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Shipped the Claims Center from concept to production with no precedent in the organisation.
- Cut time-to-market for a new insurance product launch from months to less than a week.
- Restructured an 18-person delivery organisation into three lean teams with their own leads: attrition fell from near-total exodus to a single departure.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

Retail and payments, POS and forecourt systems. SAFe delivery with agile release trains and PI planning.

- Moved research results into production across a matrix organisation in a fully SAFe setup.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 - 06/2021

Government, secure data platform. Identity management for Robert Koch Institute programmes DIM and DESH.

- Owned data structures and identity management epics for a national health data programme.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

Health insurance, B2B procurement platform.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - 06/2026

- Construction staffing B2B marketplace: anonymity-until-payment model, WhatsApp and Telegram as the product surface, LLM agents across the intake funnel. Funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

- IT security, quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes for enterprise buyers. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

- Fintech, mobile group-based P2P payments. Built from zero and taken to acquisition; acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, UAT (user acceptance testing), velocity and burndown, Jira, Confluence, Figma, Miro.

Product Management: continuous discovery, product vision and product roadmap, prioritisation, MVP (minimum viable product) definition, prototyping, A/B testing, user research and interviews, go-to-market support.

Regulated and Domain Experience: insurance, fintech, healthcare, defence AI, public sector; GDPR, EU AI Act, Deputy IT Security Officer, compliance and privacy design.

B2B SaaS and Platform: B2B platform strategy, multi-sided marketplace design, case management workflow design, document management, payment processing product ownership.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe (Scaled Agile Framework), ART (agile release train), PI planning.

AI Products and Tooling: LLM agents, agentic workflows, human-in-the-loop design, AI governance, Explainable AI (XAI), prompt and context engineering; Claude Code, GitHub Copilot, Cursor, Lovable, Framer, n8n.

Analytics and Data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy.

Technical Environments Owned: Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin, SQL, PostgreSQL, MongoDB, Kafka.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
