

Philipp Hilbert. *Product Manager, IoT & Connected Fleet Platforms.*

Positioning, B2B SaaS product leader with 13 years of end-to-end ownership, now targeting fleet intelligence and video-telematics at scale.

§ WHY GEOTAB

Geotab's open platform architecture, processing billions of data points a day to drive safety, compliance, and fleet efficiency, is exactly the kind of infrastructure-heavy B2B SaaS environment where rigorous discovery and relentless prioritisation compound fastest. The Geotab Video Platform (GVP) sits at the intersection of real-time IoT data, machine learning-driven insights, and measurable fleet safety outcomes, which is a sharper product challenge than most "SaaS PM" roles offer. The Dubai location is a genuine draw rather than a compromise: I am actively targeting the Gulf and willing to relocate on short notice. *That combination, hard infrastructure, clear safety metrics, and a market where fleet telematics is accelerating, is exactly the environment where my strengths compound.*

§ HONEST FRAMING

I have not shipped a video telematics or in-cabin camera product; that specific hardware-software integration is new to me. What I have shipped are data-intensive, sensor-adjacent B2B SaaS platforms in regulated environments, defence AI, public-sector analytics, insurance, where the same discovery-to-launch discipline applies and where the stakes for getting safety-critical features wrong are equally high.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, assisted coding across Python and SQL
- **Cursor / VSCode**, LLM-assisted development environment
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy mockups and stakeholder previews
- **GPT**, edge-case generation and user-story drafting
- **n8n**, agentic workflow automation
- **Gamma.app**, deck and roadmap communication

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, GitLab, Azure DevOps, Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, REST APIs, Kafka, Dagster, dbt, SQL, ETL pipelines, Matomo, MicroStrategy, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

LIBERATION OF BAJOR GITHUB.COM/HILBERTP →

A multi-agent coding framework built solo to automate and orchestrate agentic development loops.

- Implements a file-queue-based agent loop that fans work across multiple LLM agents concurrently.
- Architecture uses n8n and Replit as the orchestration and execution layer, with structured context handoffs between agents.
- Built alongside a crypto backtesting engine (phoenix882.com) and an aFRR balancing-market pipeline (Hyperion), giving the framework real production workloads from day one.
- Directly relevant to GVP: the same agentic orchestration patterns apply to data ingestion pipelines, alert classification, and ML-driven video event processing at fleet scale.

§ HOW I WOULD WORK AT GEOTAB

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow GVP support tickets, join customer calls, and map the current discovery-to-launch process end to end, identifying where the roadmap is evidence-backed and where it is assumption-driven.

WEEK 2

Instrument and prioritise.

Define or sharpen the qualitative and quantitative reporting mechanisms already in place, win-loss data, churn signals, feature adoption, and produce a first prioritised view of the backlog against commercial goals and technical debt.

WEEK 3+

Ship, measure, repeat.

Lead the first sprint cycle with a clear definition of done, align Design and Engineering on acceptance criteria for the top epic, and establish the feedback loop cadence so every shipped increment is measurable against a stated outcome.

I COVER LETTER

Dear Geotab Hiring Team,

I am a product manager with thirteen years of end-to-end product ownership across B2B SaaS platforms in defence, public-sector analytics, insurance, and fintech. I am writing because the Geotab Video Platform role brings together the two things I find most energising: infrastructure-heavy data platform work where every decision has a measurable safety outcome, and a market, fleet telematics in the Gulf, that is genuinely accelerating. Dubai is a positive fit for me, not a compromise; I am actively targeting the UAE and ready to relocate on short notice.

The GVP role asks for someone who can own the full product lifecycle from customer discovery through launch and post-launch measurement, and who can do it repeatedly and at pace inside a cross-functional team. That is a precise description of how I have worked for the past decade. At Rohde & Schwarz I led the internal AI and data platform for the FCAS European defence programme: I ran customer workshops, instrumented two competing workflows, and redirected

the product away from a beautiful UI no one clicked toward a developer-code-first design that people actually used. At Bundesagentur für Arbeit I owned a national labour-market analytics platform, introduced Dagster and dbt so quarterly data imports ran without hand-holding, and carried a full UI relaunch through a containerisation migration in the same cycle. Both roles required exactly the data fluency, SQL, ETL pipeline design, KPI definition, and the cross-functional stakeholder alignment that the Geotab posting describes.

On the discovery and prioritisation side: at CLINET Platforms I inherited a roadmap a three-person team could not deliver, cut it to the top ten percent of features, and watched user acceptance rise more than fivefold. At EMIL Group I restructured an eighteen-person delivery organisation into three lean teams, stopped the senior-engineer attrition, and shipped the Claims Center from concept to production, cutting time-to-market for a new insurance product from several months to under a week. These are the kinds of ruthless prioritisation and cross-functional leadership outcomes the posting is looking for, and I have them across multiple industries and team sizes.

Geotab's open platform and Marketplace model means the GVP roadmap sits at the intersection of customer-facing features, third-party integrations, and machine learning-driven safety analytics. I have shipped on all three surfaces: platform integrations at Scheidt & Bachmann (SAFe, agile release trains, POS and forecourt systems), ML-adjacent data products at Rohde & Schwarz and Bundesagentur für Arbeit, and B2B SaaS user stories and epics throughout. I am also comfortable with SQL and analytics tooling in production, not just in concept.

I would be glad to walk through any of these projects in detail and to discuss how the GVP roadmap looks from the outside. Thank you for your time and consideration.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Manager and Product Owner with 13 years of end-to-end ownership across B2B SaaS platforms in regulated and data-intensive industries. I run continuous discovery, translate customer pain and business strategy into a prioritised roadmap, and lead cross-functional teams through agile delivery at pace. My strongest differentiator is the combination of strong product judgment, hands-on data fluency, and the ability to restructure and unblock delivery organisations mid-flight, from defence AI platforms to national public-sector analytics to insurance SaaS.

§ WHAT I CAN DO

Product Management: continuous discovery, product vision and product roadmap, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support, prioritisation.

Product Ownership: requirements engineering, user stories, acceptance criteria, epics, backlog refinement, sprint planning, story-point estimation, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Analytics and Data: KPI definition, funnel and churn analysis, SQL, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy, machine learning-adjacent data platform ownership.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning.

Technical Environments Owned: Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin, Django, PostgreSQL, MongoDB, Kafka.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, Explainable AI, EU AI Act, Claude Code, GitHub Copilot, Cursor, Lovable.

SaaS and Platform: B2B SaaS platform ownership, marketplace integrations, third-party API design, open platform patterns.

Stakeholder and Leadership: C-level reporting, cross-functional team leadership, workshop facilitation, conflict resolution, change management.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI & DATA PLATFORM 2024-2025

Owned the internal AI data platform for the FCAS programme. Introduced GitOps with ArgoCD: rollout time fell from days to 30 minutes. Redirected a UI-first product to developer-code-first design after instrumenting usage, built on Kubernetes, OpenShift, ArgoCD, Dagster, Python.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

Owned a national labour-market analytics platform for policymakers and researchers. Introduced Dagster and dbt, integrated test automation into Jenkins, migrated bare-metal to containers, and carried a full UI relaunch. Deputy IT Security Officer. Stack: Kubernetes, dbt, Dagster, PostgreSQL, MicroStrategy.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut a three-person roadmap to the top 10 % of features; user acceptance rose more than fivefold. Implemented the CGM/KIS interface myself: digital anamnesis time fell from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

Restructured an 18-person delivery organisation into three lean teams; attrition dropped from near-total exodus to one departure. Shipped the Claims Center from concept to production, reducing time-to-market for a new insurance product from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL & PAYMENTS 2021-2022

Moved research results into production in a fully SAFe environment with agile release trains and PI planning. Domain: POS and forecourt systems.

BUNDESDRUCKEREI · INTERIM PRODUCT OWNER · GOVERNMENT DATA PLATFORM 2021

Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PROXY PRODUCT OWNER · HEALTH INSURANCE B2B SAAS 2019-2020

Migrated a legacy procurement webshop to Shopware for three AOK insurers and ~20,000 employees; still in production.

ENERCON · PROJECT LEAD · SITE IT MODERNISATION 2019

Full site IT modernisation end to end for a wind-energy operator.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK 2017-2018

WLAN rollout across nine hospitals in a clinical network.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER & PRODUCT MANAGER · CONSTRUCTION STAFFING MARKETPLACE 2025-PRESENT

Zero-to-one two-sided B2B marketplace. Anonymity-until-payment model; WhatsApp/Telegram as product surface; LLM agents across the funnel.

QCRYPT AG · CO-FOUNDER & PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016-2021

Shipped a three-layer quantum-secure encryption product installing in under two minutes.
Later Chair of the board.

KVITT PAYMENT SOLUTIONS · FOUNDER & CFO · FINTECH P2P PAYMENTS
2013-2018

Built a mobile group-based P2P payments product from zero to acquisition; acquired and
operated by Sparkasse inside the girocard ecosystem.
