

Philipp Hilbert. *Product manager who ships AI-native EdTech at pace.*

Positioning, 13 years of end-to-end product ownership in B2B SaaS, with a hands-on AI-native stack and a record of turning complex workflows into products people actually use.

§ WHY EASYGENERATOR

Easygenerator is solving a problem that frustrates every large organisation: the people who hold the knowledge are not the people who can easily share it at scale. The posting signals genuine AI-first ambition, not a bolt-on feature, and the explicit call for a PM who can evaluate AI quality, trust, and adoption risk rather than just enthusiasm is the kind of rigour I find rare and interesting. At Rohde & Schwarz I redirected an entire product away from a beautiful UI that recorded zero clicks toward a developer-code-first flow users actually adopted, the same instinct applies to AI-powered authoring tools that must earn user trust before they earn daily use. *That is exactly the class of problem where my strengths compound.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo specs and edge-case generation
- **GitHub Copilot**, inline code and acceptance-criteria drafting
- **Cursor**, agentic code review and context-aware refactors
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy landing and onboarding flows
- **n8n**, multi-agent workflow orchestration
- **GPT**, discovery synthesis and stakeholder copy
- **Gamma.app**, structured pitch and roadmap decks

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, REST APIs, Kafka, Kubernetes, OpenShift, Docker, ArgoCD (GitOps), Jenkins, GitLab CI/CD, Dagster, dbt, Azure DevOps, Jira, Confluence, Figma, Miro, Matomo, MicroStrategy.

§ SIDE PROJECT

LIBERATION OF [BAJOR GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A self-built multi-agent coding framework for autonomous development loops.

- Orchestrates file-queue-based agent loops with structured handoff between planning, implementation, and review agents.
 - Built on n8n and Replit with LLM agents at each stage, with human-in-the-loop checkpoints at critical decisions.
 - Active development with real workload: used to ship backtesting infrastructure and crypto trading tooling.
 - Directly relevant to evaluating agentic AI features for authoring workflows, the engineering empathy comes from having built the plumbing, not just read about it.
-

§ HOW I WOULD WORK AT EASYGENERATOR

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow Customer Success calls and Sales demos to understand where authors stall, map the existing AI feature surface against real workflow moments, and identify the one or two places where AI is adding friction instead of removing it.

WEEK 2

Frame, slice, validate.

Turn the discovery findings into two or three sharp problem statements, run a lightweight prioritisation pass against Easygenerator's growth metrics, and propose a first small bet to the team for rapid feedback.

Ship, measure, iterate.

Drive the first scoped delivery to production, instrument with clear success metrics, and run a retrospective that feeds directly into the next discovery cycle.

I COVER LETTER

Easygenerator's posting asks for a PM who is "excited by the potential but grounded in real customer problems." That phrase is the shortest description of how I have worked for the past thirteen years, so I want to show rather than claim it.

At Rohde & Schwarz I was brought in to accelerate an internal AI and data platform for the FCAS European defence programme. The team had built a genuinely elegant UI. When I got access to the usage instrumentation and ran it, the click count was exactly zero. I redirected the product to a developer-code-first design within weeks, not by overriding anyone, but by making the data impossible to ignore in the customer workshops. That is the AI-quality-and-adoption challenge in miniature: the thing that looks like the right AI experience is often not the one users actually reach for. Easygenerator's authoring tool lives inside the same tension, AI that feels powerful in a demo can feel intrusive or untrustworthy in a real content-creation workflow.

At CLINET Platforms I inherited a three-person team and a roadmap it could not deliver. I cut it to the top ten percent of features. User acceptance rose more than fivefold. At EMIL Group I restructured an 18-person delivery organisation that was losing its senior engineers: attrition fell from near-total exodus to a single departure. In both cases the lever was the same, ruthless prioritisation and a willingness to make the uncomfortable call before it becomes the expensive one. B2B SaaS EdTech at Easygenerator's stage needs exactly that discipline: a PM who protects the team's focus while the commercial organisation rightly wants everything at once.

On the AI side, I work hands-on: I build multi-agent orchestration frameworks, I prototype with Claude Code and Lovable before writing a spec, and I evaluate LLM outputs against real user acceptance criteria rather than vibes. I have designed human-in-the-loop checkpoints into agentic workflows, thought carefully about evaluation loops and trust signals, and read the EU AI Act for a client in a regulated environment. What I do not have is direct experience in the EdTech or learning-content domain. I expect a learning curve of a few weeks on the authoring-workflow specifics, and I am comfortable saying so.

Easygenerator is used by Kellogg's, T-Mobile, and Siemens, organisations where the person who holds the knowledge and the person who creates the training content are different people, and the gap between them is expensive. Closing that gap with AI that earns user trust rather than demanding it is a product problem I find genuinely compelling. I would be glad to talk through how I would approach the first ninety days in more detail.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager with 13 years of end-to-end ownership in B2B SaaS, regulated industries, and public-sector platforms. I run continuous discovery, translate strategy and user needs into a prioritised roadmap, and lead cross-functional teams through agile delivery. My edge in an AI-first environment is that I build and evaluate AI-native tools daily rather than managing them at arm's length, which means I can work credibly with engineering on AI-powered capabilities, spot quality and trust risks early, and frame product bets around real workflow impact.

§ WHAT I CAN DO

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI; full prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, epics, backlog refinement, sprint planning, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Analytics and Data: funnel and churn analysis, KPI definition, Matomo, MicroStrategy, ETL, Dagster, dbt, PostgreSQL.

Technical Environments: Kubernetes, OpenShift, Docker, ArgoCD, Jenkins, GitLab CI/CD, Python, Kotlin, Django, REST APIs, PostgreSQL, MongoDB, Kafka.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI PLATFORM 2024 TO 2025

Internal AI and data platform for FCAS. Introduced GitOps with ArgoCD: rollout time fell from days to 30 minutes. Redirected the product from a UI-led design to a developer-code-first workflow after instrumentation showed zero adoption of the former, stack: Kubernetes, ArgoCD, Helm, Python, Dagster.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023 TO 2024

National labour-market analytics platform. Integrated test automation into Jenkins, introduced Dagster and dbt for quarterly imports, migrated bare-metal to containers, and carried a full UI relaunch concurrently. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

iOS/Android patient app. Cut roadmap to top 10 % of features: user acceptance rose fivefold. Implemented CGM/KIS interface directly; digital anamnesis time fell from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

Restructured 18-person delivery org into three lean teams: attrition fell from near-total exodus to one departure. Shipped Claims Center concept to production, cutting new-product time-to-market from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL & PAYMENTS 2021 TO 2022

POS and forecourt systems. Moved research results into production across a matrix org in a fully SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · INTERIM PRODUCT OWNER · SECURE DATA PLATFORM 2021

Identity management data structures for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PROXY PRODUCT OWNER · HEALTH INSURANCE B2B 2019 TO 2020

Migrated legacy procurement webshop to Shopware for three AOK insurers and ~20,000 employees; still in production.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK 2017
TO 2018

WLAN rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER & PM · CONSTRUCTION STAFFING MARKETPLACE
2025 TO 2026

Two-sided B2B marketplace, zero to one alone. Anonymity-until-payment model; WhatsApp/
Telegram as product surface; LLM agents across the funnel.

QCRYPT AG · CO-FOUNDER & PO · QUANTUM-SECURE ENCRYPTION 2016 TO
2021

Shipped a three-layer hardware-software product installing in under two minutes. Later Chair of
the board.

KVITT PAYMENT SOLUTIONS · FOUNDER & CFO · P2P FINTECH 2013 TO 2018

Mobile group-based P2P payments. Built from zero to acquisition by Sparkasse inside the
girocard ecosystem.
