

Philipp Hilbert. *Senior Product Manager, delivery experience at regional scale.*

Positioning, thirteen years of end-to-end product ownership in regulated, operationally complex environments, now applied to Amazon's last-mile delivery experience across MENAT.

§ WHY AMAZON

Amazon's DEX team in MENAT sits at the intersection of logistics operations, customer expectations, and regional complexity, exactly the kind of environment where product ownership means more than backlog grooming. The job description calls for someone who can blend P&L accountability, product development and operational excellence in a single role, which matches precisely how I have worked across public-sector analytics, insurance platforms and healthcare systems. The explicit requirement for data-driven insight generation and compelling senior-leadership documents is one I have delivered in regulated environments where the cost of a wrong decision was measured in months, not sprints. *That is the kind of accountability that sharpens product judgement in ways feature factories never do.*

§ HONEST FRAMING

My e-commerce and logistics background is real but narrower than Amazon's scale: one Shopware B2B webshop at AOK ITSCare and a logistics specialisation in my master's at TU Berlin. What I bring in place of Amazon-scale e-commerce tenure is a track record of entering operationally complex, cross-functional environments quickly, instrumenting competing workflows, and steering decisions with data rather than intuition.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec generation and edge-case drafting
- **GitHub Copilot**, assisted prototyping and requirements review
- **Cursor / VSCode**, AI-paired development environment
- **Lovable**, rapid front-end prototyping for user testing
- **GPT**, document drafts, structured research, stakeholder summaries
- **Gamma.app**, executive-facing decks and narrative structuring
- **n8n**, agentic workflow automation across multi-step pipelines
- **Framer**, design-heavy concept work and interactive mockups

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD pipelines, Dagster, dbt, PostgreSQL, MongoDB, Kafka, Python, Kotlin with Spring Boot, REST APIs, Azure DevOps, GitLab, Jira, Confluence, Matomo, MicroStrategy, Shopware.

§ SIDE PROJECT

LIBERATION OF [BAJOR GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A personal multi-agent coding framework built from scratch.

- Implements a file-queue-based agent loop that routes tasks across LLM agents without a central orchestrator.
- Architecture choice: pure file-queue messaging keeps each agent stateless and independently resumable after failure.
- Active development alongside Hyperion (aFRR balancing-market pipeline) and phoenix882.com (crypto backtesting engine).
- Demonstrates the kind of systems thinking, autonomous handoffs, failure recovery, observable state, that maps directly to last-mile delivery orchestration at scale.

§ HOW I WOULD WORK AT AMAZON

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow delivery operations and customer-experience data pipelines in MENAT, interview the DEX team leads and operations partners to build a shared map of where the delivery promise breaks down for customers in the region.

WEEK 2

Instrument and prioritise.

Instrument the two or three candidate problem areas with existing data sources, size the customer and P&L impact of each, and produce a prioritised one-pager for senior leadership with a clear recommendation.

WEEK 3+

Ship and iterate.

Align stakeholders on the first initiative, write the PRD, own the delivery timeline, and run the first launch, then close the feedback loop with customer signals before the next planning cycle.

I COVER LETTER

Dear Amazon DEX Hiring Team,

I am applying for the Senior Product Manager role on the MENAT DEX team because it combines the two things I find most demanding and most interesting in product work: genuine P&L accountability and cross-functional delivery inside a complex operational system. The MENAT region adds a third dimension, regional nuance that cannot simply be imported from a Western e-commerce playbook.

My most directly transferable engagement was at Rohde & Schwarz, where I owned the AI and data platform for the FCAS European defence programme. That programme had a multi-national team, a stakeholder landscape spanning engineers, data scientists and executive sponsors across countries, and a delivery pipeline that was failing: rollouts took days and could not carry a hotfix. I introduced GitOps with ArgoCD, reduced rollout time from days to thirty minutes, and made the platform hotfix-capable. More importantly, I pushed my way into the customer workshops, instrumented two competing workflows, found that the UI-led option

recorded exactly zero clicks in production, and redirected the product accordingly. That sequence, data over assumption, outcome over effort, is how I approach every product decision.

At Bundesagentur für Arbeit I owned a national labour-market analytics platform for policymakers and researchers, where I served as Deputy IT Security Officer alongside the product role. I migrated the system from bare metal into containers, introduced Dagster and dbt to eliminate manual quarterly imports, and carried a full UI relaunch through the same period. The ability to hold a strategic vision and an operational delivery queue simultaneously is not something I learned in a course; it is the only mode I have operated in.

Earlier, at EMIL Group, I inherited an 18-person delivery organisation that was losing its senior engineers and its client trust. I restructured it into three lean teams with their own leads, reduced attrition from a near-total exodus to a single departure, and shipped the Claims Center from concept to production, cutting time-to-market for a new insurance product from many months to under a week. The DEX role description asks for someone who can influence cross-functionally and drive outcomes for senior leadership; that restructuring required exactly that, under real pressure.

My logistics specialisation at TU Berlin and a B2B e-commerce implementation at AOK ITSCare (Shopware, three insurers, roughly 20,000 employees, still in production) give me enough grounding in the supply-and-delivery domain to ramp quickly. I am ready to relocate to Dubai or Abu Dhabi and work fully on-site, so the MENAT posting is a positive fit rather than a location compromise.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager and product owner with thirteen years of end-to-end ownership in regulated, operationally complex environments, defence AI, public-sector analytics, insurance, healthcare, and retail. I run continuous discovery, translate strategy and user needs into a prioritised roadmap, and lead cross-functional teams through agile delivery. My logistics specialisation from TU Berlin and a hands-on B2B webshop implementation at AOK ITSCare anchor me in the e-commerce and delivery domain; my track record at Rohde & Schwarz, Bundesagentur für Arbeit and EMIL Group demonstrates the data-driven judgement and senior-stakeholder influence this role requires.

§ WHAT I CAN DO

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, A/B testing, user research and interviews, prototyping, go-to-market support, P&L reasoning.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning.

Analytics and Data: funnel and churn analysis, KPI definition, Matomo, MicroStrategy, ETL, Dagster, dbt, PostgreSQL.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Technical Environments Owned: Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Python, Kotlin, REST APIs, PostgreSQL, MongoDB, Kafka.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, evaluation loops, human-in-the-loop design, EU AI Act, Explainable AI; prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership and financial planning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI PLATFORM 2024 TO 2025

Introduced GitOps with ArgoCD across a multinational team, reducing rollout time from days to 30 minutes and making the platform hotfix-capable; redirected product direction based on zero-usage instrumentation data from customer workshops.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023 TO 2024

Migrated a national labour-market analytics platform from bare metal to containers, introduced Dagster and dbt, integrated test automation into Jenkins, and led a full UI relaunch, serving as Deputy IT Security Officer throughout.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE 2023

Cut a three-person team's roadmap to the top 10% of features, lifting user acceptance more than fivefold; implemented the CGM hospital-system interface, reducing digital anamnesis time from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE SAAS 2022

Restructured an 18-person delivery organisation into three lean teams, reducing attrition from near-total to one departure; shipped Claims Center from concept to production, cutting time-to-market from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL AND PAYMENTS 2021 TO 2022

Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · INTERIM PRODUCT OWNER · SECURE DATA PLATFORM 2021

Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PROXY PRODUCT OWNER · HEALTH INSURANCE E-COMMERCE 2019 TO 2020

Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY IT 2019

Full site IT modernisation end to end across multiple locations.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE CLINICAL NETWORK 2017 TO 2018

WLAN rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION STAFFING MARKETPLACE 2025 TO 2026

Zero to one: two-sided B2B marketplace with anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016 TO 2021

Shipped a three-layer product that installs in under two minutes; later Chair of the board.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013 TO 2018

Built from zero to acquisition; acquired and operated by Sparkasse inside the girocard
ecosystem.
