

# Philipp Hilbert. *Product Manager building unified consumer financial experiences.*

*Positioning*, Ten years shipping regulated financial products, eight years of hands-on crypto, and a daily AI-native workflow, this is the role those three things point to.

## § WHY UMO

UMO is building what most FinTech platforms only claim to build: a single product surface that spans fiat, crypto, and investment in one coherent experience. The challenge of making regulated onboarding feel effortless for someone buying their first crypto asset is exactly the kind of problem I have spent years on. The detail about AI-augmented workflows with Cursor and Claude in the job description is not a footnote, it reflects how I already work every day. *That is the environment where the work compounds.*

---

## § AI-NATIVE STACK

*Daily tools, not buzzwords.*

- **Claude Code**, spec generation and in-repo refactors
- **Cursor**, AI-assisted code and requirements editing
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy UX iterations
- **GPT**, research synthesis and edge-case generation
- **GitHub Copilot**, implementation support
- **n8n**, agentic workflow automation
- **Gamma.app**, stakeholder-facing documentation

---

## § TECHNICAL ENVIRONMENT

*Shipped with, not just listed.*

PostgreSQL, REST APIs, Kafka, Kubernetes, Docker, ArgoCD, GitOps, CI/CD with Jenkins, Dagster, dbt, Python, Kotlin (Spring Boot), SQL, MongoDB, Matomo, MicroStrategy, Jira, Confluence, Figma, Miro.

---

## § SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

*Two-sided B2B marketplace matching construction firms with workers, built solo from zero.*

- WhatsApp and Telegram as the entire product surface, removing app-install friction from day one.
  - LLM agents across the funnel so one person runs operations end-to-end.
  - Anonymity-until-payment model protecting both sides until commitment is mutual.
  - Direct proof of autonomous zero-to-one delivery, the core ask for this role.
- 

## § HOW I WOULD WORK AT UMO

*First weeks, concrete.*

### WEEK 1

#### **Listen, map, find the gaps.**

Sit with the onboarding funnel data and walk the current crypto and fiat flows end to end, noting where users drop, where the compliance checkpoints create friction, and where the experience feels like two separate products stitched together.

### WEEK 2

#### **Instrument and slice.**

Define the CX metrics that matter, onboarding conversion, crypto activation, D7 and D30 retention, instrument any gaps in event tracking, and run the first cohort cuts to understand which user segments are underserved.

WEEK 3+

## Ship and iterate.

Pick the highest-leverage friction point in the onboarding journey, run a short usability test to validate the hypothesis, align with Design and Compliance, and ship the first experiment.

---

## I COVER LETTER

Dear UMO team,

I am applying for the Product Manager, Customer Experience role. The problem you are solving, making crypto and fiat feel like one product rather than two apps stapled together, is one I find hard and worth solving.

My crypto background is not theoretical. I have traded across Hyperliquid, Bitget, Jupiter, 1inch, and Across Protocol. I work regularly with liquidation heatmap tools like Coinglass and Hyblock Capital and spend time on market microstructure: slippage, routing, price impact, and custody mechanics. At Polygon I worked on L2 protocol products. I bring 8 years of retail crypto experience and the infrastructure perspective that comes with it, wallets, custody, on-chain transactions, and what first-time users actually find confusing.

On the regulated onboarding side, I have run that problem before. At Kvitt Payment Solutions, the P2P payments product I built was acquired and operated by Sparkasse inside the girocard ecosystem, a tightly regulated environment where every user journey had to pass compliance without killing conversion. At Bundesagentur für Arbeit I served as Deputy IT Security Officer and owned products subject to public-sector data and security requirements. I understand how to design flows that satisfy compliance without punishing the user.

The metric work is there too. At CLINET Platforms I cut a roadmap to the top 10% of features measured against agreed success criteria and user acceptance rose more than fivefold. At Rohde & Schwarz I instrumented two competing product workflows, the beautiful UI-led one recorded zero clicks, and I redirected strategy accordingly, increasing pipeline runs by 200%. I use data to make decisions, not to decorate them. A/B testing, funnel analysis, cohort cuts, these are standard tools in my workflow, not occasional ones.

The AI-augmented workflow requirement in this posting reflects what I already do. I use Claude Code, Cursor, and Lovable daily for research synthesis, spec generation, front-end prototyping, and journey mapping. I also build my own agent frameworks and have a crypto backtesting engine in active development. This is not a selling point I am adding for this application.

I would welcome a conversation about the onboarding and CX challenges UMO is working through right now.

Best regards, *Philipp Hilbert*

---

## II CURRICULUM VITAE

---

### § PROFILE

Product manager and product owner with 13 years of product ownership across fintech, payments, regulated onboarding, defence AI, and healthcare. At Kvitt Payment Solutions I built a P2P payments product from zero to acquisition by Sparkasse. I bring 8 years of hands-on crypto experience including L2 protocol work at Polygon, and I run continuous discovery, user research, and data-driven iteration as standard practice across agile delivery.

---

### § HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
  - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
  - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
  - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
- 

### § WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

*Defence and aerospace. Internal AI and data platform for the FCAS European programme.*

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design. I instrumented two competing workflows and the beautiful UI-led one recorded exactly zero clicks.
- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes across multinational teams, making the platform hotfix-capable.
- Managed a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /  
REMOTE | 05/2023 - 07/2024

*Public sector. National labour-market analytics platform. Deputy IT Security Officer.*

- Integrated test automation into the Jenkins pipeline and freed several QA hours every week; introduced Dagster and dbt so quarterly data imports ran without hand-holding, saving almost 75% of the time per update.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

*Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.*

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis went from 30 minutes to 5 from form to database.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

*Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.*

- Restructured an 18-person delivery organisation into three lean teams: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production and cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL &  
CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

- Retail and payments, POS and forecourt systems. Moved research results into production in a full SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 -  
06/2021

- Government, secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

- Health insurance, B2B procurement webshop. Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees. Backlog refinement, user stories and acceptance criteria in Jira.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017 - 06/2018

- Healthcare, clinical network. Wifi infrastructure rollout across nine hospitals.

---

## § FOUNDER TRACK

### FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - PRESENT

- Construction staffing marketplace, built solo. WhatsApp and Telegram as the product surface, LLM agents across the funnel, anonymity-until-payment model. Funnel and conversion analysis in SQL.

### CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

- IT security, quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes to satisfy enterprise buyers. Later Chair of the board.

### FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

- Fintech, mobile group-based P2P payments. Built from zero to acquisition by Sparkasse, operated inside the girocard ecosystem.

---

## § SKILLS

**Product Management:** continuous discovery, product vision and roadmap, prioritisation, MVP definition, A/B testing, user research and interviews, usability testing, funnel and cohort analysis, CX metrics (conversion, activation, retention, NPS/CSAT), prototyping, go-to-market support.

**FinTech and Crypto:** P2P payments, girocard ecosystem, PSP integration, regulated onboarding, KYC/AML frameworks, crypto wallets, custody, on-chain transactions, CEX/DEX mechanics, L2 protocols, stablecoins, cross-chain bridging.

**AI Products and Tooling:** LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable, Framer, n8n.

**Analytics and Data:** funnel and churn analysis, KPI definition, event tracking, Matomo, MicroStrategy, ETL, Dagster, dbt, PostgreSQL, SQL, cohort analysis.

**Agile Delivery:** Scrum, Kanban, SAFe, backlog refinement, sprint planning, velocity tracking, Jira, Confluence, Figma, Miro.

**Regulated:** GDPR, Deputy IT Security Officer, identity management, compliance alignment in financial products.

**Technical Environments:** Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka.

---

## § EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
-
