

Philipp Hilbert. *P2P marketplace and crypto payments product lead.*

Positioning, 13 years owning marketplace and payment products, including a P2P fintech taken to acquisition and active crypto trading infrastructure work.

§ WHY BYBIT

Bybit sits at the intersection of the two things I have spent the most time on: marketplace mechanics and crypto infrastructure. The P2P product lead role owns exactly the workflows I find most interesting, order matching, escrow, dispute resolution, and the trust gap between strangers completing a trade. The responsibility to drive order completion rate and dispute rate as first-class metrics, not as afterthoughts, is the right way to run a marketplace. *That is the kind of product problem I want to own.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and edge-case generation
- **GitHub Copilot**, pair coding and PR review
- **Cursor/VSCode**, prototyping and refactors
- **Lovable**, rapid front-end prototyping
- **GPT**, research and user interview synthesis
- **n8n**, agentic workflow automation
- **Framer**, interaction mock-ups
- **Gamma.app**, stakeholder decks

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, PostgreSQL, MongoDB, REST APIs, Kotlin (Spring Boot), Kafka, Kubernetes, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Dagster, dbt, SQL, Jira, Confluence, Figma, Miro. On the crypto side: Hyperliquid, Bitget, Jupiter, 1inch, Across Protocol, perpetuals, DEX aggregation, cross-chain bridging.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/hilbertp) →

A two-sided B2B staffing marketplace with an anonymity-until-payment model.

- Matches construction firms with workers, removing the headhunter from the hire.
 - WhatsApp and Telegram as the product surface; LLM agents across the full funnel.
 - Funnel and conversion analysis in SQL; one person runs the day-to-day.
 - Directly relevant: same trust gap between strangers, same escrow-until-commitment pattern as P2P crypto trading.
-

§ HOW I WOULD WORK AT BYBIT

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Sit with CS and dispute teams to map the full P2P order lifecycle, from ad creation through payment confirmation to dispute resolution, and find where completion rate drops and dispute rate spikes.

WEEK 2

Slice, instrument, prioritise.

Take the two or three biggest drop-off points and confirm them with data; draft a hypothesis-ranked backlog that the team can start pulling from immediately.

WEEK 3+

Ship, measure, close.

Push the first iteration live, watch the metrics, and run a retrospective tight enough that the next sprint already has a validated target.

I COVER LETTER

Dear Bybit team,

I want to lead the P2P product at Bybit because I have spent 13 years at the exact intersection this role sits on: marketplace trust mechanics and payment flows. Kvitt Payment Solutions, which I co-founded and built from zero, was a mobile P2P group payments product that ran inside the girocard ecosystem and was acquired by Sparkasse. Building that product meant solving the same problems Bybit's P2P team works on daily: matching, escrow, dispute resolution, and user protection when two strangers settle a trade. I understand why order completion rate and dispute rate are the metrics that matter, because I built the instrumentation to track them.

On the crypto side, I trade actively across Hyperliquid, Bitget, Jupiter, and 1inch, perpetuals, spot, DEX aggregation, and cross-chain flows. I study execution quality, liquidation heatmaps, and market microstructure with tools like Coinglass and Hyblock Capital. I am not a passive observer of this market. I understand the mechanics that make a P2P crypto trade succeed or fail from the user's side.

At Rohde & Schwarz I managed a cross-functional team of 15 engineers and data scientists and instrumented two competing product workflows to redirect strategy, a 200% increase in pipeline runs came from dropping the workflow nobody used. At Bundesagentur für Arbeit I owned a national analytics platform end to end, including a full ETL migration and a UI relaunch in parallel. At CLINET I cut a five-person team's roadmap to the top 10% of features and watched user acceptance rise more than fivefold. Each of these was a different domain, but the underlying move was the same: find the drop-off, confirm it with data, cut what doesn't matter, and ship the thing that does.

The P2P product lead role at Bybit asks for exactly that combination, marketplace mechanics, payment flow design, data-driven optimisation, and cross-functional execution. I am ready to own the order completion rate and dispute rate targets and drive them with the same rigour I brought to each product I have owned.

I would welcome a conversation.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product manager and product owner with 13 years of product ownership across fintech, marketplace, payments, and regulated industries. I have built a P2P mobile payments product from zero through acquisition, owned marketplace trust mechanics, and actively trade across centralized and decentralized crypto venues. I run continuous discovery, turn strategy and user needs into a prioritized roadmap, and lead cross-functional teams through agile delivery.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025-PRESENT

Construction staffing. Two-sided B2B marketplace matching firms with workers.

- Built zero to one alone: anonymity-until-payment model protecting both sides until commitment, WhatsApp and Telegram as the product surface.
- LLM agents across the full funnel; one person runs the day-to-day. Funnel and conversion analysis in SQL.

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Managed a cross-functional team of 15+ engineers and data scientists through Scrum; instrumented two competing workflows and redirected strategy, increasing pipeline runs by 200%.
- Championed GitOps delivery with ArgoCD, cutting rollout time from days to 30 minutes and making the platform hotfix-capable.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics platform. Deputy IT Security Officer.

- Integrated test automation into the Jenkins pipeline, introduced Dagster and dbt, and cut time per data update by ~75%.
- Carried a full UI relaunch and a large ETL migration in parallel while migrating a bare-metal system fully into containers.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into KIS workflows, reducing digital anamnesis from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, brokers, and underwriters.

- Restructured an 18-person delivery organisation into three lean teams; attrition fell from a near-total exodus to a single departure.
- Shipped the Claims Center from concept to production; cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN,
MÖNCHENGLADBACH | 09/2021-03/2022

Retail and payments, POS and forecourt systems. Full SAFe setup.

- Moved research results into production across a matrix organisation with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN |
03/2021-06/2021

Government. Secure data platform for the Robert Koch Institute (DIM and DESH).

- Owned data structures and identity management for national health reporting infrastructure.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

Health insurance. B2B e-commerce procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and ~20,000 employees; still in production.

§ FOUNDER TRACK

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN |
01/2016-12/2021

IT security. Quantum-secure encryption hardware and software.

- Shipped a three-layer product that installs in under two minutes, unblocking enterprise buyers. Later Chair of the board.

CO-FOUNDER, CDO AND CFO, SMART SOIL TECHNOLOGIES, BERLIN |
03/2018-08/2021

Nanotechnology and agriculture. Took a fertiliser product from laboratory to investor rounds.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN |
02/2013-11/2018

Fintech. Mobile group-based P2P payments product, built from zero to acquisition by Sparkasse inside the girocard ecosystem.

- Owned the full product: matching, escrow mechanics, payment flows, dispute handling, and trust model between users.

§ SKILLS

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP and PoC definition, A/B testing, user research and interviews, prototyping, go-to-market support.

Fintech and Payments: P2P payments, fintech platform design, payment flow UX, escrow mechanics, dispute resolution, trust and safety, fraud prevention, girocard ecosystem.

Web3 and Crypto: CEX/DEX mechanics, perpetual futures, AMMs, cross-chain bridging, DEX aggregation, stablecoins, crypto data analysis (Coinglass, Hyblock Capital); 8+ years as an active crypto user and trader across Hyperliquid, Bitget, Jupiter, 1inch, Across Protocol.

Analytics and Data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, SQL, Matomo, MicroStrategy.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe, ART, PI planning.

Technical Environments: Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, Python, Kotlin (Spring Boot), REST APIs, PostgreSQL, MongoDB, Kafka.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, evaluation loops, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable, n8n.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
