## § WHY OPEN INNOVATION AI

OICM sits at a layer most AI product managers never touch: the infrastructure that decides whether AI workloads actually run, at what cost, and on what hardware. The problem of hardware-agnostic orchestration across diverse accelerators is hard to frame as a product, and the posted responsibility for cost/GPU tradeoff reasoning alongside model selection and evaluation is where I have spent real time. Most platform PMs treat the infra tier as a dependency. This role asks for someone who treats it as the product. *That is the kind of scope where I do my best work.*

---

## § AI-NATIVE STACK

*Daily tools, not buzzwords.*

- **Claude Code**, in-repo specs and edge-case generation
- **GitHub Copilot**, day-to-day code review and pair programming
- **Cursor**, context-heavy refactors and codebase exploration
- **Lovable**, rapid front-end prototyping
- **GPT**, research, synthesis, and draft review
- **n8n**, agentic workflow design and automation
- **Framer**, design-heavy prototyping
- **Gamma.app**, stakeholder decks and documentation

---

## § TECHNICAL ENVIRONMENT

*Shipped with, not just listed.*

Kubernetes, OpenShift, Docker, ArgoCD, GitOps rollout and rollback, Jenkins, CI/CD, GitLab, Azure DevOps, REST APIs, Python, Kotlin with Spring Boot, Django, PostgreSQL, MongoDB, Kafka, Dagster, dbt, ETL pipelines, LLM agents and agentic workflows, prompt and context engineering, evaluation loops, EU AI Act governance, Explainable AI.

---

## § SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/hilbertp) →

*Two-sided B2B construction staffing marketplace, built zero to one as a solo founder.*

- Anonymity-until-payment model that protects both firms and workers until commitment is confirmed.
  - WhatsApp and Telegram as the product surface, with LLM agents running the full funnel so one person operates the day-to-day.
  - Funnel and conversion analysis in SQL; full lifecycle from discovery through go-to-market.
  - Directly demonstrates solo AI-native product execution: the same pattern OICM needs for fast, low-overhead agentic product delivery.
- 

## § HOW I WOULD WORK AT OPEN INNOVATION AI

*First weeks, concrete.*

### WEEK 1

**Listen, map, find the gaps.**

Shadow the engineering team on current OICM workload scheduling runs, map the actual customer workflow from job submission to result, and identify where cost-per-request and latency pain lives today.

### WEEK 2

**Frame measurable hypotheses.**

Pick the one highest-friction point uncovered in week one, write a crisp problem statement with a falsifiable success metric, and align with engineering on a rapid experiment design before sprint planning.

WEEK 3+

## Ship, measure, iterate.

Drive the first sprint cycle to a testable build, instrument the evaluation pipeline, and close the loop with customers and internal stakeholders on what the data shows.

---

## *I* COVER LETTER

Dear Open Innovation AI team,

The problem Open Innovation AI is solving, making AI workload management hardware-agnostic and operationally simple across diverse GPU and accelerator infrastructure, is one of the more underserved product challenges in the current AI landscape. Most AI PM roles sit on top of the stack: prompt, evaluate, ship a feature. OICM is the layer underneath, and owning the product strategy for an orchestration platform that enterprises depend on for cost, latency, and reliability is a different kind of responsibility. That is the work I want to do.

My 13 years of product ownership cover two things that are directly relevant here. First, I have shipped AI and data platforms in production, not as demos. At Rohde & Schwarz I owned the internal AI and data platform for the FCAS European programme, managing a cross-functional team of 15+ engineers and data scientists. Redirecting the product strategy based on actual workflow instrumentation, finding that the UI-led approach recorded zero clicks, drove a 200% increase in pipeline runs. At the Federal Employment Agency I owned an ETL-heavy national labour-market analytics platform, introduced Dagster and dbt to replace fragile hand-held imports, and saved roughly 75% of the time per data update. Both roles required translating ambiguous infrastructure decisions into clear product choices with measurable outcomes.

Second, I work directly with the AI-native stack the role describes. I design agentic workflows, write evaluation loops, think through RAG architectures and model selection tradeoffs, and use Claude Code, GitHub Copilot and Cursor as daily tools rather than occasional aids. My background in Kubernetes, ArgoCD, and GitOps delivery means I can sit with your engineering team at the architecture level, not just relay requirements from a distance.

The skills and experience required in the posting, LLMs and foundation models, RAG pipelines, agents and orchestration frameworks, cost optimisation across tokens and GPU infra, experiment design, evaluation and guardrails, match my current practice closely. I am also familiar with AI governance requirements including the EU AI Act, which matters for enterprise customers who need to justify workload decisions to their compliance teams.

I would be glad to talk through any of this in more detail. I am available at four weeks' notice and open to a remote arrangement.

Best regards, *Philipp Hilbert*

---

## II CURRICULUM VITAE

---

### § PROFILE

Product manager and product owner with 13 years of product ownership, specialising in AI and data platform products, DevOps-heavy delivery, and regulated enterprise software. I run continuous discovery, turn strategy, user needs and technical constraints into requirements and a prioritised roadmap, and lead cross-functional teams through agile delivery (Scrum, Kanban, SAFe).

---

### § HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
  - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
  - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
  - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
- 

### § WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

*Defence and aerospace. Internal AI and data platform for the FCAS European programme.*

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design, after instrumenting two competing workflows.
- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes across multinational teams.

- Led a cross-functional team of 15+ engineers and data scientists through sprint planning in Jira and Confluence on a platform requiring continuous transform of raw data into usable AI inputs.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023 - 07/2024

*Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.*

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers, enabling team autonomy over environments, while carrying a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

*Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.*

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis dropped from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

*Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.*

- Restructured an 18-person delivery organisation into three lean teams with their own leads: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production; cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

- Retail and payments, POS and forecourt systems. Moved research results into production in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 - 06/2021

- Government, secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

- Health insurance, B2B procurement webshop. Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

PROJECT LEAD, ENERCON, WISMAR / MAGDEBURG | 04/2019 - 12/2019

- Wind energy, full site IT modernisation end to end.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017 - 06/2018

- Healthcare, clinical network. Wifi infrastructure rollout across nine hospitals.

---

## § FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - PRESENT

- Construction staffing B2B marketplace. Built zero to one alone: LLM agents across the funnel, WhatsApp and Telegram as product surface, funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

- IT security, quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes for enterprise buyers. Later Chair of the board.

CO-FOUNDER, CDO AND CFO, SMART SOIL TECHNOLOGIES, BERLIN | 03/2018 - 08/2021

- Nanotechnology and agriculture. Took a fertiliser product from laboratory to investor rounds, owning financial planning and investor reporting.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

- Fintech, mobile group-based P2P payments. Built from zero to acquisition by Sparkasse, inside the girocard ecosystem.

---

## § SKILLS

**AI Products and Tooling:** LLM (large language model) agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); prototyping with Claude Code, GitHub Copilot, Cursor and Lovable.

**Product Management:** continuous discovery, product vision and product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

**Product Ownership:** requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, story-point estimation, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

**Agile and Scaled Delivery:** Scrum, Kanban, SAgile (Scaled Agile Framework), ART (agile release train), PI planning.

**Technical Environments Owned:** Kubernetes (K8s), OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin (Spring Boot), Django, SQL, PostgreSQL, MongoDB, Kafka.

**Analytics and Data:** ETL (extract, transform, load), Dagster, dbt (data build tool), PostgreSQL, funnel and churn analysis, KPI definition, Matomo, MicroStrategy.

**Governance and Business:** GDPR, Deputy IT Security Officer, identity management, budget ownership and financial planning as CFO, ROI reasoning.

---

## § EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.

---

## § LANGUAGES

German (native speaker, C2) · English (C2, business and technical fluency)
