

Philipp Hilbert. *Lead Product Manager, AI-powered enterprise search.*

Positioning, 13 years owning regulated-industry products end to end, with hands-on AI tooling and enterprise search experience that maps directly to Hyland's platform direction.

§ WHY HYLAND

Hyland builds content and process infrastructure for industries where getting it wrong has real consequences. The focus on AI-powered search, retrieval-augmented generation (RAG), and agent-based workflows in this role matches the exact stack I worked with at Rohde & Schwarz on the FCAS data platform and at the Bundesagentur für Arbeit on a national analytics platform. The line in the posting about "AI evaluation, feedback loops, and learning systems" is not a vague aspiration here, Hyland ships these to healthcare, insurance, and government customers. *That is the kind of product surface where careful, evidence-driven discovery actually matters.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo specs and refactors
- **GitHub Copilot**, paired coding and review
- **Cursor**, context-heavy editing
- **Lovable**, rapid UI prototyping
- **GPT**, research and drafting
- **n8n**, agentic workflow design
- **Framer**, lightweight interaction mockups

- **Gamma.app**, stakeholder decks

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps rollout and rollback, Jenkins, CI/CD pipelines, Dagster, dbt, PostgreSQL, MongoDB, Kafka, REST APIs, Python, Kotlin with Spring Boot, Django, Azure DevOps, GitLab, LLM agents and agentic workflows with prompt and context engineering, evaluation loops, and human-in-the-loop design.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace for construction staffing, built solo from zero.

- Matches construction firms with workers, removing the headhunter from the hiring loop.
- LLM agents across the full funnel so one person runs the day-to-day operation.
- WhatsApp and Telegram as the product surface; anonymity-until-payment model protects both sides.
- Funnel and conversion analysis in SQL, which directly parallels the data-driven decision loop Hyland needs on its search products.

§ HOW I WOULD WORK AT HYLAND

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow sales, solution engineering, and at least two customer calls to understand where the current AI-powered search and RAG workflows break down before touching the roadmap.

WEEK 2

Audit and hypothesise.

Map the existing roadmap against the customer evidence I collected, flag the assumptions that lack validation, and bring a first view of the gaps to the team.

WEEK 3 +

Ship the first slice.

Pick the highest-confidence, customer-backed item and drive it through requirements, engineering alignment, and launch, establishing the rhythm for everything that follows.

I COVER LETTER

Dear Hyland team,

Hyland's products sit in the part of the enterprise stack where a wrong result has real consequences. Healthcare providers, insurers, and government agencies rely on the kind of content intelligence Hyland is building to make decisions that affect people directly. That context matters to how I think about AI product management, reliability and explainability are not nice-to-haves, they are table stakes.

My 13 years of product ownership span several of the regulated industries Hyland serves. At the Bundesagentur für Arbeit I owned a national labour-market analytics platform, introduced Dagster and dbt to replace manual ETL steps, and served as Deputy IT Security Officer, a role that put compliance and data governance at the centre of every product decision. At Rohde & Schwarz I led the AI and data platform for the FCAS European defence programme, working with a cross-functional team of 15 engineers and data scientists, and redirecting strategy based on instrumented workflow analysis that showed the UI-led approach was getting exactly zero usage.

The retrieval, enrichment, and agent-based workflow requirements in this posting map closely to work I have done. I have designed agentic workflows using n8n and LLM agents, set up evaluation and feedback loops for AI outputs, and built discovery processes around the distinction between what users ask for and what they actually do. I approach AI product evaluation the same way I approached the FCAS pipeline: instrument both paths, let usage data settle the argument.

On the go-to-market side, I have worked alongside sales and solution engineering teams on demos, release narratives, and customer-facing content, most directly at EMIL Group, where I shipped the Claims Center and cut time-to-market for a new insurance product from months to under a week. I understand that the product voice needs to be consistent across engineering sprints, customer pilots, and sales conversations, not just inside the roadmap document.

I would bring to Hyland a product practice built on direct customer discovery, technical depth across the AI and data stack, and a track record in regulated environments where getting the requirements wrong is expensive.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in regulated industries, insurance, healthcare, public sector, and defence AI. I run continuous discovery, translate strategy and user evidence into a prioritised roadmap, and lead cross-functional teams through agile delivery. Experience with AI-powered products, data platforms, and enterprise software spans the full product lifecycle management from ideation through launch and iteration.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

LEAD PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Redirected product strategy based on instrumented workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.
- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes and making the platform hotfix-capable.
- Managed a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL
EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023-07/2024

*Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT
Security Officer.*

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers, carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis dropped from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Shipped the Claims Center from concept to production with no precedent.
- Cut time-to-market for a new insurance product from months to under a week.
- Restructured an 18-person delivery organisation into three lean teams: attrition fell from near-total exodus to a single departure.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL &
CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021-03/2022

Retail and payments, POS and forecourt systems.

- Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN |
03/2021-06/2021

Government, secure data platform.

- Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

Health insurance. B2B procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.
-

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025-PRESENT

Construction staffing, two-sided B2B marketplace.

- Built zero to one solo: LLM agents across the funnel, anonymity-until-payment model, WhatsApp and Telegram as the product surface, funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016-12/2021

IT security, quantum-secure encryption hardware and software.

- Shipped a three-layer product that installs in under two minutes to meet enterprise buyer constraints. Later Chair of the board.

CO-FOUNDER, CDO AND CFO, SMART SOIL TECHNOLOGIES, BERLIN | 03/2018-08/2021

- Took a nanotechnology fertiliser product from laboratory to investor rounds, owning financial planning and investor reporting.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013-11/2018

Fintech, mobile P2P payments.

- Built from zero to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.
-

§ SKILLS

Product Management: continuous discovery, product vision and product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); full prototyping with Claude Code, GitHub Copilot, Cursor and Lovable.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe, ART, PI planning.

Analytics and data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy.

Technical Environments: Kubernetes, OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, REST APIs, Python, Kotlin, Django, PostgreSQL, MongoDB, Kafka.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

Regulated Domains: insurance, healthcare, public sector, defence, government data platforms.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
