PROFILE

Product Manager and Product Owner with 13 years of product ownership in regulated industries, insurance, healthcare, public sector, and defence AI. I run continuous discovery, translate strategy and user evidence into a prioritised roadmap, and lead cross-functional teams through agile delivery. Experience with AI-powered products, data platforms, and enterprise software spans the full product lifecycle management from ideation through launch and iteration.

HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
- On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
- Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
- I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.

- Redirected product strategy based on instrumented workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.
