PROFILE

Product Manager and Product Owner with 13 years of product ownership across fintech, payments, SaaS, insurance, and public-sector analytics. I founded Kvitt Payment Solutions, a mobile P2P fintech acquired and operated by Sparkasse inside the girocard ecosystem, and have owned payment integration, gateway, and checkout products across multiple roles. I run continuous discovery, translate strategy and user needs into prioritised roadmaps, and lead cross-functional teams through agile delivery.

HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
- On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
- Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
- I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
