

Philipp Hilbert. *Product Manager, fintech and B2B SaaS.*

Positioning, thirteen years owning products end-to-end across fintech, insurance, and B2B SaaS, now focused on spend-management platforms where speed and trust are both product features.

§ WHY QASHIO

Qashio operates at the intersection I find most interesting: corporate spend infrastructure in a market still running on manual workflows and disconnected tools. The posting calls out expense management and accounting system depth as a real requirement, not a checkbox, and that specificity signals a team that knows what breaks in production. Your focus on customer-facing PM work, representing Qashio directly in client conversations, matches the discovery-first practice I have built over thirteen years. *That combination of technical rigour and direct customer ownership is exactly the environment where my strengths compound.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and edge-case generation
- **GitHub Copilot**, accelerated requirements drafting
- **Lovable**, rapid front-end prototyping
- **Cursor**, codebase-level refactors
- **Framer**, design-heavy wireframes
- **Gamma.app**, stakeholder decks and roadmap presentations
- **GPT**, discovery synthesis and user-research summarisation
- **n8n**, agentic workflow automation

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, Kotlin (Spring Boot), Django, JavaScript, PostgreSQL, MongoDB, REST APIs, Kafka, Kubernetes, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Git, GitLab, Azure DevOps, Dagster, dbt, Jira, Confluence, Figma, Miro, Shopware.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with skilled workers, built and operated solo.

- Anonymity-until-payment model that protects both sides until commitment is confirmed.
 - WhatsApp and Telegram as the primary product surface, with LLM agents covering intake, matching, and follow-up across the funnel.
 - Funnel and conversion analysis in SQL; one person runs the full day-to-day operation.
 - Directly relevant: demonstrates zero-to-one B2B SaaS product instinct and agentic product design, both cited in Qashio's posting.
-

§ HOW I WOULD WORK AT QASHIO

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow customer-facing workflows, read open Jira tickets and sprint history, and map the expense submission and approval flow end to end so I understand where the product actually breaks versus where the roadmap thinks it breaks.

WEEK 2

Prioritise and slice.

Run a prioritisation session with the Tech team against the backlog, apply a value-feasibility-risk frame, and produce a candidate sprint plan with acceptance criteria ready to write.

WEEK 3 +

Ship and close loops.

Carry the first scoped items through sprint ceremonies, represent Qashio in at least one customer call, and establish a lightweight OKR check-in cadence so roadmap progress stays visible to stakeholders.

I COVER LETTER

Dear Qashio hiring team,

Expense management platforms live or die on trust: the finance team has to trust that the data is accurate, the card-holder has to trust that the workflow does not slow them down, and the engineering team has to trust that the product manager knows what they are asking for. Building that trust across all three layers simultaneously is the work I have spent thirteen years doing in B2B SaaS and fintech environments, and it is the reason Qashio's posting caught my attention.

At Kvitt Payment Solutions, which I co-founded and took to acquisition by Sparkasse inside the girocard ecosystem, I owned the full product lifecycle of a mobile P2P payment product from zero to handover. That experience gave me an unusually complete view of payment flows, PSP edge cases, and the compliance constraints that sit underneath any consumer-facing fintech product. More recently, at EMIL Group, a B2B SaaS platform for insurers and reinsurers, I rebuilt a delivery organisation that was losing its senior engineers and its client trust simultaneously, restructured it into three focused teams, and shipped the Claims Center from concept to production in a heavily regulated context. The mechanics there (stakeholder alignment, backlog discipline, sprint cadence, go-to-market coordination) map directly onto what your posting describes.

Your qualification list mentions accounting and expense management system familiarity as a genuine differentiator, and I want to be direct about where I stand: I have not shipped a corporate card or ERP integration product. I have, however, owned procurement workflow products at AOK ITSCare, payment architecture at Kvitt, and analytics platforms that sit downstream of financial data at Bundesagentur für Arbeit. The domain is adjacent and the gaps are learnable; the product mechanics, discovery, prioritisation, cross-functional delivery, customer representation, are fully transferable.

On the technical side: I have led engineering teams through GitOps rollouts, instrumented competing workflows to make data-driven strategy calls, and integrated Dagster and dbt pipelines to replace manual data operations. I am comfortable in Jira, in sprint ceremonies, in Confluence-based requirements documentation, and in direct customer conversations. Your expectation that the Product Manager represents Qashio face-to-face with clients is not a stretch for me, it is the part of the role I find most valuable.

I would welcome a conversation about where Qashio's product is heading and where the sharpest gaps are right now.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Manager with thirteen years of product ownership across fintech, B2B SaaS, insurance, public-sector analytics, and defence AI. I run continuous discovery, translate strategy and user needs into prioritised roadmaps, and lead cross-functional teams through agile delivery. My track record covers full product lifecycle management, from market validation through go-to-market, in regulated, technically complex environments where both speed and audit-readiness matter.

§ WHAT I CAN DO

Product Management: continuous discovery, product vision and product roadmap, Objectives and Key Results (OKRs), prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support, backlog refinement, sprint planning, velocity and burndown, release planning, UAT.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning, Jira, Confluence, Figma, Miro.

Fintech and Payments: P2P payment product design, PSP integration, girocard ecosystem, procurement workflow, expense and data platform product ownership.

SaaS B2B Delivery: requirements engineering, user stories, acceptance criteria, definition of done, cross-functional team leadership, stakeholder management, C-level reporting, workshop facilitation.

Technical Environments: Kubernetes, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin, Django, PostgreSQL, MongoDB, Kafka, Dagster, dbt, Shopware.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, human-in-the-loop design, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA PLATFORM 2024-2025

GitOps rollout with ArgoCD cut deployment time from days to 30 minutes; pipeline runs up 200% after redirecting strategy to developer-code-first. Led 15+ engineers and data scientists through Scrum in Jira and Confluence on the FCAS European programme.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

Introduced Dagster and dbt, saving ~75% of time per data update; migrated bare-metal to containers; full UI relaunch and ETL migration delivered in parallel. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut roadmap to top 10% of features; user acceptance rose fivefold. Integrated CGM/KIS interface, reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · B2B SAAS INSURANCE PLATFORM 2022

Restructured 18-person delivery into three lean teams; attrition fell to one departure. Shipped Claims Center concept to production; cut new insurance product time-to-market from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL AND PAYMENTS POS 2021-2022

Moved research results into production in a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT SECURE DATA PLATFORM 2021

Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE B2B SAAS 2019-2020

Migrated legacy procurement system to Shopware for three AOK insurers and ~20,000 employees; still in production. Backlog refinement, user stories, acceptance criteria in Jira.

ENERCON · PROJECT LEAD · WIND ENERGY SITE IT 2019

Full site IT modernisation end to end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE CLINICAL NETWORK 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION B2B MARKETPLACE 2025-PRESENT

Zero to one alone: two-sided B2B SaaS marketplace, LLM agents across the funnel, SQL-based funnel and conversion analysis.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE ENCRYPTION 2016-2021

Owned backup, restore, and data-encryption product architecture; shipped a three-layer product installing in under two minutes for enterprise buyers. Later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · NANOTECHNOLOGY AND AGRICULTURE 2018-2021

Laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P PAYMENTS 2013-2018

Built from zero to acquisition by Sparkasse inside the girocard ecosystem.

§ LANGUAGES

German, native (C2). English, C2, business and technical fluency.
