

Philipp Hilbert. *Product Manager, investment lifecycle platform.*

Positioning, Thirteen years owning regulated B2B SaaS products end to end, now applying that depth to AI-powered investment workflows at enterprise scale.

§ WHY INCEPTION42

Inception42 sits at the intersection of frontier AI capability and real-world institutional deployment, a combination most AI companies only approximate. The InAlpha brief is specific and honest about its complexity: four interdependent modules, enterprise procurement conditions, and clients who need to defend every artefact in an investment committee. That is not a vague "AI platform play"; it is a structured product problem with measurable outcomes. What draws me in particular is the explicit mandate to build one coherent platform rather than four separately conceived tools, that cross-module coherence challenge is where product management earns its keep. *That is exactly the kind of problem where disciplined prioritisation and clear requirements craft create durable competitive advantage.*

§ HONEST FRAMING

The posting asks for working knowledge of the private capital deal lifecycle, sourcing, diligence, IC, and portfolio monitoring as practised by institutional investors. I have not shipped a product inside a private equity or VC firm. What I bring instead is a strong record of absorbing complex professional workflows quickly, clinical, defence, and insurance domains each required the same discipline of structured discovery with domain experts before writing a single requirement. That transferable mechanic, combined with direct client discovery, is how I close the gap fast.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, continuous coding assistance
- **Cursor**, AI-assisted development environment
- **Lovable**, rapid front-end prototyping
- **GPT**, requirements drafting and edge-case generation
- **n8n**, agentic workflow automation
- **Gamma.app**, product narrative and stakeholder decks
- **Framer**, design-heavy prototyping

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, REST APIs, Kubernetes, OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, Dagster, dbt, Kafka, Django, SQL, Git.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built to zero-to-one solo.

- Anonymity-until-payment model protecting both sides until commitment; WhatsApp and Telegram as the product surface.
- LLM agents across the funnel so a single operator runs day-to-day matching and outreach.
- Funnel and conversion analysis in SQL; product loop instrumented from first contact to hire.
- Demonstrates end-to-end product delivery under full ownership, the same accountability model InAlpha requires across its four modules.

§ HOW I WOULD WORK AT INCEPTION42

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow client sessions and engineering standups, map the current state of each module's backlog against actual client workflows, and identify the three most expensive ambiguities blocking delivery.

WEEK 2

Surface the dependencies.

Draft the first cross-module dependency map, walk it with engineering leads and the AI team, and expose the sequencing decisions that have been implicit so they can be made explicitly.

WEEK 3 +

Ship and instrument.

Agree acceptance criteria and instrumentation for the first significant cross-module capability, lock scope with engineering, and establish the release cadence and adoption metrics that will make progress legible to leadership.

I COVER LETTER

Dear Inception42 Hiring Team,

I am applying for the Product Manager role on InAlpha. The brief resonates with me because it names the hard part directly: owning the roadmap across sourcing and screening, due diligence, investment committee, and portfolio monitoring as one coherent platform, not four separate backlogs. That is a requirements and sequencing problem as much as it is a domain problem, and structured product management is where I spend my working days.

My most relevant parallel is at Rohde & Schwarz, where I owned the internal AI and data platform for the FCAS European defence programme, a cross-functional team of fifteen engineers and data scientists, multinational stakeholders, and a platform that had to meet rigorous security, auditability, and access control conditions before any of the partner nations would accept it. I instrumented competing delivery workflows, redirected strategy based on the evidence, and cut rollout time from days to thirty minutes through GitOps with ArgoCD. The discipline of converting complex professional workflows into prioritised, measurable product requirements under genuine constraint is directly transferable to InAlpha's investment lifecycle context.

At the Bundesagentur für Arbeit I owned a national labour-market analytics platform serving policymakers and researchers, a B2B SaaS data platform with enterprise procurement conditions, regulated data handling, and a user base that could not afford workflow disruption. I

integrated ETL automation with Dagster and dbt, reducing time per data update by 75%, and migrated the system from bare metal into containers while carrying a full UI relaunch in parallel. That kind of operational complexity, where data quality and platform reliability are procurement conditions, maps directly onto what institutional investors need from a due diligence and portfolio monitoring tool.

On the AI product side, I have defined expected behavior for AI-driven features in production environments, including grounding, citation handling, and failure modes where source material is incomplete. At CLINET Platforms I owned a mobile patient application where the integration into hospital information systems had to be both accurate and auditable; at Qcrypt AG I owned a quantum-secure encryption product where the security properties had to be verifiable, not assumed. Both sharpened my instinct for the difference between features that work in demos and features that hold under institutional scrutiny.

The InAlpha role asks for someone who can bring commercial reasoning into prioritisation, weighing pipeline impact, renewal risk, and delivery cost alongside user value. I have done this from both the product and the founder side: Kvitt Payment Solutions was acquired by Sparkasse and integrated into the girocard ecosystem, which required connecting product decisions to commercial outcomes at every stage. I am ready to relocate to Abu Dhabi and contribute from day one in an execution-focused environment.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Manager with 13 years owning regulated B2B SaaS and data platform products end to end, defence AI, public-sector analytics, insurance, healthcare, and fintech. Consistent track record of absorbing complex professional workflows, converting them into clear requirements with acceptance criteria and edge cases, and leading cross-functional engineering, AI, and design teams through structured delivery under real constraint. Available to relocate to Abu Dhabi; EU citizen.

§ WHAT I CAN DO

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); full prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

Product Management: continuous discovery, product vision, platform roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support, acceptance criteria, SaaS product delivery.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, story-point estimation, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Analytics and Data: KPI definition, funnel and churn analysis, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning, GitOps rollout and rollback, CI/CD, regression and end-to-end test automation, same-day hotfix paths.

Technical Environments: Kubernetes, OpenShift, Docker, ArgoCD, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin, Django, SQL, PostgreSQL, MongoDB, Kafka.

Stakeholder and Leadership: cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, regulated and enterprise procurement environments.

Governance: GDPR, Deputy IT Security Officer, identity management, data residency, access control, auditability.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA PLATFORM 2024-2025

Cross-functional team of 15+ engineers and data scientists. Delivered GitOps rollout with ArgoCD reducing deploy time from days to 30 minutes; redirected strategy from UI-led to developer-code-first based on instrumented workflow evidence, increasing pipeline runs 200%. Internal AI and data platform for the FCAS European programme; Scrum in Jira and Confluence.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS PLATFORM 2023-2024

National labour-market B2B SaaS platform for policymakers and researchers. Deputy IT Security Officer. Integrated Dagster and dbt, saving 75% time per data update; migrated bare-

metal to containers; carried full UI relaunch and large ETL migration in parallel. Regulated data handling and enterprise access control throughout.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Mobile patient app for iOS and Android piloted in hospitals. Cut roadmap to top 10% of features; user acceptance rose fivefold. Implemented CGM interface into KIS workflows, reducing digital anamnesis time from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · B2B SAAS INSURANCE PLATFORM 2022

Regulated B2B SaaS platform for insurers, reinsurers, and brokers. Restructured 18-person delivery org into three lean teams; shipped Claims Center from concept to production; cut new-product launch time from months to under one week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL PAYMENTS PLATFORM 2021-2022

POS and forecourt systems. Moved research into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE GOVERNMENT DATA PLATFORM 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · B2B SAAS PROCUREMENT PLATFORM 2019-2020

Migrated legacy system to Shopware for three AOK insurers and ~20,000 employees; still in production. Backlog refinement, user stories, acceptance criteria in Jira.

ENERCON · PROJECT LEAD · SITE IT MODERNISATION 2019

Wind energy, full-site IT modernisation end to end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL INFRASTRUCTURE 2017-2018

Healthcare clinical network; wifi rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · B2B MARKETPLACE 2025-PRESENT

Construction staffing marketplace, zero to one solo. LLM agents across the funnel; anonymity-until-payment model; SQL-instrumented funnel analysis.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE ENCRYPTION 2016-2021

IT security hardware and software. Shipped three-layer product installing in under two minutes for enterprise buyers. Later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · NANOTECHNOLOGY 2018-2021

Fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P PAYMENTS 2013-2018

Mobile group-based P2P payments, built from zero to acquisition by Sparkasse inside the girocard ecosystem.
