

Philipp Hilbert. *Digital Product Delivery Manager, mobile app specialist with 13 years in agile delivery.*

Positioning, Consumer mobile app delivery leader who closes the loop between guest insight, engineering, and store submissions, reliably, sprint by sprint.

§ WHY MIRAL DESTINATIONS

Miral is building the connected guest experience infrastructure for Yas Island, a platform that has to work in the moment a guest is standing at the gate, deciding what to do next. That's a different kind of product pressure than typical e-commerce: the booking flow, the real-time park operations, and the push notification all have to land together. The job description names Firebase, AppsFlyer and App Store release management in the same breath as stakeholder alignment and sprint delivery, which is exactly the combination I've run before, at CLINET Platforms, shipping a clinical mobile app for iOS and Android on a five-person team under hospital-integration constraints. *That is the kind of delivery environment where precision on the small things, version tags, acceptance criteria, hotfix paths, is what separates a good quarter from a scramble.*

§ HONEST FRAMING

I have not shipped a consumer leisure or destination app specifically; my mobile delivery experience is in a clinical-grade patient app. The core mechanics, backlog ownership, App Store and Play Store submissions, release gating, analytics instrumentation, transfer directly. The guest-facing context at Miral is new territory I will close quickly by spending week one listening to park operations and guest-experience teams before proposing anything.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code** : in-repo refactors, spec generation, edge-case coverage
 - **GitHub Copilot** : PR review, boilerplate elimination
 - **Cursor / VSCode** : daily development and scripting environment
 - **Lovable** : rapid front-end prototyping for stakeholder demos
 - **Framer** : design-heavy wireframes and interactive prototypes
 - **GPT** : structured discovery notes, interview synthesis
 - **n8n** : agentic workflow automation for repetitive ops
 - **Gamma.app** : stakeholder presentation and release decks
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Jira, Confluence, Figma, Miro for day-to-day delivery; Firebase and GA4 for funnel and retention instrumentation; REST APIs, PostgreSQL, MongoDB for back-end data work; Kotlin (Spring Boot) and Python for prototype scripting; Git, GitLab, Azure DevOps, Jenkins, ArgoCD for release and GitOps pipelines; Kubernetes, Docker, OpenShift for containerised environments; Dagster, dbt for ETL and data platform delivery; Matomo, MicroStrategy for analytics reporting.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built zero to one, solo.

- Anonymity-until-payment model that protects both sides of the market until commitment is confirmed.
- WhatsApp and Telegram as the primary product surface, LLM agents running the funnel end-to-end.
- Funnel and conversion analysis in SQL; one operator (me) running the full day-to-day.
- Demonstrates mobile-first delivery instinct and willingness to own the full stack when the team is lean, relevant for a delivery manager who needs to cover ground fast.

§ HOW I WOULD WORK AT MIRAL DESTINATIONS

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the scrum team's ceremonies, read the backlog and release history, and map every dependency between the mobile app, the ticketing platform, and park-ops, so I know where the real blockers live before touching priorities.

WEEK 2

Tighten the stories.

Audit the top of the backlog for acceptance criteria gaps and App Store submission blockers, and close those gaps with engineering leads and UX so sprint 3 can ship without rework.

WEEK 3+

Ship, measure, repeat.

Own the first release cycle end to end, planning, stand-ups, review, retro, store submission, and set up a Firebase dashboard so the team can see guest impact within 48 hours of going live.

I COVER LETTER

Dear Hiring Team at Miral Destinations,

Yas Island's ambition is to be a destination that guests return to, not just visit once. The mobile app is the connective tissue for that ambition: it has to hold bookings, surface real-time park information, and create moments that turn a first visit into a habit. That is a delivery problem before it is a design problem, and delivery is where I spend my time.

I have been owning product backlogs and running agile ceremonies for thirteen years across regulated and complex environments, defence AI platforms, public-sector analytics, insurance SaaS, healthcare mobile apps, and fintech. At CLINET Platforms I took a clinical iOS and Android patient app with a five-person team and a roadmap nobody could deliver, cut it to the features that moved the agreed metrics, and got user acceptance up more than fivefold in a single cycle. At Rohde & Schwarz I ran a cross-functional team of fifteen engineers and data scientists through Scrum in Jira and Confluence, shipping a platform that went from days-long rollout cycles to thirty-minute GitOps deployments. The pattern in both cases was the same: clear user

stories, acceptance criteria engineering can build against without ambiguity, and sprint discipline that keeps stakeholders informed rather than surprised.

The Miral posting calls out App Store and Play Store submissions, release version management, bug triage and hotfix coordination alongside Firebase, GA4 and AppsFlyer analytics, and comfortable stakeholder management across marketing, ops, engineering and external vendors. That exact combination is what I ran at CLINET, where hospital information-system integrations, clinical compliance, and a tight release cadence all had to coexist. I am comfortable with the operational side of mobile delivery because I have lived it as the person who had to write the release notes, file the store submission, and explain the delay to the clinical sponsor in the same week.

At Scheidt & Bachmann I worked inside a fully structured SAFe environment, agile release trains, PI planning, the whole framework, which maps directly to the formal agile certification the posting requires. I hold a PSPO and have run the ceremonies, not just attended them.

What draws me specifically to Miral is the scale and integration complexity: a guest app that has to coordinate ticketing, bookings, loyalty, and real-time park operations across a multi-brand destination is a genuinely interesting delivery problem. The constraint of making it feel effortless on a guest's phone while the back-end spans multiple platforms is exactly the kind of challenge I do my best work on. I would be glad to talk through how I would approach the first sprint cycle and the App Store release pipeline in a conversation.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager and product owner with 13 years of backlog ownership, sprint delivery, and agile ceremony leadership across mobile apps, regulated platforms, and multi-team SaaS. Currently based in Berlin; willing to relocate to Abu Dhabi or Dubai. Strong in turning strategy into shippable user stories, managing App Store and Play Store release cycles, and using analytics, Firebase, GA4, and equivalents, to close the loop between what ships and what guests actually do.

§ WHAT I CAN DO

Agile and Scaled Delivery: Scrum, Kanban, SAgile (Scaled Agile Framework), sprint planning, agile release train, PI planning, backlog refinement, velocity and burndown, story-point estimation

Product Ownership: user stories, acceptance criteria, definition of done, epics, prioritisation, release planning, UAT, Jira, Confluence, Figma, Miro

Mobile App Delivery: iOS and Android lifecycle, App Store and Play Store submissions, version management, hotfix coordination, bug triage, release gating

Analytics and Data: Firebase, GA4, Matomo, MicroStrategy, AppsFlyer-class attribution, KPI definition, funnel and churn analysis, ETL, Dagster, dbt, PostgreSQL

Product Management: continuous discovery, product roadmap, MVP definition, A/B testing, user research, prototyping, go-to-market support, platform product ownership

E-commerce and Marketplace: Shopware webshop delivery, two-sided marketplace architecture, booking and ticketing flow design

Stakeholder and Leadership: cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management, external vendor coordination

Technical Environments Owned: Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin, SQL, PostgreSQL, MongoDB

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, EU AI Act, Explainable AI; Claude Code, GitHub Copilot, Cursor, Lovable

§ PROFESSIONAL EXPERIENCE

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

iOS and Android patient app for hospitals. Cut roadmap to top 10% of features against agreed success measures; user acceptance rose fivefold. Shipped CGM/KIS integration: digital anamnesis time dropped from 30 minutes to 5.

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI PLATFORM 2024-2025

Internal AI and data platform for the FCAS programme, 15+ engineers and data scientists. GitOps rollout with ArgoCD cut deployment time from days to 30 minutes; workflow prioritisation drove a 200% increase in pipeline runs.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR
ANALYTICS 2023-2024

National labour-market analytics platform. Introduced Dagster and dbt, saving 75% of time per data update; migrated bare-metal to containers; delivered full UI relaunch and ETL migration. Deputy IT Security Officer.

EMIL GROUP · PRODUCT MANAGER · INSURANCE SAAS 2022

B2B platform for insurers and underwriters. Restructured 18-person delivery org into three lean teams; attrition fell from near-total to one departure. Shipped Claims Center from concept to production; cut new-product launch from months to under one week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL AND PAYMENTS
2021-2022

POS and forecourt systems. Moved research to production in a fully SAFe environment with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA
PLATFORM 2021

Secure data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE E-
COMMERCE 2019-2020

Migrated legacy procurement system to Shopware for three AOK insurers and 20,000 employees. Backlog refinement, user stories and acceptance criteria in Jira; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY IT 2019

Full site IT modernisation end to end across two facilities.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE
INFRASTRUCTURE 2017-2018

Wifi rollout across nine hospitals in a clinical network.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION
MARKETPLACE 2025-2026

Zero-to-one two-sided B2B marketplace; LLM agents across the funnel; SQL-based funnel and conversion analysis.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY 2016-2021

Quantum-secure encryption hardware and software. Shipped a three-layer product with sub-two-minute installation for enterprise buyers. Later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · AGRITECH 2018-2021

Nanotechnology fertiliser product from lab to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P PAYMENTS 2013-2018

Mobile group-based P2P payment app; built from zero, acquired by Sparkasse, operated inside the girocard ecosystem.
