

Philipp Hilbert. *Product Manager, Crypto & Digital Asset Platforms.*

Positioning, 13 years shipping regulated digital products, now bringing that execution rigour to Bybit's high-velocity, cross-functional product environment.

§ WHY BYBIT

Bybit operates at a scale, 70 million registered users, multilingual markets, institutional and retail on the same platform, where product decisions have measurable consequences within hours of shipping, not quarters. The posting explicitly calls for someone who can challenge business requests with data and drive initiatives from ambiguity to execution across engineering, data, design, and operations simultaneously. That is the exact operating mode I have run in at Rohde & Schwarz, EMIL Group, and the Bundesagentur für Arbeit, where cross-functional delivery under real constraints was the daily condition, not an aspiration. What draws me specifically here is Bybit's stated commitment to a fairer trading environment backed by best-in-class infrastructure, a product belief, not just a marketing line. *That kind of infrastructure-first, user-centric conviction is exactly the environment where my strengths compound.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec generation and edge-case exploration
- **GitHub Copilot**, accelerated requirements drafting and test scaffolding
- **Cursor**, context-aware code review and technical deep-dives
- **Lovable**, rapid UI prototyping before engineering commits
- **GPT**, stakeholder briefing drafts and discovery synthesis
- **n8n**, agentic workflow automation and pipeline orchestration
- **Gamma.app**, executive reporting and leadership presentations

- **Framer**, interactive concept mockups for user testing

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps rollout and rollback, Jenkins, CI/CD pipelines, GitLab, Azure DevOps, REST APIs, Dagster, dbt, PostgreSQL, MongoDB, Kafka, Python, Kotlin (Spring Boot), Django, SQL, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B staffing marketplace built solo from zero to one, with LLM agents running the funnel.

- Anonymity-until-payment model protecting both sides of the marketplace until commitment is confirmed.
- WhatsApp and Telegram as the primary product surface; no app install required for either party.
- LLM agents handle screening, matching, and follow-up so one person operates the full day-to-day.
- Directly applicable to Bybit: funnel analysis in SQL, conversion instrumentation, and agentic workflow design at production scale.

§ HOW I WOULD WORK AT BYBIT

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the key cross-functional touchpoints, engineering standups, data reviews, stakeholder syncs, and map the current MRD/PRD lifecycle to locate where requirements lose fidelity between business request and engineering ticket.

WEEK 2

Audit, align, sharpen.

Pick one live initiative, stress-test its success metrics against real business outcomes, and surface any acceptance criteria that are ambiguous enough to cause rework downstream.

WEEK 3+

Own, ship, measure.

Take full ownership of a defined initiative: drive it through development, coordinate launch readiness across operations and marketing, and run the post-launch analysis to close the feedback loop.

I COVER LETTER

Dear Bybit Hiring Team,

I am applying for the Product Manager role at Bybit. With 13 years of product ownership across regulated, high-complexity environments, defence AI, public-sector analytics, insurance, fintech, and healthcare, I have spent my career doing precisely what this posting describes: translating ambiguous business problems into clear, scalable product solutions and driving them through cross-functional teams to measurable outcomes.

My crypto engagement runs deeper than most PM candidates can honestly claim. I actively trade and manage positions across CEX and DEX venues including Hyperliquid, Bitget, Jupiter, and 1inch, working with perpetual futures, spot markets, DEX aggregation, and cross-chain bridging on a daily basis. I analyse market microstructure using liquidation heatmaps and platforms such as Coinglass and Hyblock Capital, and I am building my own backtesting engine and algorithmic trading tools. I understand the infrastructure layer, stablecoins, custody, exchange connectivity, execution quality, not just the price action. That means I can write product requirements for Bybit's trading and platform features from the perspective of an informed power user, not a generalist approximating the domain.

On the execution side, I have owned the full product lifecycle in environments that are directly analogous to Bybit's. At Rohde & Schwarz I led an AI and data platform serving multinational engineering teams, managing 15+ engineers and data scientists through Scrum, cutting rollout time from days to 30 minutes via GitOps, and redirecting strategy mid-cycle based on instrumented workflow data. At the Bundesagentur für Arbeit I owned a national analytics platform as a one-person PM function, migrated the system to containers, and reduced data update time by 75% by introducing Dagster and dbt. Both roles required the same skills Bybit lists: writing and owning MRDs and PRDs, defining success metrics up front, managing

dependencies and stakeholder expectations simultaneously, and reporting clearly to leadership when priorities needed to shift.

I am also an AI-native practitioner. I use Claude Code, GitHub Copilot, Cursor, and Lovable daily, not as conversation topics but as tools that accelerate requirements work, prototype exploration, and edge-case discovery. I have built multi-agent automation workflows in n8n and shipped a solo two-sided marketplace (construct8) where LLM agents run the operational funnel. Bybit's stated interest in AI-enabled product development and intelligent workflows is not a future ambition for me; it is my current working method.

The role asks for someone with professional English fluency; for reference, a recorded English presentation for one of my own ventures is available at youtube.com/watch?v=nt06f71lgfE.

I am available at four weeks' notice, hold EU citizenship with no visa requirements, and am open to the remote arrangement this role supports. I would welcome a conversation about how my background fits Bybit's current product priorities.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Manager with 13 years of product ownership across regulated, cross-functional environments. Equally comfortable writing MRDs and PRDs, instrumenting success metrics, and steering engineering teams through full delivery cycles. Deep crypto domain knowledge, active across CEX and DEX venues, building backtesting and algorithmic tools, combined with a track record of shipping data platforms, B2B SaaS products, and AI-enabled workflows at scale.

§ WHAT I CAN DO

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP and PoC definition, MRD and PRD authoring, user stories, acceptance criteria, A/B testing, user research, go-to-market support, product lifecycle management.

Analytics and Data: KPI definition, funnel and conversion analysis, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy, post-launch performance measurement.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning, backlog refinement, velocity and burndown, release planning, UAT.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable, n8n.

Technical Environments: Kubernetes, OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin, Django, SQL, PostgreSQL, MongoDB, Kafka.

Crypto and Web3: CEX and DEX trading (Hyperliquid, Bitget, Jupiter, 1inch), perpetual futures, spot markets, cross-chain bridging, market microstructure analysis, backtesting engine development, algorithmic workflow design.

Stakeholder and Leadership: cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management, GDPR, Deputy IT Security Officer.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI & DATA PLATFORM 2024-2025

Led AI and data platform for the FCAS European programme across 15+ engineers; cut rollout time from days to 30 minutes via ArgoCD GitOps; redirected strategy on instrumented data, increasing pipeline runs by 200%. Stack: Kubernetes, ArgoCD, Dagster, Scrum, Jira.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023-2024

Owned national labour-market analytics platform and Deputy IT Security Officer role; migrated bare-metal to containers; reduced data update time by 75% introducing Dagster and dbt; shipped full UI relaunch and ETL migration in parallel.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE 2023-2023

Cut roadmap to top 10% of features against agreed success metrics; user acceptance rose fivefold. Delivered CGM hospital interface, reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS PLATFORM 2022-2022

Restructured 18-person delivery org into three lean teams; attrition fell from near-total exodus to one departure. Shipped Claims Center from concept to production; cut time-to-market for new insurance products from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL & PAYMENTS
POS 2021-2022

Moved research results to production in a fully SAFe setup with agile release trains and PI planning across a matrix organisation.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA
PLATFORM 2021-2021

Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE E-COMMERCE
2019-2020

Migrated legacy procurement system to Shopware for three AOK insurers and ~20,000 employees; backlog refinement, user stories, and acceptance criteria in Jira.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE INFRASTRUCTURE
2017-2018

Wi-Fi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · B2B STAFFING
MARKETPLACE 2025-2026

Zero to one solo: anonymity-until-payment model, WhatsApp/Telegram as product surface, LLM agents across the funnel, funnel and conversion analysis in SQL.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016-2021

Shipped three-layer enterprise encryption product installing in under two minutes; later Chair of the Board.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P PAYMENTS
2013-2018

Built mobile group-based P2P payment product from zero to acquisition by Sparkasse, inside the girocard ecosystem.
