

Philipp Hilbert. *AI Product Manager, fintech and regulated industries.*

Positioning, ten years shipping AI and data products in fintech, insurance, defence, and public sector, now focused on the AI-native financial products layer.

§ WHY AUXO TALENT'S CLIENT

A lean fintech team building AI-driven financial products, fraud and risk tooling, intelligent automation, customer-facing AI, is precisely the environment where a generalist PM with regulated-industry depth and hands-on AI product experience adds the most. The combination of fast iteration and genuine compliance stakes is one I know from both sides: I shipped a national labour-market analytics platform at the Federal Employment Agency as Deputy IT Security Officer, and I built an AI and data platform for a multinational defence programme under strict governance constraints. The mention of model risk and AI governance as explicit requirements, not an afterthought, tells me this team thinks seriously about what it ships. *That is exactly the environment where my strengths compound.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, pair-programming and review
- **Cursor / VSCode**, AI-assisted development
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy iteration
- **GPT**, discovery synthesis and user-story drafts
- **n8n**, agentic workflow automation
- **Gamma.app**, stakeholder decks and business cases

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, ArgoCD, Docker, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, Kafka, Dagster, dbt, SQL, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built zero to one, solo.

- Anonymity-until-payment model protects both sides until commitment is confirmed.
 - WhatsApp and Telegram as the product surface; LLM agents handle funnel automation so one person runs day-to-day operations.
 - Funnel and conversion analysis in SQL; full product lifecycle owned end-to-end without an engineering team.
 - Demonstrates exactly the bias toward AI-native execution and regulated-market product thinking this role requires.
-

§ HOW I WOULD WORK AT AUXO TALENT'S CLIENT

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the data science and compliance teams, map the existing AI feature surface against the stated fraud and risk roadmap, and identify where the biggest gap between what's technically possible and what's actually shipped sits.

WEEK 2

Scope the first slice.

Pick one high-value AI use case surfaced in discovery, write the business case and success metrics, and align engineering, data science, and compliance on a scoped MVP before any code is written.

WEEK 3+

Ship, measure, iterate.

Drive the first AI feature through delivery, instrument the success metrics agreed in week two, and run a structured retrospective to feed the next roadmap cycle.

I COVER LETTER

Dear Hiring Team,

I am writing to apply for the AI Product Manager role at the fintech company you are representing. Ten years of product management in regulated industries, fintech, insurance, defence AI, and public sector, combined with hands-on AI product delivery gives me a specific kind of fit with what you have described.

The role asks for someone who can sit at the intersection of engineering, data science, compliance, and commercial strategy. That is a fair description of what I have done across several organisations. At the Federal Employment Agency I owned a national labour-market analytics platform, served as Deputy IT Security Officer, integrated test automation into the Jenkins pipeline, introduced Dagster and dbt for ETL, and drove a full bare-metal-to-container migration, all at the same time, inside a public-sector governance framework. At Rohde & Schwarz I managed a cross-functional team of fifteen engineers and data scientists building an AI and data platform for the FCAS European defence programme, introduced GitOps rollout with ArgoCD that cut deployment time from days to thirty minutes, and redirected strategy based on instrumented workflow analysis that revealed the UI-first approach had recorded exactly zero clicks in production. Both roles required translating what is technically feasible into something that would survive compliance and regulatory scrutiny.

The fintech thread runs through my career as a founder and as a practitioner. I built Kvitt Payment Solutions, a mobile P2P payments product, from zero to acquisition by Sparkasse, operating inside the girocard ecosystem. That experience taught me how regulated payment infrastructure actually behaves under pressure, which is different from how it reads in a specification. The AI governance and model risk requirements you mention are areas I have worked in explicitly: EU AI Act compliance, Explainable AI design, human-in-the-loop workflows, and audit-trail architecture for AI outputs. I understand why a fintech team would treat these as first-class product requirements rather than a legal checkbox.

I move quickly and I am comfortable with ambiguity. At CLINET Platforms I inherited a roadmap a five-person team could not deliver; I cut it to the top ten percent of features against agreed success measures and user acceptance rose more than fivefold. At EMIL Group I restructured an eighteen-person organisation that was losing its senior engineers, shipped a Claims Center from concept to production with no precedent, and cut time-to-market for a new

insurance product from months to under a week. These outcomes happened because I treat prioritisation as a discipline and success metrics as a contract, not a post-launch formality.

If you would like to discuss how my background maps to the specific AI features your client is building, I am available immediately.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Senior AI Product Manager with thirteen years of product ownership in regulated industries, fintech, insurance, defence AI, and public sector. Comfortable taking an AI or data product from discovery through compliance review and into production, aligning engineering, data science, and compliance teams on a shared roadmap. Track record of shipping end-to-end across high-governance environments without slowing iteration to a crawl.

§ WHAT I CAN DO

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP and PoC definition, A/B testing, user research and interviews, go-to-market support, product lifecycle management.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning, backlog refinement, sprint planning, velocity and burndown, release planning, UAT.

Analytics and Data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy.

Technical Environments: Kubernetes, OpenShift, ArgoCD, Docker, GitOps, CI/CD, Jenkins, GitLab, REST APIs, Python, Kotlin, Django, PostgreSQL, MongoDB, Kafka, SQL.

Governance and Compliance: GDPR, Deputy IT Security Officer, identity management, AI governance, model risk, regulatory frameworks in financial services.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA PLATFORM 2024-2025

AI and data platform for the FCAS European programme; team of 15+ engineers and data scientists. GitOps delivery with ArgoCD cut rollout from days to 30 minutes; instrumented workflow analysis redirected strategy and drove a 200% increase in pipeline runs.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

National labour-market analytics platform; Deputy IT Security Officer. Introduced Dagster and dbt, saving 75% of time per data update; migrated bare-metal to containers; integrated test automation into Jenkins CI pipeline.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE 2023

Mobile patient app for iOS and Android. Cut roadmap to top 10% of features against agreed success measures; user acceptance rose fivefold. Integrated CGM interface: digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

Restructured 18-person delivery org into three lean teams; attrition fell from near-total exodus to one departure. Shipped Claims Center from concept to production; cut insurance product launch time from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL AND PAYMENTS 2021-2022

POS and forecourt systems. Moved research results into production across a matrix org in a fully SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA 2021

Secure data platform. Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE 2019-2020

B2B procurement webshop. Migrated legacy system to Shopware for three AOK insurers and ~20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY 2019

Full site IT modernisation end-to-end, Wismar and Magdeburg.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE 2017-2018

Clinical network. Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION STAFFING
2025-PRESENT

Two-sided B2B marketplace; LLM agents across the funnel; anonymity-until-payment model;
SQL-based funnel and conversion analysis. Built zero to one, solo.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY 2016-2021

Quantum-secure encryption hardware and software. Shipped a three-layer product installing in
under two minutes; later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER AND CDO/CFO · AGRITECH 2018-2021

Nanotechnology fertiliser from laboratory to investor rounds; financial planning and investor
reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH 2013-2018

Mobile group-based P2P payments. Built zero to acquisition; acquired and operated by
Sparkasse inside the girocard ecosystem.
