§ WHY HALIAN / CLIENT

Enterprise-grade banking software in a highly regulated environment is exactly the product surface I have spent the bulk of my career on: regulated data platforms, payment infrastructure, insurance SaaS, and government-grade identity systems. The posting's emphasis on owning products from 0→1 through commercial scale, while maintaining credibility with regulators and engineering simultaneously, maps precisely to work I have done repeatedly. The explicit call for practical AI capability applied inside financial products, copilots, decision support, agentic workflows, rather than AI for its own sake reflects a product philosophy I share. *That combination of domain depth and grounded AI execution is where I consistently do my best work.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec generation and edge-case discovery
- **GitHub Copilot**, pair-programming and review acceleration
- **Cursor / VSCode**, AI-assisted development environment
- **Lovable**, rapid front-end prototyping
- **GPT**, stakeholder-facing draft generation and analysis

- **n8n**, agentic workflow and automation design
 - **Gamma.app**, executive-ready presentation generation
 - **Framer**, design-heavy concept work
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps rollout and rollback, Jenkins, CI/CD pipelines, GitLab, Azure DevOps, REST APIs, Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, Kafka, Dagster, dbt, ETL pipeline design, Jira, Confluence, Figma, Miro, Matomo, MicroStrategy, SQL.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built solo from zero.

- Anonymity-until-payment model that protects both sides of the market until commitment is made.
 - WhatsApp and Telegram as the primary product surface, reducing onboarding friction to near zero.
 - LLM agents across the full funnel so a single operator runs day-to-day matching at scale.
 - Demonstrates the 0→1 product ownership, agentic AI integration, and B2B platform thinking directly relevant to building financial infrastructure products.
-

§ HOW I WOULD WORK AT HALIAN / CLIENT

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the engineering leads, compliance stakeholders, and at least one client-facing call to map the actual payment or settlement flow against the documented requirements, identifying where the largest gap between spec and reality sits.

WEEK 2

Prioritise and slice.

Translate the mapped gaps into a ranked problem list with clear success metrics agreed with business and technical leads, and cut the first slice small enough to ship and validate within a sprint.

WEEK 3+

Ship, measure, expand.

Drive the first delivery to production, instrument it, present the outcome to stakeholders, and use the credibility earned to start shaping the longer roadmap and the AI integration backlog.

I COVER LETTER

Dear Hiring Team,

I am writing to apply for the Senior Product Manager, Financial Services & AI-Enabled Products role. My background spans 13 years of product ownership across payments, insurance, regulated government data platforms, and defence AI infrastructure, and I am actively targeting the UAE market. I am prepared to relocate to Abu Dhabi and work fully on-site.

The framing of this role is one I recognise immediately: this is a financial services product leadership position where AI competency is now table stakes, not the headline. That is exactly how I approach the work. At EMIL Group I owned a B2B SaaS platform serving insurers, reinsurers, brokers, and underwriters, a regulated, multi-stakeholder environment where product decisions had compliance and contractual consequences. I shipped the Claims Center from concept to production with no prior template, restructured an 18-person delivery organisation that was losing senior engineers, and reduced attrition from near-total exodus to a single departure. Before that, at Bundesagentur für Arbeit, I served concurrently as Deputy IT Security Officer while owning a national labour-market analytics platform used by policymakers and researchers, a role that required simultaneous credibility with regulators, engineering, and executive stakeholders.

On payments specifically: I co-founded Kvitt Payment Solutions, a mobile P2P group payments product built inside the girocard ecosystem and ultimately acquired and operated by Sparkasse. I understand payment flows, transaction lifecycles, settlement mechanics, and the operational controls that regulated payment infrastructure requires, not from a distance, but from having designed and owned those product decisions from zero.

My AI capability is practical rather than theoretical. At Rohde & Schwarz I owned an internal AI and data platform for the FCAS European programme, managing 15+ engineers and data

scientists. I used workflow instrumentation to redirect product strategy, a UI-led approach recorded exactly zero clicks; a developer-code-first approach increased pipeline runs by 200%. That is the discipline I bring to applying AI inside financial products: evaluating actual workflow impact rather than retrofitting AI features. In my own work I use Claude Code, GitHub Copilot, Cursor, n8n, and Lovable daily to accelerate discovery, specification, and prototyping.

The profile the posting describes, deep payments and banking domain knowledge, strong product fundamentals, technical credibility with engineering, and grounded AI execution, is not a combination I am building toward. It is what I have done. I would welcome a conversation about the specific product area this role will initially own and the regulatory environment it operates in.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Senior Product Manager with 13 years of product ownership in regulated industries: payments infrastructure, insurance SaaS, public-sector analytics, healthcare, and defence AI data platforms. I run continuous discovery, translate regulatory obligations and customer needs into prioritised roadmaps, and lead cross-functional teams through agile delivery at scale. Strong technical credibility with engineering, I have owned Kubernetes-based AI platforms, CI/CD pipelines, and ETL systems, not only the requirements that describe them.

§ WHAT I CAN DO

Product Management: continuous discovery, product vision and roadmap, MVP definition, PoC, A/B testing, user research, prototyping, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, story-point estimation, velocity tracking, UAT, Jira, Confluence, Figma, Miro.

Payments & FinTech: P2P payment flow design, PSP integration, girocard ecosystem, transaction lifecycle, settlement controls, POS and forecourt systems.

Regulated Industries: Insurance (B2B SaaS), healthcare (KIS/CGM integration), government (identity management, data platforms), defence AI (FCAS programme), EU AI Act, GDPR/DSGVO, Deputy IT Security Officer.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable, n8n.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, agile release trains, PI planning, GitOps rollout with ArgoCD, CI/CD, branching strategy, regression and end-to-end test automation.

Analytics and Data: KPI definition, funnel and churn analysis, ETL (extract, transform, load), Dagster, dbt, PostgreSQL, MicroStrategy, Matomo.

Technical Environments Owned: Kubernetes, OpenShift, Docker, ArgoCD, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka.

Stakeholder and Leadership: C-level and executive reporting, cross-functional team leadership, workshop facilitation, conflict resolution, client trust rebuilding, budget ownership.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI & DATA PLATFORM 2024-2025

Internal AI and data platform for the FCAS European programme; 15+ engineers and data scientists. GitOps with ArgoCD cut rollout from days to 30 minutes; workflow instrumentation redirected strategy and lifted pipeline runs 200%.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

National labour-market analytics platform; Deputy IT Security Officer. Integrated Dagster and dbt, saving ~75% of time per data update; migrated bare-metal to containers; carried a full UI relaunch through the same period.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE 2023-2023

Cut a five-person team's roadmap to the top 10% of features; user acceptance rose more than fivefold. Implemented the CGM/KIS interface: digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS PLATFORM 2022-2022

Restructured an 18-person delivery org into three lean teams; attrition fell from near-total exodus to one departure. Shipped the Claims Center 0→1; cut new insurance product launch from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL PAYMENTS & POS 2021-2022

Payments, POS and forecourt systems. Moved research results into production across a matrix organisation in a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA & IDENTITY 2021-2021

Secure government data platform; data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE PROCUREMENT 2019-2020

Migrated a legacy B2B procurement webshop to Shopware for three AOK insurers and ~20,000 employees. Backlog refinement, user stories, and acceptance criteria in Jira.

ENERCON · PROJECT LEAD · INDUSTRIAL IT MODERNISATION 2019-2019

Full site IT modernisation end to end across wind energy facilities.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE INFRASTRUCTURE 2017-2018

Wifi infrastructure rollout across nine hospitals in a clinical network.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER & PRODUCT MANAGER · CONSTRUCTION FINTECH MARKETPLACE 2025-2026

Two-sided B2B marketplace built solo from zero. Anonymity-until-payment model; LLM agents across the funnel; SQL-based funnel and conversion analysis.

QCRYPT AG · CO-FOUNDER & PRODUCT OWNER · QUANTUM-SECURE ENCRYPTION 2016-2021

Hardware and software for quantum-secure encryption for enterprise buyers. Shipped a three-layer product installing in under two minutes. Later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO & CFO · DEEP TECH / AGRITECH 2018-2021

Took a nanotechnology fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER & CFO · FINTECH PAYMENTS 2013-2018

Mobile group-based P2P payments, built from zero inside the girocard ecosystem. Acquired and operated by Sparkasse.

§ LANGUAGES

German, native (C2). English, C2, business and technical fluency.
