

Philipp Hilbert. *Global Technical Product Owner, Enterprise AI, Data & Cybersecurity.*

Positioning, Product manager with 13 years in regulated industries, now specialising in enterprise AI platforms, data governance, and security product strategy.

§ WHY QUANTUM TALENT GROUP

The scope here, owning AI product strategy across data management, GenAI, technology operations, and cybersecurity simultaneously, is precisely the intersection where my career has converged. Most organisations treat these as separate programmes; the posting treats them as one portfolio, which is the right call and the harder management problem. The explicit call-out of GraphRAG, agentic AI, and AI evaluation frameworks alongside lineage and governance tells me this organisation is building something genuinely production-grade, not a proof-of-concept layer. The regulated-industry preference (banking) aligns with my work at Bundesagentur für Arbeit, Bundesdruckerei, and EMIL Group, where compliance constraints were not obstacles but design inputs. *That is exactly the environment where careful architecture decisions and precise requirements engineering compound into durable platforms.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, paired development and code review
- **Cursor/VSCode**, agentic coding sessions
- **Lovable**, rapid front-end prototyping
- **GPT**, evaluation loops and edge-case generation

- **n8n**, agentic workflow orchestration
 - **Framer**, design-heavy prototyping
 - **Gamma.app**, stakeholder presentation drafts
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, ArgoCD, Helm, Docker, GitOps, Jenkins, CI/CD, GitLab, Azure DevOps, Dagster, dbt, PostgreSQL, MongoDB, Kafka, REST APIs, Python, Kotlin (Spring Boot), Django, SQL, Jira, Confluence, Figma, Miro, MicroStrategy, Matomo.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B staffing marketplace built zero-to-one, running on LLM agents.

- Anonymity-until-payment model protecting both sides until commitment; WhatsApp and Telegram as the product surface.
 - LLM agents across the full funnel so one operator manages end-to-end matching and onboarding without headcount.
 - Funnel and conversion analysis in SQL; architecture choices made to validate unit economics before scaling infrastructure.
 - Demonstrates the agentic AI design pattern, prompt engineering, evaluation loops, human-in-the-loop gates, directly applicable to enterprise GenAI platform product ownership.
-

§ HOW I WOULD WORK AT QUANTUM TALENT GROUP

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the data engineering, security, and GenAI squads to map current pipeline maturity, identify where lineage and governance tooling is missing or manual, and establish a shared definition of done for production-readiness.

WEEK 2

Roadmap slice, prioritised.

Translate findings into a sequenced roadmap slice, highest-risk items first, with clear success metrics, and align it with senior stakeholders before a single sprint is planned.

WEEK 3+

Ship, instrument, close loops.

Move the first initiative from backlog to pilot, wire in observability and AI evaluation guardrails from the start, and run the first retrospective to calibrate squad velocity and team structure.

I COVER LETTER

Dear Hiring Team,

I am applying for the Global Technical Product Owner, Enterprise AI, Data & Cybersecurity role. My career has been built in exactly the intersection this posting describes: regulated-industry product ownership, technical data platform delivery, and security product management, now extended into enterprise GenAI and agentic AI.

At Rohde & Schwarz I led the AI and data platform for the FCAS European defence programme, a cross-functional team of 15+ engineers and data scientists building infrastructure where data provenance, audit trails, and responsible AI use were not optional features but programme requirements. I introduced GitOps delivery with ArgoCD, cutting rollout time from days to 30 minutes, and redirected product strategy based on instrumented workflow analysis that produced a 200% increase in pipeline runs. This is the kind of evidence-driven platform ownership the role calls for.

At Bundesagentur für Arbeit, I served as Deputy IT Security Officer while simultaneously owning an ETL-heavy national labour-market analytics platform. I introduced Dagster and dbt to automate quarterly data imports and new indicator onboarding, saving approximately 75% of the time per data update, and carried a full bare-metal-to-container migration through the same period. Working under public-sector data governance and security obligations taught me how to treat compliance constraints as architecture inputs rather than afterthoughts, a disposition that transfers directly to banking-grade AI governed systems.

The role's emphasis on LLMs, RAG, GraphRAG, and agentic AI evaluation frameworks aligns with how I work today. I build with Claude Code, GitHub Copilot, Cursor, n8n, and Lovable daily, and I have designed agentic workflow loops with human-in-the-loop gates and prompt-based evaluation. At my own venture, construct8, I built an LLM-agent-driven two-sided marketplace from zero to one, not as a prototype, but as the operating layer of the business. I

understand both the promise and the failure modes of agentic systems, which is the prerequisite for writing useful guardrails and observability requirements.

On the cybersecurity side: I co-founded Qcrypt AG and owned the product architecture for quantum-resistant encryption hardware and software targeting enterprise buyers. I understand attack surface reasoning, sensitive-data controls, and how to translate security requirements into product decisions that engineers can actually implement.

Abu Dhabi is a location I have actively targeted. Relocation is not a compromise; it is the plan.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager and product owner with 13 years of ownership in regulated industries, defence AI, public-sector analytics, insurance, healthcare, payments, and IT security. Specialist in enterprise AI and data platform delivery, ETL and data pipeline modernisation, AI governance, and security product management. Leads cross-functional squads of 15+ through Scrum, Kanban, and SAFe from pilot through production lifecycle.

§ WHAT I CAN DO

Enterprise AI / GenAI product strategy: LLM agents, agentic workflows, RAG, AI evaluation frameworks, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI), responsible-use guardrails, observability design.

Data engineering and platform ownership: ETL (extract, transform, load), Dagster, dbt, PostgreSQL, Kafka, metadata, lineage, data quality, governance, sensitive-data controls; pipeline modernisation and container migration.

Technical product management: roadmap ownership, continuous discovery, MVP definition, PoC, A/B testing, user research, backlog refinement, sprint planning, velocity and burndown, release planning, UAT.

Agile and scaled delivery: Scrum, Kanban, SAFe (Scaled Agile Framework), ART (agile release train), PI planning, Jira, Confluence.

DevOps and infrastructure: Kubernetes (K8s), OpenShift, ArgoCD, Helm, Docker, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, Git, REST APIs, Python, Kotlin, Django, SQL, MongoDB.

Security and governance: Deputy IT Security Officer, GDPR (DSGVO), identity management, quantum-resistant encryption product ownership, sensitive-data controls, regulated-industry delivery.

Stakeholder and leadership: cross-functional team leadership (15+ engineers), C-level and executive reporting, workshop facilitation, conflict resolution, change management, budget ownership.

Analytics: KPI definition, funnel and churn analysis, MicroStrategy, Matomo, SQL-based funnel analysis.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI & DATA PLATFORM 2024-2025

Led AI and data platform for the FCAS European programme; 15+ engineers and data scientists. GitOps with ArgoCD cut rollout from days to 30 minutes; instrumented workflow analysis drove a 200% increase in pipeline runs.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

National labour-market analytics platform; Deputy IT Security Officer. Introduced Dagster and dbt, reducing data-update effort by ~75%; carried bare-metal-to-container migration and full UI relaunch concurrently.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE 2023-2023

Scoped a five-person team's roadmap to the top 10% of features; user acceptance rose more than fivefold. Delivered CGM/KIS interface cutting digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022-2022

Restructured 18-person delivery org into three lean squads; attrition fell from near-total to one departure. Shipped Claims Center from concept to production; cut new-product time-to-market from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL & PAYMENTS 2021-2022

POS and forecourt systems. Moved research results into production across a matrix organisation in a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE DATA PLATFORM
2021-2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER · HEALTH INSURANCE B2B 2019-2020

Migrated legacy procurement system to Shopware for three AOK insurers and ~20,000 employees; still in production.

ENERCON · PROJECT LEAD · INDUSTRIAL IT 2019-2019

Full site IT modernisation end to end across wind-energy facilities.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION STAFFING
B2B 2025-2026

Zero-to-one two-sided marketplace; LLM agents across the funnel, SQL-based conversion analysis, anonymity-until-payment model.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY / QUANTUM
ENCRYPTION 2016-2021

Quantum-resistant encryption hardware and software for enterprise buyers; shipped three-layer install in under two minutes. Later Chair of the Board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · NANOTECHNOLOGY
2018-2021

Fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P PAYMENTS
2013-2018

Mobile group-based P2P payments; built from zero to acquisition by Sparkasse inside the girocard ecosystem.
