

Philipp Hilbert. *Principal Product Manager, digital twin and defence platforms.*

Positioning, 13 years owning regulated-sector roadmaps across defence AI, public analytics, and healthcare, the kind of complexity Hive is built for.

§ WHY ANALOG

Analog is doing something genuinely rare: building a digital twin platform that closes the loop between physical environments and AI inference for defence and government customers, the exact intersection where most platform products stall because no one holds the whole value chain. The call-out in the posting for outcome metrics and customer validation before engineering commits resources describes how I already work: I instrumented two competing workflows at Rohde & Schwarz and the UI-led one recorded exactly zero clicks, so we redirected. Hive's combination of simulation, sensor fusion, and live command surfaces means the discovery problem is permanently non-trivial, which is where a Senior or Principal PM adds the most leverage. *That is exactly the environment where my strengths compound.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, pair programming across the delivery cycle
- **Cursor / VSCode**, AI-assisted context-aware editing
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy interaction work
- **GPT**, structured discovery synthesis and edge-case generation

- **n8n**, multi-agent workflow orchestration
 - **Gamma.app**, stakeholder-facing roadmap communication
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, ArgoCD, Helm, Docker, GitOps rollout and rollback, Jenkins, GitLab, Azure DevOps, CI/CD pipelines, Python, Kotlin with Spring Boot, Django, PostgreSQL, MongoDB, Kafka, REST APIs, Dagster, dbt, ETL pipeline design, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built alone from zero.

- Anonymity-until-payment model that protects both sides until commitment is made.
 - WhatsApp and Telegram as the primary product surface, keeping onboarding frictionless for a non-digital-native workforce.
 - LLM agents across the funnel so a single operator runs day-to-day without headcount.
 - Demonstrates the zero-to-one muscle and multi-sided platform thinking directly relevant to Hive's operator and end-user discovery challenge.
-

§ HOW I WOULD WORK AT ANALOG

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow operator workflows across at least two delivery teams, map the current backlog against stated outcome metrics, and identify where items lack measurable success criteria, the exact gaps that tend to accumulate in fast-moving defence programmes.

WEEK 2

Validate, slice, prioritise.

Run structured discovery sessions with operators and end-users to pressure-test the top roadmap items, then recut the backlog so each item is sized, linked to an outcome, and has a clear definition of done before engineering picks it up.

WEEK 3+

Ship, align, close loops.

Establish a lightweight cross-team prioritisation cadence, hold the first outcome review for the nearest release, and provide initial release notes and positioning so go-to-market and delivery teams are pulling in the same direction.

I COVER LETTER

Dear Analog hiring team,

Your posting for a Principal Product Manager on the Hive platform caught my attention because it names the exact challenges I have spent the last several years solving: discovery across multiple delivery teams, backlog quality as a discipline in its own right, and holding teams accountable for outcomes rather than feature counts. At Rohde & Schwarz I led the internal AI and data platform for the FCAS European defence programme, managing fifteen-plus engineers and data scientists through a cross-national Scrum setup. When user workflow analysis showed that the visually polished UI approach had generated zero real usage, I redirected the roadmap accordingly, pipeline runs increased two hundred percent. That kind of evidence-first redirection is what outcome focus actually looks like in practice.

Hive's proposition, connecting physical environments with AI and sensors for defence and government customers, maps precisely to the platform and data complexity I find most interesting. At Bundesagentur für Arbeit I owned a national labour-market analytics platform serving policymakers and researchers, acted as Deputy IT Security Officer, and carried a full ETL migration and UI relaunch simultaneously. The regulated-sector discipline that environment demands, audit trails, data provenance, security posture, is directly applicable to Analog's customer base. I understand why these customers move carefully, and I know how to build trust with them without letting caution become an excuse for slow delivery.

Backlog quality across multiple teams is a specific craft, not a side effect of good intentions. At CLINET Platforms I inherited a five-person team facing a roadmap it could not deliver. I cut it to the top ten percent of features against agreed success measures and user acceptance rose more than fivefold. At EMIL Group I restructured an eighteen-person delivery organisation into three lean teams with their own leads after near-total senior-engineer attrition, a structural backlog

and team-health problem, not a planning problem, and treating it that way was what stopped the bleeding. Cross-team alignment in a multi-team programme like Hive's requires exactly that kind of diagnostic instinct alongside the facilitation skills.

On the AI-native side: I prototype with Claude Code, GitHub Copilot, and Lovable, use LLM agents in my own side projects for funnel automation and discovery synthesis, and have direct product ownership experience over AI and data pipelines including explainability and governance requirements. I understand what AI teams need from a PM to move fast without accumulating quality debt.

Abu Dhabi is a location I have actively targeted. I am an EU citizen with no visa complexity, available to relocate, and comfortable working fully on-site. I would welcome the chance to discuss how my experience maps to Hive's current programme priorities.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Principal Product Manager with 13 years of product ownership in regulated industries, defence AI, public-sector analytics, insurance, and healthcare. I run continuous discovery, translate operator and end-user needs into a prioritised roadmap, and hold delivery teams accountable to measurable outcomes across complex, multi-team platform programmes. Equally comfortable in front of C-level stakeholders and inside a Jira backlog with engineers.

§ WHAT I CAN DO

Platform and Data Product Management: continuous discovery, product vision, roadmap ownership, backlog refinement, outcome metrics, MVP definition, go-to-market support, release planning.

Regulated-Sector Delivery: defence AI, public-sector analytics, insurance, healthcare, GDPR, Deputy IT Security Officer, audit trails, AI governance, EU AI Act, Explainable AI (XAI).

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning, sprint discipline, velocity, burndown, backlog grooming, UAT, Jira, Confluence.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, human-in-the-loop design, AI governance; Claude Code, GitHub Copilot, Cursor, Lovable, GPT.

Technical Environments Owned: Kubernetes, OpenShift, ArgoCD, Docker, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, Python, REST APIs, PostgreSQL, MongoDB, Kafka, Dagster, dbt.

Stakeholder and Leadership: cross-functional team leadership up to 15+ engineers, C-level reporting, workshop facilitation, conflict resolution, change management.

Analytics and Data: KPI definition, funnel and churn analysis, ETL, Dagster, dbt, Matomo, MicroStrategy, PostgreSQL, SQL.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA PLATFORM 2024-2025

Led the internal AI and data platform for the FCAS European defence programme across 15+ engineers and data scientists. GitOps rollout with ArgoCD cut deployment time from days to 30 minutes; evidence-based roadmap redirection increased pipeline runs by 200%.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · NATIONAL LABOUR- MARKET ANALYTICS 2023-2024

Owned a public-sector analytics platform for policymakers and researchers; Deputy IT Security Officer. Introduced Dagster and dbt, saving 75% of time per data update; migrated bare-metal to containers and carried a full UI relaunch and ETL migration in parallel.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut an undeliverable roadmap to its top 10% of features against agreed success measures; user acceptance rose fivefold. Shipped CGM/KIS integration, reducing digital anamnesis time from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · B2B INSURANCE SAAS 2022

Restructured an 18-person delivery organisation into three lean teams; attrition fell from near-total exodus to a single departure. Shipped the Claims Center from concept to production and cut new-product launch time from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL AND PAYMENTS PLATFORM 2021-2022

Moved research into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE GOVERNMENT DATA PLATFORM 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE PROCUREMENT 2019-2020

Migrated a legacy procurement system to Shopware for three AOK insurers and 20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY SITE IT 2019

Full end-to-end IT modernisation of a wind energy site.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL HEALTHCARE NETWORK 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION STAFFING MARKETPLACE 2025-PRESENT

Zero-to-one two-sided B2B marketplace; LLM agents across the funnel, anonymity-until-payment model, WhatsApp and Telegram as product surface.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE ENCRYPTION 2016-2021

Shipped a three-layer quantum-resistant encryption product that installs in under two minutes for enterprise buyers. Later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · NANOTECHNOLOGY AND AGRICULTURE 2018-2021

Took a nanotechnology fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P PAYMENTS 2013-2018

Built a mobile group-based P2P payment product from zero to acquisition by Sparkasse inside the girocard ecosystem.
