

Philipp Hilbert. *Consumer crypto trading PM, retail-first.*

Positioning, ten years shipping regulated financial and platform products, now focused on consumer crypto trading where market intuition and product rigour combine.

§ WHY CRYPTO.COM

Crypto.com's trading surface on the App is one of the few at scale where retail UX, liquidity, and compliance all have to coexist on a single screen, and where a wrong prioritisation call is visible to 80 million users within hours. That is a harder PM problem than most fintech roles, and a more honest one: the market gives you real-time feedback you cannot ignore. The posting's explicit call for gamification sensibility alongside trading depth signals Crypto.com understands that engagement mechanics and execution quality are not in tension, they compound. *That is precisely the product design challenge I find most interesting right now.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and edge-case generation
- **Cursor / VSCode**, assisted implementation and review
- **GitHub Copilot**, daily code review
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy wireframes
- **GPT**, research synthesis and user-story drafting
- **n8n**, agentic workflow automation
- **Gamma.app**, stakeholder presentation drafting

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, REST APIs, Kafka, Kubernetes, Docker, ArgoCD, GitOps, Jenkins, GitLab, Azure DevOps, Dagster, dbt, SQL, Django, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CRYPTO BACKTEST ENGINE [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A personal backtesting and analytics framework for algorithmic crypto trading strategies.

- Ingests and normalises historical OHLCV and order-book data across CEX and DEX venues including Hyperliquid and Bitget.
 - Built on a file-queue-based agent loop architecture, extensible to live strategy execution.
 - Integrates liquidation heatmap data from Coinglass and Hyblock Capital for market-structure analysis.
 - Directly informs how I would spec slippage tolerance, order routing, and risk controls in a consumer trading product.
-

§ HOW I WOULD WORK AT CRYPTO.COM

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the trading feature squad, read the backlog end to end, and map which user flows, order placement, portfolio view, price alerts, are instrumented well enough to trust their data and which are not.

WEEK 2

Slice, validate, prioritise.

Run two or three short user calls with active traders in the app to triangulate qualitative signals against funnel data, and produce a prioritised shortlist of the next three bets with clear acceptance criteria.

WEEK 3+

Ship, close loops.

Drive the first spec through engineering and QA, establish a lightweight release-review ritual with the data team, and ensure the next roadmap milestone has measurable success criteria agreed before a line of code is written.

I COVER LETTER

Dear Crypto.com Hiring Team,

I am applying for the Senior Product Manager, Trading (Crypto.com App) role. I have spent the last decade shipping regulated financial and platform products, from a P2P payments app acquired into the Sparkasse girocard ecosystem to a B2B insurance SaaS platform, a national labour-market analytics platform, and an AI data platform for a multinational defence programme. Throughout, the common thread has been turning complex, constraint-heavy domains into products that real users actually complete workflows in. Consumer crypto trading is the domain where that skill set feels most naturally applied.

My crypto engagement goes well beyond casual interest. I actively trade across centralised and decentralised venues, Hyperliquid, Bitget, Jupiter, 1inch, Across Protocol, and I spend serious time studying execution quality: slippage, price impact, routing, liquidation mechanics, and market microstructure via Coinglass and Hyblock Capital. I have built a personal backtesting engine and am developing trading bots. This means I understand the gap between what a retail trading UI shows a user and what is actually happening at the infrastructure layer, which is exactly the gap a strong trading PM needs to close when writing specs for order flow, risk controls, and portfolio display.

Crypto.com's scale, 80 million customers, a global regulatory footprint, and a product surface that must balance retail UX with execution integrity, is the kind of environment where I do my best work. At EMIL Group I restructured an 18-person delivery organisation that was haemorrhaging engineers and client trust into three lean teams with their own leads; attrition fell to near zero and we shipped the Claims Center from concept to production. At Rohde & Schwarz I redirected product strategy after instrumenting two competing workflows and discovered the "beautiful" UI-led design had recorded exactly zero clicks, pipeline runs then increased 200% after pivoting to the approach the data supported. Both stories are about the same discipline: making expensive decisions cheaper by measuring before committing.

The posting calls for domain knowledge in retail trading or gamification. I bring the trading side with depth. Gamification mechanics, streaks, milestones, reward loops, are something I understand from adjacent work on engagement and retention in consumer products, and from years as a semi-professional poker player who has used and critiqued training software, HUD

tooling, and hand-history analytics at a serious level. Engagement design that respects the user's financial risk is a different problem than engagement design in a casual game, and I think Crypto.com is right to treat it as such.

My AI-native workflow is operational, not aspirational: I use Claude Code, Cursor, GitHub Copilot, and Lovable daily to prototype, generate specs, stress-test edge cases, and accelerate engineering handoffs. This is the human-in-the-loop practice the posting requires, already running at my desk.

I would welcome the chance to talk through how my background maps to the trading squad's current priorities.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager and product owner with 13 years of product ownership across regulated financial services, data platform, insurance, and public-sector analytics products. I have shipped consumer-facing financial products, including a P2P payments app acquired into the Sparkasse ecosystem, and run full delivery cycles from discovery through GitOps rollout. I complement formal PM experience with eight years as an active crypto and DeFi participant, direct experience with perpetual futures, DEX aggregation, cross-chain bridging, and ongoing personal work on algorithmic trading infrastructure. My working style is data-informed and discovery-led: I instrument competing approaches before committing budget, and I set measurable success criteria before a line of code is written.

§ WHAT I CAN DO

Crypto and fintech: CEX/DEX mechanics, perpetuals, AMMs, MEV, stablecoins, bridges, oracles; P2P and consumer payment UX; PSP integration; girocard ecosystem.

Product ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, UAT, Jira, Confluence, Figma, Miro.

Product management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, A/B testing, user research and interviews, prototyping, go-to-market support.

Agile and scaled delivery: Scrum, Kanban, SAFe, ART, PI planning, GitOps rollout, release gating, CI/CD.

Analytics and data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy, SQL.

AI products and tooling: LLM agents, agentic workflows, prompt engineering, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); prototyping with Claude Code, Cursor, GitHub Copilot, Lovable.

Technical environments: Kubernetes, Docker, ArgoCD, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA PLATFORM 2024-2025

Cut rollout time from days to 30 minutes via ArgoCD GitOps; increased pipeline runs 200% by redirecting strategy to developer-code-first after instrumenting competing workflows. Scrum lead for 15+ engineers and data scientists on the FCAS European programme.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS PLATFORM 2023-2024

Reduced data-update effort 75% via Dagster and dbt; integrated test automation into Jenkins; migrated bare-metal system to containers; delivered full UI relaunch and large ETL migration. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut roadmap to top 10% of features; user acceptance rose fivefold. Shipped CGM/KIS interface, reducing anamnesis time from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS PLATFORM 2022

Restructured 18-person delivery org into three lean teams; attrition dropped to near zero. Shipped Claims Center from concept to production; cut new insurance product time-to-market from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL PAYMENTS AND POS
2021-2022

Moved research results into production across a matrix organisation in a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT SECURE DATA
PLATFORM 2021

Data structures and identity management for the Robert Koch Institute's DIM and DESH programmes.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE B2B
PROCUREMENT 2019-2020

Migrated legacy system to Shopware for three AOK insurers and ~20,000 employees; still in production.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE CLINICAL
NETWORK 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION STAFFING
MARKETPLACE 2025-2026

Zero-to-one two-sided B2B marketplace; anonymity-until-payment model; WhatsApp and Telegram as product surface; LLM agents across the funnel; funnel analysis in SQL.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016-2021

Shipped three-layer encryption product installing in under two minutes for enterprise buyers; later Chair of the board.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P PAYMENTS
2013-2018

Built P2P mobile group payments from zero; acquired and operated by Sparkasse inside the girocard ecosystem.
