

Philipp Hilbert. *Product Manager for fintech and AI-native consumer apps.*

Positioning, 13 years shipping regulated financial products, from P2P payments to insurance platforms, now applying that to Bjak's AI neobank.

§ WHY BJAK

Bjak started as an insurance platform and is now expanding into payments, savings and investing, that progression from a single vertical into a full financial services stack is one of the harder product problems to get right. The posting asks for someone who can "turn complex financial products into simple, usable customer journeys," which is a precise description of what I did at EMIL Group (insurance B2B SaaS) and at Kvitt Payment Solutions (P2P payments taken to acquisition). *That is the type of problem I have been building toward for over a decade.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo feature specs and edge-case generation
- **GitHub Copilot**, pair programming across Python and Kotlin
- **Cursor**, fast refactors in unfamiliar codebases
- **Lovable**, rapid front-end prototyping before engineering picks it up
- **Framer**, design-heavy interactive mockups
- **GPT**, research, synthesis and draft generation
- **n8n**, agentic workflow automation
- **Gamma.app**, stakeholder decks from structured notes

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, ArgoCD, Docker, GitOps, Jenkins, CI/CD, Python, Kotlin with Spring Boot, Django, PostgreSQL, MongoDB, REST APIs, Kafka, Dagster, dbt, Azure DevOps, GitLab, Git. On the data side: ETL pipelines, funnel and churn analysis in SQL, MicroStrategy, Matomo. On the AI side: LLM agents, agentic workflows, prompt engineering, human-in-the-loop design, EU AI Act compliance.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A two-sided B2B marketplace matching construction firms with workers, built alone from zero.

- Anonymity-until-payment model that protects both sides until commitment is made.
 - WhatsApp and Telegram as the product surface, reducing onboarding friction to near zero.
 - LLM agents across the funnel so one person runs the full day-to-day operation.
 - Directly relevant to Bjak: proves zero-to-one execution, LLM-first product design, and consumer-grade UX thinking applied to a regulated, two-sided marketplace.
-

§ HOW I WOULD WORK AT BJAК

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Talk to users, read support tickets, sit with the engineering team, and map the current insurance and payments journeys end to end, looking specifically for where compliance constraints are creating drop-off.

WEEK 2

Slice the roadmap.

Take the backlog, score each item against agreed success metrics, and cut the bottom half, the same move that raised user acceptance fivefold at CLINET Platforms.

WEEK 3+

Ship and monitor.

Pick one high-confidence improvement, get it into production, instrument it, and report back with numbers, not a deck.

I COVER LETTER

Dear Bjak team,

I have been following Bjak's expansion from insurance into payments and savings with real interest. The move from a single-product insurance platform into a full AI neobank is exactly the kind of scope problem I have worked on across multiple companies, and I want to help you execute it.

My most directly relevant work is at EMIL Group, where I owned a B2B SaaS platform for insurers and reinsurers. The team was losing engineers and client trust at the same time. I restructured delivery, shipped the Claims Center from concept to production, and cut time-to-market for a new insurance product from months to under a week. Before that, I built Kvitt Payment Solutions, a mobile P2P payments product that was acquired and operated by Sparkasse inside the girocard ecosystem. Those two experiences, insurance platform product ownership and payments from zero to acquisition, map directly to the product areas this role covers.

The posting asks for someone who starts from user problems, not feature lists, and who is honest about what changed because of their work versus wider team effort. At Bundesagentur für Arbeit I redirected an ETL platform based on instrumented workflow analysis and saved nearly 75% of time per data update. At Rohde & Schwarz I increased pipeline runs by 200% by deprioritising a UI nobody was clicking in favour of developer-first tooling. Both improvements came from measuring first, not from assumptions.

On the AI side, I run a daily workflow across Claude Code, GitHub Copilot, Lovable and Cursor. I use LLM agents in production, my construct8 marketplace runs its day-to-day operations through n8n-based agent automation. That is the kind of AI-native execution Bjak's neobank app will need as it scales into new financial service verticals.

I am based in Berlin, authorised to work in Germany, and available within four weeks.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership across insurance, payments, fintech, public-sector analytics, healthcare and defence AI. I run continuous discovery, turn user needs and technical constraints into a prioritised roadmap, and lead cross-functional teams through agile delivery. Strong track record in regulated financial products, from a P2P payments startup taken to acquisition, to an insurance B2B SaaS platform.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes and making the platform hotfix-capable across multinational teams.
- Redirected product strategy based on instrumented user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.
- Managed a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows, reducing digital anamnesis from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams: attrition fell from a near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent, and cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN,
MÖNCHENGLADBACH | 09/2021-03/2022

Retail and payments, POS and forecourt systems.

- Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN |
03/2021-06/2021

- Government, secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT |
03/2019-05/2020

- Health insurance, B2B procurement webshop. Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL |
12/2025-PRESENT

Construction staffing. Two-sided B2B marketplace built alone from zero.

- Zero-to-one build: anonymity-until-payment model, WhatsApp and Telegram as the product surface, LLM agents across the funnel so one person runs the day-to-day.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN |
01/2016-12/2021

IT security. Integrated hardware and software for quantum-secure encryption.

- Shipped a three-layer product that installs in under two minutes, solving the enterprise installation barrier. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN |
02/2013-11/2018

Fintech. Mobile group-based P2P payments.

- Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, A/B testing, user research and interviews, prototyping, go-to-market support, product lifecycle management.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, backlog refinement, sprint planning, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Fintech and Insurance: payments, P2P payments, fintech platform, insurance platform, B2B SaaS, PSP integration, girocard ecosystem, regulated product delivery.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable, n8n.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, agile release train, PI planning, Objectives and Key Results (OKRs).

Analytics and Data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, SQL, Matomo, MicroStrategy.

Technical Environments Owned: Kubernetes, ArgoCD, Docker, GitOps, CI/CD, Jenkins, Python, Kotlin, REST APIs, PostgreSQL, MongoDB, Kafka, Azure DevOps, GitLab.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, financial planning as CFO, ROI reasoning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
