

Philipp Hilbert. *AI product leader turning workflow automation into measurable business value.*

Positioning, I build AI products that change how business operations run, with 13 years shipping in regulated, complex organisations.

§ WHY DUBAI HOLDING

Dubai Holding's remit spans ten sectors, real estate, hospitality, ICT, logistics and more, which means AI products shipped here touch diverse operational workflows, not a single vertical. The posting is explicit that the role drives workflow redesign rather than point automation, and that the bar is evidenced business value, not claimed benefit. That framing matches how I have approached every product I have owned. The scale of the portfolio and the seniority of the stakeholders involved make this a real test of commercial and product judgement. *That is exactly the environment where clear thinking about value pays off.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo specs and implementation
- **GitHub Copilot**, daily coding assistance
- **Cursor**, editor-integrated AI refactoring
- **Lovable**, rapid front-end prototyping
- **GPT**, research, drafting, edge-case generation
- **n8n**, agentic workflow automation
- **Gamma.app**, stakeholder decks and documentation
- **Framer**, design-heavy prototyping

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, Kafka, REST APIs, Dagster, dbt, ETL pipelines, Azure DevOps, GitLab, Git, MicroStrategy, Matomo, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A two-sided B2B marketplace that takes the headhunter out of construction staffing.

- Matches construction firms with workers using an anonymity-until-payment model that protects both sides until commitment.
 - WhatsApp and Telegram as the product surface, built for zero infrastructure overhead.
 - LLM agents across the funnel so one person runs the day-to-day operation end to end.
 - Directly relevant to this role: demonstrates product ownership, agentic workflow design, and funnel analytics in SQL from zero to one, alone.
-

§ HOW I WOULD WORK AT DUBAI HOLDING

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

I sit with the business unit leads and finance stakeholders across the portfolio to understand which AI products are in flight, how value is currently being tracked, and where the gap between claimed and evidenced benefit is widest.

WEEK 2

Audit and prioritise.

I map the current roadmap against the value, feasibility, risk, and strategic fit framework the posting describes, identify the two or three products where re-sequencing or scope changes would have the fastest impact, and bring a clear recommendation to the AI Product Lead.

WEEK 3+

Ship and measure.

I drive structured discovery for the highest-priority workflows, agree KPIs with business owners and finance upfront, and start closing the loop between delivery and adoption, intervening early wherever go-live has not translated into sustained usage.

I COVER LETTER

Dear Dubai Holding team,

I am applying for the Senior Manager - AI Product Management role. I have 13 years of product ownership in regulated, complex organisations, defence AI, public-sector analytics, insurance, healthcare, and payments, and the through-line across all of it is the same thing your posting describes: getting AI and data products to produce evidenced, sustained business value rather than promising it.

At Rohde & Schwarz I owned the internal AI and data platform for the FCAS European programme, managing a cross-functional team of 15 engineers and data scientists. The most useful decision I made there was not a feature decision: I instrumented two competing workflows and found that the polished UI-led design recorded exactly zero clicks, while the developer-code-first path recorded all the usage. Redirecting strategy based on that evidence increased pipeline runs by 200%. That is the kind of commercial and product judgement your posting is asking for.

At the Federal Employment Agency I owned a national labour-market analytics platform, acting also as Deputy IT Security Officer. I ran a full ETL migration, moved a bare-metal system into containers, and cut the time per quarterly data update by 75% through Dagster and dbt automation. Each of those was a workflow redesign, not a feature addition, and each required business stakeholders, engineers, and compliance functions to move together.

Earlier I co-founded Kvitt Payment Solutions, a mobile P2P payments product taken from zero to acquisition by Sparkasse inside the girocard ecosystem, and Qcrypt AG, a quantum-secure encryption startup where I owned the product architecture and chaired the board. Building business cases, validating benefit with finance, and managing governance obligations in regulated environments are not new territory for me.

Your portfolio spans ten sectors including logistics, real estate, and ICT, and the posting is clear that the bar is evidenced value rather than asserted value. That is the only bar I know how to work to. I would be glad to speak with you about how I would approach the portfolio.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product manager and product owner with 13 years of product ownership delivering AI, data, and automation products in regulated industries: defence AI, public-sector analytics, insurance, healthcare, payments, and logistics. I drive structured discovery before build commitments, turn business requirements into prioritised roadmaps, and lead cross-functional teams through agile delivery. I define KPIs upfront and validate benefit with business owners and finance after go-live.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Spearheaded development of the internal AI and data platform for the FCAS European programme, managing a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.
- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design. I instrumented two competing workflows and the beautiful UI-led one recorded exactly zero clicks.

- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes and making the platform hotfix-capable across multinational teams.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023 - 07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers, giving the team autonomous control of its environments, and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis went from 30 minutes to 5 from form to database.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent, and cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

Retail and payments, POS and forecourt systems.

- Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 - 06/2021

Government, secure data platform.

- Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

Health insurance, B2B procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

PROJECT LEAD, ENERCON, WISMAR / MAGDEBURG | 04/2019 - 12/2019

- Wind energy, full site IT modernisation end to end.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017 - 06/2018

- Healthcare, clinical network. Wifi infrastructure rollout across nine hospitals.
-

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - PRESENT

- Construction staffing B2B marketplace. Anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel so one person runs day-to-day operations. Funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

- IT security, quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes to meet enterprise procurement constraints. Later Chair of the board.

CO-FOUNDER, CDO AND CFO, SMART SOIL TECHNOLOGIES, BERLIN | 03/2018 - 08/2021

- Nanotechnology and agriculture. Took a fertiliser product from laboratory to investor rounds, owning financial planning and investor reporting.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

- Fintech, mobile group-based P2P payments. Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); full prototyping with Claude Code, GitHub Copilot, Cursor and Lovable.

Analytics and Data: funnel and churn analysis, KPI definition, Matomo, MicroStrategy, ETL (extract, transform, load), Dagster, dbt (data build tool), PostgreSQL.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, backlog refinement, sprint planning, story-point estimation, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe (Scaled Agile Framework), ART (agile release train), PI (program increment) planning.

Technical Environments Owned: Kubernetes (K8s), OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, Python, Kotlin, Django, PostgreSQL, MongoDB, Kafka, REST APIs, Git, GitLab, Azure DevOps.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, financial planning as CFO, ROI reasoning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
