

Philipp Hilbert. *Senior Product Manager driving compliant onboarding and growth in crypto.*

Positioning, Regulated-fintech PM with 13 years of shipped products, crypto-native since 2016, ready to own the Crypto.com onboarding-to-first-trade funnel.

§ WHY CRYPTO.COM

The onboarding mandate here sits at the intersection I find most interesting: KYC infrastructure, growth mechanics, and trading activation all on one platform that serves 80 million customers. Most onboarding PM roles touch one of those three. This one owns all of them, and then extends into trading. The detail about a growing set of products and regulatory paths sharing a single onboarding platform matches exactly the kind of infrastructure problem I have been drawn to across my career. *That is the kind of scope where careful platform thinking pays off quickly.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, day-to-day coding assist
- **Cursor**, context-aware editing
- **Lovable**, rapid front-end prototyping
- **GPT**, discovery drafts and edge-case generation
- **n8n**, agentic workflow automation
- **Framer**, design-heavy prototypes

- **Gamma.app**, stakeholder decks
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps rollout and rollback, Jenkins, CI/CD, GitLab, Azure DevOps, Dagster, dbt, PostgreSQL, MongoDB, Kafka, REST APIs, Python, Kotlin (Spring Boot), Django, SQL, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A two-sided B2B construction-staffing marketplace, built zero to one alone.

- Anonymity-until-payment model that protects both firms and workers until commitment is made.
 - WhatsApp and Telegram as the product surface, with LLM agents across the acquisition and matching funnel.
 - Funnel and conversion analysis in SQL; one person runs the day-to-day.
 - Proves ability to ship a growth product from nothing, own the full funnel, and instrument it without a data team.
-

§ HOW I WOULD WORK AT CRYPTO.COM

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Sit with the compliance, engineering, and growth teams to map the current onboarding funnel step by step, identify where drop-off happens, and understand which KYC paths exist per market.

WEEK 2

Size and prioritise.

Pick the two or three biggest drop-off points, quantify the activation impact of fixing each, and produce a first prioritised backlog the squad can react to.

Ship, measure, extend.

Land the first intervention, wire up the measurement so we know whether it moved completion or activation, and begin scoping how the same onboarding capability extends to the next product surface.

I COVER LETTER

Dear Crypto.com team,

I am applying for the Senior/Principal Product Manager role for User Onboarding and Growth. I have spent 13 years shipping products in regulated industries, including fintech, insurance, healthcare, and defence AI. The common thread across those roles is owning the full chain from compliance constraint to user-facing outcome, not just the roadmap.

On the regulated side: at Bundesdruckerei I handled identity management for government platforms, and at Kvitt Payment Solutions I built a P2P fintech product from zero through to acquisition inside the girocard ecosystem at Sparkasse. I know what it means when a regulatory change breaks a funnel, and I know how to re-plan without stalling a team. KYC and account opening are not a black box to me; they are a design constraint I have worked around in practice.

On the growth side: at CLINET Platforms I cut a roadmap that a five-person team could not deliver down to the top 10% of features against agreed success measures. User acceptance rose more than fivefold. At Rohde and Schwarz I instrumented two competing workflows to find that the heavily designed UI path recorded zero clicks, and redirected the product strategy accordingly, which increased pipeline runs by 200%. I do not wait for someone else to hand me the analysis.

My crypto engagement goes beyond domain knowledge. I actively trade across Hyperliquid, Bitget, Jupiter, 1inch and Across Protocol, work with perpetuals, DEX aggregation, cross-chain bridging, and have been building a backtesting engine and algorithmic trading framework on the side. I care about the infrastructure layer: stablecoins, custody, exchange connectivity, and the mechanics that make digital-asset markets function at scale. That means I can hold the trading product conversation with the Trading team from day one, not after a ramp period.

The Crypto.com onboarding platform sits at an interesting pressure point: one platform must serve a growing number of products, regulatory paths, and trading journeys without fragmenting. I have extended shared platforms across products before, at EMIL Group across insurer, broker, and underwriter contexts, and at Scheidt and Bachmann across a retail and payments matrix. I know the traps: one-off integrations that look fast and cost months to

maintain, and journey branches that diverge until the platform is no longer shared in any meaningful sense.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Senior Product Manager with 13 years of product ownership in regulated industries: fintech, insurance, healthcare, public-sector analytics, and defence AI. I have shipped KYC-adjacent identity products, P2P payment platforms, and data platform infrastructure, and I run continuous discovery to turn strategy, user needs, and compliance constraints into a prioritised roadmap. I lead cross-functional teams through agile delivery (Scrum, Kanban, SAFe) and instrument funnels to measure whether outcomes actually move.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
- On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
- Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
- I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design. I instrumented two competing workflows and the beautiful UI-led one recorded exactly zero clicks.
- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes across multinational teams.
- Led a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023 - 07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly data imports and new indicators ran without hand-holding, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis time dropped from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent, and cut time-to-market for a new insurance product from months to less than a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

- Retail and payments, POS and forecourt systems. Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 - 06/2021

- Government, secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

- Health insurance, B2B procurement webshop. Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

PROJECT LEAD, ENERCON, WISMAR / MAGDEBURG | 04/2019 - 12/2019

- Wind energy, full site IT modernisation end to end.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017 - 06/2018

- Healthcare, clinical network. Wifi infrastructure rollout across nine hospitals.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - PRESENT

- Construction staffing, two-sided B2B marketplace built zero to one alone: anonymity-until-payment model, WhatsApp and Telegram as the product surface, LLM agents across the funnel, funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

- IT security, quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes to overcome enterprise resistance to long installations. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

- Fintech, mobile group-based P2P payments. Built from zero and acquired by Sparkasse, operated inside the girocard ecosystem.

§ SKILLS

Product Management: continuous discovery, product vision and product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, funnel and churn analysis, KPI definition, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, story-point estimation, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Regulated and Fintech Domains: KYC, identity management, GDPR (DSGVO), Deputy IT Security Officer, payment flow design, P2P payments, insurance platform, B2B SaaS.

Crypto and Data: CEX/DEX mechanics, perpetuals, DEX aggregation, cross-chain bridging; ETL, Dagster, dbt, PostgreSQL, MongoDB, Kafka, Matomo, MicroStrategy.

Agile and Scaled Delivery: Scrum, Kanban, SAgile, ART, PI planning, GitOps rollout and rollback with ArgoCD, CI/CD, branching strategy, release gating.

Technical Environments: Kubernetes, OpenShift, Docker, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin (Spring Boot), Django, SQL.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
