

Philipp Hilbert. *Senior Product Manager, marketplace, workflow and platform specialist.*

Positioning, Product Lead with 13 years of end-to-end ownership turning founder-level ambition into structured, buildable product, across B2B SaaS, payments, and multi-sided platforms.

§ WHY UNIBUILD GARAGE

Unibuild is doing something genuinely difficult: not just a marketplace, but a full operating layer, provider OS, ERP, payments, analytics and AI in one coherent system. That is the kind of scope where the product definition work either holds the whole thing together or lets it collapse into a pile of disconnected features. The posting is explicit that the founder needs someone who can challenge assumptions and recommend solutions, not just document requirements, that is a different brief from most PM roles, and a more interesting one. The combination of field services, workflow automation and embedded payments is a configuration I have shipped before, not one I would be discovering for the first time. *That is exactly the environment where my strengths compound.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and edge-case generation
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy wireframe work
- **Cursor / VSCode**, LLM-assisted requirement drafts
- **GPT**, structured PRD and user story generation

- **n8n**, agentic workflow automation
 - **GitHub Copilot**, in-editor development support
 - **Gamma.app**, stakeholder-facing product decks
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

PostgreSQL, MongoDB, REST APIs, Python, Kotlin (Spring Boot), Kafka, Kubernetes, Docker, ArgoCD, GitLab, Jenkins, CI/CD, Dagster, dbt, Shopware, Jira, Confluence, Figma, Miro, Matomo, MicroStrategy.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B SaaS marketplace matching construction firms with workers, zero to one, alone.

- Anonymity-until-payment model protecting both sides until commitment is confirmed.
 - WhatsApp and Telegram as the primary product surface, keeping onboarding friction near zero.
 - LLM agents across the full funnel so a single operator can run day-to-day matching.
 - Direct proof of the work Unibuild needs: marketplace mechanics, provider-side OS thinking and AI-native execution without a full engineering team behind it.
-

§ HOW I WOULD WORK AT UNIBUILD GARAGE

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the founder through live conversations and existing materials, map every workflow the platform must support, marketplace, provider OS, payments, ERP, and return a single dependency diagram showing what is decided, what is assumed, and what is still open.

WEEK 2

Structure and slice.

Take the highest-priority open area and produce a complete product blueprint slice: roles, permissions, statuses, SLAs, edge cases, and acceptance criteria tight enough for the designer to start and the engineer to estimate.

WEEK 3+

Ship, review, close loops.

Sit in design reviews and developer check-ins to catch drift early, validate builds against approved requirements, and keep the backlog one sprint ahead so the team never waits on product.

I COVER LETTER

Dear Unibuild Garage team,

The role you have posted is rare: not a product manager who manages a roadmap inside a functioning organisation, but a Product Lead who works directly with a founder to bring order to a large, multi-module platform before too much has been built in the wrong direction. That framing resonated immediately, because it describes a problem I have solved more than once.

At EMIL Group I joined an 18-person delivery organisation that was losing its senior engineers and its client trust simultaneously. The immediate task was not to write better PRDs, it was to understand which parts of the system were entangled in ways that made everything hard, restructure around that reality, and then ship the Claims Center from concept to production with no prior precedent. Time-to-market for a new insurance product fell from many months to under a week. That kind of result comes from treating the product definition as load-bearing infrastructure, not as documentation. At Bundesagentur für Arbeit I owned a national labour-market analytics platform where the platform, payments flows, data pipelines and user-facing surface all had to be kept aligned across a geographically distributed team, the kind of cross-module coordination Unibuild's combined marketplace, provider OS and ERP/finance layer will require continuously.

My own company, construct8, is the most direct evidence for this role. I built a two-sided B2B SaaS marketplace from zero, alone, for the construction staffing market. I designed the anonymity-until-payment model that protects both sides, used WhatsApp and Telegram as the product surface to minimise onboarding friction, and wired LLM agents across the matching funnel so the platform operates with minimal manual intervention. The gaps I had to close, role definitions, permission logic, workflow states, notification triggers, edge cases in the payment

release flow, are exactly the gaps the posting describes. I closed them without a product team, which means I can also close them with one.

On the B2B SaaS and payments side: at Kvitt Payment Solutions I built a mobile P2P group payments product from zero to acquisition by Sparkasse, operating inside the girocard ecosystem. At Scheidt and Bachmann I owned POS and forecourt payment integrations in a fully SAFe setup. At AOK ITSCare I migrated a procurement e-commerce platform to Shopware for three insurers and roughly 20,000 employees. FinTech, payments, and e-commerce are not adjacent domains for me, they are where I have shipped.

The practical case study you mention for shortlisted candidates is the kind of filter I welcome. I am happy to take it on, and to share the full product blueprint documentation from construct8 as a concrete example of how I structure a complex platform from scratch. Please share examples of products where you personally owned product definition and delivery, I look forward to doing exactly that.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Senior Product Manager and Product Lead with 13 years of end-to-end ownership across B2B SaaS platforms, two-sided marketplaces, payments and workflow-heavy regulated products. I work directly with founders and executives to turn ambiguous ideas into a structured, buildable product, clear roles, permissions, statuses, edge cases and acceptance criteria before a single line of code is written. I have shipped across insurance, fintech, public-sector analytics, healthcare and construction staffing; I understand the full stack well enough to call out integration assumptions early and reduce rework downstream.

§ WHAT I CAN DO

Platform and marketplace product ownership: marketplace mechanics, provider-facing operating systems, two-sided onboarding, anonymity-until-payment flows, SLA and status modelling, role and permission design

Payments and FinTech: P2P and group payment UX, PSP integration, girocard ecosystem, POS and forecourt payment flows, payment release edge cases, FinTech regulatory awareness

B2B SaaS and e-commerce: multi-tenant platforms, insurance SaaS, procurement webshops, Shopware, claims workflow automation, underwriter and broker tooling

Requirements engineering and backlog ownership: user stories, acceptance criteria, definition of done, PRDs, epics, backlog refinement, sprint planning, UAT, Jira, Confluence, Figma, Miro

AI-native tooling: LLM agent design, agentic workflow automation (n8n), prompt engineering, human-in-the-loop design, EU AI Act awareness, prototyping with Claude Code, Lovable, Cursor, GitHub Copilot

Analytics and data: KPI definition, ETL pipeline ownership, Dagster, dbt, PostgreSQL, funnel and churn analysis, MicroStrategy, Matomo

Agile and scaled delivery: Scrum, Kanban, SAgile, ART, PI planning, GitOps with ArgoCD, CI/CD, Kubernetes, Docker

Stakeholder and leadership: founder-facing alignment, C-level reporting, cross-functional team restructuring, workshop facilitation, Deputy IT Security Officer

§ PROFESSIONAL EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · B2B MARKETPLACE 2025-2026

Two-sided construction staffing marketplace, zero to one alone. Marketplace mechanics, anonymity-until-payment model, LLM agents across the funnel, WhatsApp/Telegram as product surface.

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI PLATFORM 2024-2025

FCAS AI and data platform. Introduced GitOps with ArgoCD: rollout from days to 30 minutes, hotfix-capable. Redirected product from UI-led to developer-code-first based on instrumented usage data.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS PLATFORM 2023-2024

National labour-market data platform. Integrated test automation, introduced Dagster and dbt, migrated bare-metal to containers, carried full UI relaunch. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

iOS/Android patient app. Cut roadmap to top 10% of features: user acceptance rose fivefold. Implemented CGM/KIS integration personally: digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

B2B SaaS platform for insurers, brokers and underwriters. Restructured 18-person delivery org into three lean teams; attrition fell from near-total to one departure. Shipped Claims Center concept to production; time-to-market for new insurance products cut from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · PAYMENTS AND POS 2021-2022

Retail and forecourt payments, SAFe. Moved research results to production across a matrix organisation with agile release trains and PI planning.

BUNDESDRUCKEREI · INTERIM PRODUCT OWNER · SECURE DATA PLATFORM 2021

Government identity and data management for Robert Koch Institute (DIM, DESH programmes).

AOK ITSCARE · PROXY PRODUCT OWNER · B2B PROCUREMENT E-COMMERCE 2019-2020

Migrated legacy system to Shopware for three AOK insurers and ~20,000 employees; platform still in production.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK 2017-2018

WLAN rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE ENCRYPTION 2016-2021

Hardware and software for enterprise quantum-resistant encryption. Shipped three-layer product installing in under two minutes; later Chair of the board.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH PAYMENTS 2013-2018

Mobile P2P group payments product built from zero, acquired by Sparkasse and operated inside the girocard ecosystem.
