

Philipp Hilbert. *Lead Product Manager, B2C Consumer Platforms.*

Positioning, 13 years owning end-to-end product in regulated, high-stakes environments, now ready to bring that rigour to a fast-scaling consumer platform in the Middle East.

§ WHY TALENT SEED'S CLIENT

A platform undergoing deliberate transformation, smaller teams, stronger discovery discipline, outcome-based roadmaps, is the right environment for someone who wants to raise the bar rather than maintain a status quo. The explicit focus on the full B2C lifecycle, from acquisition through retention and renewal, maps precisely to where I have done my most consequential work: finding where friction lives, running cheap experiments to validate hypotheses, and then committing engineering resources only to what the evidence supports. The fact that this role includes coaching PMs and challenging feature-led thinking matters: I have rebuilt a struggling 18-person delivery organisation once already and understand that culture change travels at the speed of concrete examples. *That is exactly the environment where my strengths compound.*

§ HONEST FRAMING

My consumer platform experience to date has been in marketplace and two-sided platform contexts (construct8) and in payment products (Kvitt), rather than in a large-scale B2C subscription or loyalty product. The mechanics I am strong in, habitual behaviour modelling, funnel instrumentation, churn analysis, and retention-focused experimentation, transfer directly; the specific domain context of a Middle East consumer platform is new territory I will close fast.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo prototyping and spec generation
- **Lovable**, rapid front-end validation before engineering commits
- **Cursor / VSCode**, LLM-assisted implementation
- **GitHub Copilot**, accelerated story and edge-case coverage
- **n8n**, agentic workflow automation
- **Framer**, design-heavy concept prototyping
- **GPT**, research, synthesis, and stakeholder document drafts
- **Gamma.app**, fast deck and narrative artefacts

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

PostgreSQL, MongoDB, REST APIs, Python, Kotlin (Spring Boot), Kafka, Dagster, dbt, Kubernetes, ArgoCD, Docker, GitOps, Jenkins, CI/CD pipelines, Azure DevOps, GitLab, Matomo, MicroStrategy, Jira, Confluence, Figma, Miro, Shopware.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A two-sided B2C/B2B marketplace for construction staffing, built alone from zero.

- Matches construction firms with workers; removes the headhunter with an anonymity-until-payment model that protects both sides until commitment is established.
- WhatsApp and Telegram as the primary product surface, keeping acquisition cost near zero while meeting users where they already are.
- LLM agents across the funnel, sourcing, qualification, and matching, so one operator runs full day-to-day without a support team.
- Directly relevant: zero-to-one consumer product ownership, two-sided trust mechanics, and activation funnel design under a lean headcount constraint.

§ HOW I WOULD WORK AT TALENT SEED'S CLIENT

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow support tickets, session recordings, and existing dashboards to locate where users drop out of the activation and onboarding journey before forming a hypothesis or touching the roadmap.

WEEK 2

Instrument, then question.

Validate that the right funnel events are tracked end-to-end, identify the single highest-leverage friction point, and frame a testable assumption with a clearly stated success metric.

WEEK 3+

Ship, measure, repeat.

Run the first low-cost experiment, a copy change, a flow simplification, or a targeted prototype, and use the result to justify or kill the bigger engineering investment behind it.

I COVER LETTER

Dear Hiring Team,

The brief Talent Seed has shared describes something specific: a consumer platform that has decided it wants to grow up. Smaller teams, senior ownership, continuous discovery, outcome-based roadmaps, these are not slogans in your description, they are design decisions. That matters, because the organisations where I have done my best work were ones that had chosen to change how they built product, not just what they built.

My most direct parallel is the period at Rohde & Schwarz, where I joined a multinational AI data platform mid-build and found a delivery process that could not carry a hotfix without a multi-day rollout. I introduced GitOps with ArgoCD, cut rollout time from days to 30 minutes, and simultaneously redirected the entire product direction after instrumentation showed that the UI-led workflow nobody actually used was consuming the majority of engineering effort. Neither fix was dramatic; both required gaining the trust of architects, data scientists, and engineers across three countries and then using evidence rather than authority to change the course. Earlier, at EMIL Group, I inherited an 18-person delivery organisation in which the

senior engineers were leaving. I restructured it into three lean teams with their own leads, and attrition fell to a single departure. These are the mechanics your brief describes needing.

On the consumer side, my clearest ownership is Kvitt Payment Solutions, a mobile P2P group-payment product I built from zero and took to acquisition by Sparkasse inside the girocard ecosystem. More recently I built construct8, a two-sided construction staffing marketplace, alone, using LLM agents across the sourcing and qualification funnel so the platform could operate with minimal overhead. The activation, engagement, and trust mechanics in a two-sided consumer marketplace are precisely the problem space your posting describes: who activates, who goes dormant, what triggers repeat usage, and where the commercial levers sit.

I am comfortable in the data layer beneath those questions. At the Federal Employment Agency I owned a national analytics platform for policymakers and researchers, introduced Dagster and dbt to make quarterly data imports autonomous, and ran as Deputy IT Security Officer simultaneously. I can build and run queries, design dashboards, define the KPIs that matter, and distinguish a real retention signal from noise in the data. I use AI-assisted prototyping tools, Lovable, Claude Code, Cursor, daily, not aspirationally, and I can put a working prototype in front of users before the sprint review.

The Middle East market is new geography for me, and I say that plainly. What I bring is a method that works regardless of market: start with genuine customer discovery, frame problems before solutions, run cheap experiments before large bets, and keep the commercial and the customer lens in the same room. If the platform is undergoing the transformation your brief describes, that method is the contribution. I would welcome the conversation.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager with 13 years of end-to-end ownership across regulated industries, insurance, healthcare, public-sector analytics, payments, and defence AI, plus direct founder experience taking two consumer products from zero to production. I run continuous discovery, translate customer and commercial constraints into prioritised roadmaps, and lead cross-functional teams through agile delivery. My record includes rebuilding underperforming delivery organisations, instrumenting and redirecting products mid-flight using behavioural data, and shipping from first principles when there is no playbook to inherit.

§ WHAT I CAN DO

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, A/B testing, user research and interviews, prototyping, funnel and churn analysis, KPI definition, go-to-market support, product lifecycle management.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); full prototyping with Claude Code, GitHub Copilot, Cursor and Lovable.

Analytics and Data: funnel and churn analysis, KPI definition, Matomo, MicroStrategy, ETL, Dagster, dbt, PostgreSQL.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Agile and Scaled Delivery: Scrum, Kanban, SAgile, ART, PI planning.

Technical Environments: Kubernetes, OpenShift, Docker, GitOps with ArgoCD, CI/CD, Jenkins, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka.

Stakeholder and Leadership: executive reporting, cross-functional team leadership, workshop facilitation, conflict resolution, change management.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE / AI PLATFORM 2024-2025

Introduced GitOps with ArgoCD across a multinational team; cut rollout time from days to 30 minutes and made the platform hotfix-capable. Instrumented competing workflows, identified zero adoption of the UI-led design, and redirected the product to developer-code-first, the path users actually took.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

Integrated test automation into the Jenkins pipeline, introduced Dagster and dbt for autonomous data imports, and carried a full UI relaunch while migrating a bare-metal system to containers. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE 2023-2023

Cut a three-person team's roadmap to the top 10% of features; user acceptance rose more than fivefold. Implemented the CGM/KIS interface personally, reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS / FINTECH-ADJACENT 2022-2022

Restructured an 18-person organisation into three lean teams; attrition fell from near-total exodus to one departure. Shipped the Claims Center from concept to production, cutting time-to-market for a new insurance product from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL / PAYMENTS 2021-2022

Moved research into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · INTERIM PRODUCT OWNER · GOVERNMENT / SECURE DATA 2021-2021

Data structures and identity management for the Robert Koch Institute platforms DIM and DESH.

AOK ITSCARE · PROXY PRODUCT OWNER · HEALTH INSURANCE / E-COMMERCE 2019-2020

Migrated a legacy procurement webshop to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY / IT 2019-2019

Full site IT modernisation end to end across multiple locations.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE 2017-2018

WLAN rollout across nine hospitals for a clinical network.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · B2C/B2B MARKETPLACE 2025-2026

Two-sided construction staffing platform, zero to one alone. Anonymity-until-payment trust model, WhatsApp and Telegram as product surface, LLM agents across the sourcing and qualification funnel.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY 2016-2021

Quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes; later Chair of the board.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH / P2P
PAYMENTS 2013-2018

Mobile group-based P2P payments, built from zero, acquired and operated by Sparkasse inside the girocard ecosystem.
