§ BEARING

Product manager with 13 years of end-to-end ownership across regulated industries, insurance, healthcare, public-sector analytics, payments, and defence AI, plus direct founder experience taking two consumer products from zero to production. I run continuous discovery, translate customer and commercial constraints into prioritised roadmaps, and lead cross-functional teams through agile delivery. My record includes rebuilding underperforming delivery organisations, instrumenting and redirecting products mid-flight using behavioural data, and shipping from first principles when there is no playbook to inherit.
