

Philipp Hilbert. *Senior Product Manager, Pro Onboarding.*

Positioning, I turn onboarding funnels into first-trade moments, 13 years owning product from discovery through shipped, in regulated and high-stakes environments.

§ WHY KRAKEN

Kraken Pro serves traders who already know what they want, the onboarding job is to get out of their way fast and build enough trust that they commit to a first trade. That is a specific, measurable problem, and the posting names it precisely: get clients to their "aha moment" faster and with more conviction. I have done the equivalent of this twice, at CLINET Platforms I cut a five-feature roadmap to the essential 10% and user acceptance rose more than fivefold, and at EMIL Group I shipped the Claims Center from zero to production while the organisation was losing engineers. The domain is different; the structural challenge is identical. *That is the kind of funnel work I want to own.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, day-to-day coding assistance
- **Cursor**, LLM-assisted editing and context navigation
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy wireframes
- **GPT**, analysis, drafting, edge-case generation
- **n8n**, agentic workflow automation

- **Gamma.app**, stakeholder decks
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, PostgreSQL, SQL, Kotlin (Spring Boot), MongoDB, REST APIs, Kafka, Django, Dagster, dbt, Kubernetes, Docker, ArgoCD, GitOps, CI/CD with Jenkins, GitLab, Azure DevOps, Jira, Confluence, Figma, Miro, Matomo, MicroStrategy.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/hilbertp) →

Two-sided B2B marketplace matching construction firms with workers, built and run solo.

- Anonymity-until-payment model that protects both sides until commitment is made.
 - WhatsApp and Telegram as the product surface; LLM agents across the funnel so one person runs day-to-day operations.
 - Funnel and conversion analysis in SQL from day one.
 - Demonstrates the exact skills this role needs: funnel ownership, AI tooling in production, and solo zero-to-one execution.
-

§ HOW I WOULD WORK AT KRAKEN

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the Pro onboarding funnel end to end, pull the drop-off data, talk to recent activations, and map every friction point against the "first trade" moment the posting describes.

WEEK 2

Slice and prioritise.

Take the friction map to Design and Data, align on the two or three highest-leverage bets, and write the first set of specs with clear success metrics attached.

WEEK 3+

Ship and iterate.

Run the first improvement live, instrument it, close the loop with the team, and set the cadence for continuous funnel review that makes onboarding a compounding advantage.

I COVER LETTER

Dear Kraken team,

Kraken Pro's onboarding challenge is specific: get a trader who already has intent across the line to a first trade, fast, without losing their trust at the friction points that make them leave. I have owned versions of this problem before, not in crypto, but in contexts where the stakes of dropping off were just as high and the margin for error was just as thin.

At CLINET Platforms I inherited a five-person team trying to ship a roadmap three times too long. I cut it to the top 10% of features against agreed success measures and user acceptance rose more than fivefold. At EMIL Group I shipped the Claims Center from concept to production in a period when the organisation was actively losing senior engineers. In both cases the job was the same: find the moment where value is actually delivered, remove everything blocking it, and measure whether it happened.

I am an active crypto trader and have been for eight years. I use Kraken Pro, Hyperliquid, Jupiter, 1inch, and Across Protocol regularly. I work with liquidation heatmaps on Coinglass and Hyblock Capital. I understand perpetual futures, spot execution, DEX aggregation, and cross-chain mechanics from the inside. When I look at the Pro onboarding funnel, I am not guessing at what a trader needs, I am one.

On the AI side: I use Claude Code, Cursor, GitHub Copilot, Lovable, and n8n in my daily workflow, not as experiments but as production tools. I build agentic workflows for funnel automation, use AI to surface friction points in data, and prototype features in Lovable before taking them to engineering. The posting asks for fluency with AI tools to analyse data, personalise experiences, and speed up how a PM works. That describes how I already work.

I am based in Berlin, available remotely, and can start within four weeks.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Senior Product Manager with 13 years of product ownership in regulated industries, including crypto, fintech, insurance, healthcare, and public-sector analytics. I run continuous discovery, own the funnel from first contact through activation, and turn user research and data into a prioritised roadmap. I am an active crypto trader with eight years of hands-on experience across CEX and DEX venues including Kraken Pro, Hyperliquid, and Jupiter, with deep familiarity with spot trading, perpetual futures, DEX aggregation, and cross-chain execution. I lead cross-functional teams through agile delivery and use AI tools, Claude Code, Cursor, Lovable, n8n, as production instruments, not experiments.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design. Instrumented two competing workflows; the UI-led path recorded exactly zero clicks.
- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes across multinational teams and making the platform hotfix-capable.
- Led a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023 - 07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers, giving the team autonomous control of its own environments, while carrying a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- A five-person team faced a roadmap it could not deliver. I cut it to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis dropped from 30 minutes to 5 from form to database.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent, and cut time-to-market for a new insurance product from months to less than a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

Retail and payments, POS and forecourt systems.

- Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 - 06/2021

Government, secure data platform.

- Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

Health insurance, B2B procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production. Backlog refinement, user stories and acceptance criteria in Jira.

PROJECT LEAD, ENERCON, WISMAR / MAGDEBURG | 04/2019 - 12/2019

Wind energy, full site IT modernisation end to end.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017 - 06/2018

Healthcare, clinical network. Wifi infrastructure rollout across nine hospitals.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - 06/2026

- Construction staffing, two-sided B2B marketplace. Zero to one alone: anonymity-until-payment model, WhatsApp and Telegram as the product surface, LLM agents across the funnel, and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

- IT security, quantum-secure encryption. Shipped a three-layer product that installs in under two minutes to meet enterprise buyers' constraints. Later Chair of the board.

CO-FOUNDER, CDO AND CFO, SMART SOIL TECHNOLOGIES, BERLIN | 03/2018 - 08/2021

- Nanotechnology and agriculture. Took a fertiliser product from laboratory to investor rounds, owning financial planning and investor reporting.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

- Fintech, mobile group-based P2P payments. Built from zero to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

Product Management: continuous discovery, funnel and activation analysis, user research and interviews, A/B testing, MVP definition, PoC, product vision and roadmap, prioritisation, go-to-market support, product lifecycle management.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable, n8n.

Analytics and Data: funnel and churn analysis, KPI definition, Matomo, MicroStrategy, ETL, Dagster, dbt, PostgreSQL, SQL.

Crypto and Web3: CEX/DEX mechanics, spot trading, perpetual futures, DEX aggregation, cross-chain bridging, liquidation analysis, Coinglass, Hyblock Capital, Hyperliquid, Jupiter, 1inch, Across Protocol.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe, ART, PI planning, WIP limits, CI/CD, GitOps with ArgoCD.

Technical Environments Owned: Kubernetes, Docker, OpenShift, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin, Django, PostgreSQL, MongoDB, Kafka.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
