PROFILE

Principal Product Manager and product owner with 13 years of product ownership in B2B SaaS, platform, and regulated industries. I have led API-first platform products, admin and configuration surfaces, and cross-functional teams of 15+ across public sector, insurance, defence, and healthcare. I run continuous discovery, translate complex technical constraints into clear requirements, and drive agile delivery from roadmap to launch.

HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
- On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
- Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
- I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
