

Philipp Hilbert. *Lead product manager, customer-facing platform growth.*

Positioning, I have spent 13 years turning product strategy into shipped outcomes in regulated B2B environments, and I want to do that for Veriff's Customer Portal.

§ WHY VERIFF

The Customer Portal sits at the intersection of product usage, commercial growth, and enterprise trust, a rare combination where discovery discipline directly drives revenue. The detail that caught my attention is the explicit goal of turning the portal into a window into Veriff's accuracy and fraud advantage for enterprise customers: that is a hard problem, not a feature request. It requires someone who can talk to a demanding enterprise account, understand what they actually need versus what they asked for, and build a product that sells itself through clarity. The challenge of moving from a self-serve growth surface to an enterprise trust layer is exactly the kind of strategic step I want to own. *That is the kind of scope where product thinking compounds fast.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, paired coding and code review
- **Cursor**, context-aware edits across large files
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy mock-ups
- **GPT**, discovery synthesis and edge-case generation

- **n8n**, agentic workflow automation
 - **Gamma.app**, stakeholder-facing decks and briefs
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps rollout and rollback, Jenkins, CI/CD, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin with Spring Boot, PostgreSQL, MongoDB, Kafka, Dagster, dbt, ETL pipelines, Jira, Confluence, Figma, Miro, Matomo, MicroStrategy.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A two-sided B2B marketplace matching construction firms with workers, built to remove the headhunter from the hire.

- Anonymity-until-payment model that protects both sides until commitment is made.
 - WhatsApp and Telegram as the product surface, with LLM agents running the funnel end to end.
 - Funnel and conversion analysis in SQL; one person runs the full day-to-day.
 - Directly relevant to Veriff's self-serve growth surface: this is the same problem of converting strangers into committed, paying users through product alone.
-

§ HOW I WOULD WORK AT VERIFF

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

I shadow the Customer Portal from both sides, sitting with customer success on enterprise calls and walking through the self-serve funnel myself, to understand where the portal helps and where it creates friction in the discovery, try, buy, expand flow the posting describes.

WEEK 2

Map the metrics.

I audit what success is currently measured against in the portal, check where instrumentation is missing, and draft a first version of the outcome metrics I would hold the team to before any new build starts.

WEEK 3+

Ship and close loops.

I take the sharpest gap from discovery, scope it as a bounded problem statement, align with engineering and GTM, and get something in front of customers fast enough to learn from it before committing to the next phase.

I COVER LETTER

Dear Veriff team,

Veriff's Customer Portal is being asked to do two things at once: let customers operate the product day to day, and act as the commercial surface where they discover, expand, and grow. Those two purposes pull in different directions, and the PM role that holds them together is a hard one. I have spent 13 years in exactly that kind of tension, regulated B2B environments where the product has to earn trust and drive revenue at the same time.

At Rohde & Schwarz I owned an AI and data platform for the FCAS European programme, running continuous discovery across multinational engineering teams and redirecting product strategy when the data said the original direction was wrong. Pipeline runs went up 200% after I instrumented competing workflows and found that the visually polished UI-led path recorded exactly zero clicks. At the Bundesagentur für Arbeit I owned a national labour-market analytics platform as sole PM, managed a full ETL migration, and cut data-update time by close to 75% by introducing Dagster and dbt. Both roles required ruthless prioritisation in environments with more good ideas than capacity, and both required building credibility with engineering and data science partners who did not report to me.

The commercial dimension of this role is one I take seriously. At Kvitt Payment Solutions, a mobile P2P payments product I co-founded, we grew from zero to acquisition by Sparkasse inside the girocard ecosystem. I understand that what gets built has to map to how the business grows, in Veriff's case, that means the Customer Portal's roadmap needs to be tied explicitly to acquisition, upsell, retention, and the revenue signals that come from enterprise customers trusting what they see. The shift from Station as a self-serve growth surface to a window into Veriff's accuracy and fraud advantage is a strategic bet I find compelling, and one where discovery with demanding enterprise accounts is the core discipline.

I work AI-natively: Claude Code, GitHub Copilot, Cursor, Lovable, and n8n are part of how I run discovery and delivery today, not credentials I list. I am also building a two-sided marketplace solo right now, which keeps my zero-to-one instincts sharp alongside the enterprise-scale PM work in my background.

The role is designed to start as an IC and grow into team leadership. That is the right order. Authority earned through the quality of thinking, not a title, I agree with how Veriff frames it.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product manager and product owner with 13 years of product ownership in regulated B2B SaaS environments: defence AI, public-sector analytics, insurance, healthcare, payments and retail. I own continuous discovery, connect product bets to revenue and retention, and lead cross-functional teams through agile delivery. I am equally comfortable at the messy front end of a problem and in the discipline of shipping.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
- On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
- Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
- I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design; instrumented two competing workflows and the UI-led path recorded exactly zero clicks.
- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes and making the platform hotfix-capable across multinational teams.
- Led continuous discovery and delivery across a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023 - 07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt, cutting quarterly data-update time by 75% and removing manual hand-holding from imports and new indicators.
- Carried a full UI relaunch and large ETL migration while migrating the system from bare-metal to containers, giving the team autonomous control of its environments.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut an undeliverable roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital KIS workflows; digital anamnesis time dropped from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads; attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent, and cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

Retail and payments. POS and forecourt systems in a fully SAFe setup.

- Moved research results into production across a matrix organisation via agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 - 06/2021

Government. Secure data platform for Robert Koch Institute programmes DIM and DESH.

- Data structures and identity management under strict compliance constraints.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

Health insurance. B2B procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - PRESENT

Construction staffing. Two-sided B2B marketplace, zero to one.

- Anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel; funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

IT security. Quantum-secure encryption hardware and software.

- Shipped a three-layer product that installs in under two minutes to overcome enterprise objections; later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

Fintech. Mobile group-based P2P payments.

- Built from zero to acquisition; acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

Product Management: continuous discovery, product vision and product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable.

Analytics and Data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe, ART, PI planning.

Technical Environments Owned: Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
