

Philipp Hilbert. *Senior Product Manager, customer data platforms.*

Positioning, I have 13 years shipping SaaS products in regulated, data-heavy environments, and I am ready to own enterprise platform strategy at Tealium from day one.

§ WHY TEALIUM

Tealium sits at the intersection of two problems I find interesting: making messy customer data trustworthy at scale, and using that data to power AI and machine learning in production. The job description calls out the need to own end-to-end strategy for products with large upstream and downstream dependencies, that is exactly the shape of work I have done across defence AI platforms, national analytics infrastructure, and B2B SaaS. The detail that Tealium is a 2025 Gartner Magic Quadrant Leader for CDPs while still describing itself as fast-moving tells me the product culture has not stagnated into process for its own sake. *That combination is rare and worth joining.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and refactor work
- **GitHub Copilot**, coding assistance across projects
- **Cursor / VSCode**, AI-assisted development environment
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy interface exploration
- **GPT**, discovery research and edge-case generation
- **n8n**, agentic workflow automation
- **Gamma.app**, stakeholder decks and roadmap comms

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, GitLab, Azure DevOps, Python, Kotlin with Spring Boot, Django, PostgreSQL, MongoDB, Kafka, REST APIs, Dagster, dbt, ETL pipelines, Matomo, MicroStrategy, Jira, Confluence, Figma.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built zero to one alone.

- Anonymity-until-payment model that protects both sides until commitment is confirmed.
 - WhatsApp and Telegram as the primary product surface, with LLM agents handling the funnel end to end.
 - Funnel and conversion analysis in SQL; one person runs the day-to-day because the agents do the labour.
 - Demonstrates the kind of resourceful, autonomous product execution Tealium describes as a core requirement for this role.
-

§ HOW I WOULD WORK AT TEALIUM

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

I shadow the sales and customer success workflows the posting names, map where data quality or activation breaks down for enterprise customers, and read every open discovery ticket before forming any opinion.

WEEK 2

Slice the backlog.

I take one high-dependency feature, draft user stories with acceptance criteria, surface the upstream and downstream risks, and align with engineering on what can ship in the next cycle.

WEEK 3+

Ship and close loops.

I own the first increment end to end, contribute to the go-to-market enablement, and set the measurement baseline so the team can see whether the value landed.

I COVER LETTER

Dear Tealium team,

I am applying for the Sr. Product Manager role on your Enterprise Product Team. Tealium's position as a platform that turns raw customer data into clean, consented, and AI-ready signals is a product problem I have been working adjacent to for years, across a national labour-market analytics platform, a defence AI and data platform for FCAS, and several B2B SaaS products in regulated industries. The CDP space sits at the centre of that work, and I want to own a piece of it directly.

Your posting asks for someone who can drive strategy and execution independently, work across large upstream and downstream dependencies, and use AI to accelerate discovery and delivery. At Rohde & Schwarz I led the data platform for the FCAS European programme, managing a cross-functional team of 15 engineers and data scientists, and redirected the product strategy after instrumenting two competing workflows, the more beautiful UI-led approach recorded exactly zero clicks. At the Bundesagentur für Arbeit I owned a national analytics platform end to end, migrated a bare-metal system into containers, and cut data update time by 75% by introducing Dagster and dbt. Both roles required the same autonomous, data-driven decision-making your job description calls out.

I use AI tools daily, not as a credential. I prototype with Claude Code and Lovable, automate workflows with n8n, and use LLM-assisted spec and edge-case generation to compress the time between discovery and a working user story. That acceleration is part of how I kept delivery moving as a solo founder building construct8, a two-sided marketplace, and it is the same approach I would bring to Tealium's product workflows.

The cross-functional scope of this role, partnering with sales, customer success, engineering, and product marketing, is where I do some of my clearest work. At EMIL Group I restructured an 18-person delivery organisation into three lean teams, stopped near-total senior engineer attrition with one structural change, and shipped the Claims Center from concept to production in the same period. I know how to hold the commercial and technical threads at the same time without losing either.

My English is C2 and I am based in Berlin with no visa complications for a Poland-remote role. I am available within four weeks of an offer.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Senior Product Manager with 13 years of product ownership across B2B SaaS, public-sector analytics, defence AI platforms, insurance, healthcare, and payments. At Tealium the relevant thread is data platform product management: I have owned ETL pipelines, analytics infrastructure, and AI/machine learning data products end to end, from user research through agile delivery to go-to-market support. I run continuous discovery, translate strategy and user needs into a prioritised roadmap, and lead cross-functional teams through Scrum and Kanban.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.
- Championed GitOps delivery with ArgoCD, cutting rollout time from days to 30 minutes and making the platform hotfix-capable for a cross-national team.

- Led a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics platform for SaaS, policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving almost 75% of time per data update.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut a roadmap a five-person team could not deliver to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis went from 30 minutes to 5 minutes form to database.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent, and cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHEGLADBACH | 09/2021-03/2022

Retail and payments. POS and forecourt systems in a fully SAFe setup with agile release trains and PI planning.

- Moved research results into production across a matrix organisation.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021-06/2021

- Government secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

- Health insurance B2B procurement webshop. Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017-06/2018

- Healthcare clinical network. Wifi infrastructure rollout across nine hospitals.
-

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025-PRESENT

Construction staffing, two-sided B2B marketplace. Zero to one alone.

- Anonymity-until-payment model with LLM agents across the funnel; one person runs the day-to-day.
- Funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016-12/2021

IT security, quantum-secure encryption hardware and software.

- Shipped a three-layer product that installs in under two minutes after enterprise buyers rejected long installation timelines. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013-11/2018

Fintech, mobile group-based P2P payments.

- Built from zero to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.
-

§ SKILLS

Product Management: continuous discovery, product vision, product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, user stories, acceptance criteria, backlog refinement, prototyping, product lifecycle management, go-to-market support.

Data and Analytics: ETL (extract, transform, load), Dagster, dbt (data build tool), PostgreSQL, funnel and churn analysis, KPI definition, Matomo, MicroStrategy, Data pipelines, AI and machine learning data product ownership.

Agile and Scaled Delivery: Scrum, Kanban, SAFe (Scaled Agile Framework), ART, PI planning, sprint planning, story-point estimation, velocity and burndown, Jira, Confluence.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable, Framer, n8n.

Platform and SaaS: transform customer data infrastructure, platform strategy, upstream and downstream dependency management, GitOps with ArgoCD, Kubernetes, Docker, CI/CD, Jenkins, REST APIs, Python, PostgreSQL, MongoDB, Kafka.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
