

Philipp Hilbert. *Senior Product Manager, customer data platforms.*

Positioning, I have 13 years shipping SaaS products in regulated, data-heavy environments, and I am ready to own enterprise platform strategy at Tealium from day one.

Dear Tealium team,

I am applying for the Sr. Product Manager role on your Enterprise Product Team. Tealium's position as a platform that turns raw customer data into clean, consented, and AI-ready signals is a product problem I have been working adjacent to for years, across a national labour-market analytics platform, a defence AI and data platform for FCAS, and several B2B SaaS products in regulated industries. The CDP space sits at the centre of that work, and I want to own a piece of it directly.

Your posting asks for someone who can drive strategy and execution independently, work across large upstream and downstream dependencies, and use AI to accelerate discovery and delivery. At Rohde & Schwarz I led the data platform for the FCAS European programme, managing a cross-functional team of 15 engineers and data scientists, and redirected the product strategy after instrumenting two competing workflows, the more beautiful UI-led approach recorded exactly zero clicks. At the Bundesagentur für Arbeit I owned a national analytics platform end to end, migrated a bare-metal system into containers, and cut data update time by 75% by introducing Dagster and dbt. Both roles required the same autonomous, data-driven decision-making your job description calls out.

I use AI tools daily, not as a credential. I prototype with Claude Code and Lovable, automate workflows with n8n, and use LLM-assisted spec and edge-case generation to compress the time between discovery and a working user story. That acceleration is part of how I kept delivery moving as a solo founder building construct8, a two-sided marketplace, and it is the same approach I would bring to Tealium's product workflows.

The cross-functional scope of this role, partnering with sales, customer success, engineering, and product marketing, is where I do some of my clearest work. At EMIL Group I restructured an 18-person delivery organisation into three lean teams, stopped near-total senior engineer attrition with one structural change, and shipped the Claims Center from concept to production in the same period. I know how to hold the commercial and technical threads at the same time without losing either.

My English is C2 and I am based in Berlin with no visa complications for a Poland-remote role. I am available within four weeks of an offer.

Best regards, *Philipp Hilbert*
