

Philipp Hilbert. *Senior Product Manager, customer data platforms.*

Positioning, I help enterprise SaaS teams turn complex data infrastructure into products that customers actually adopt.

§ WHY TEALIUM

Tealium sits at a rare intersection: real-time data infrastructure that is now the on-ramp for enterprise AI adoption. The posting calls out clean, consented, and actionable data as the fuel for machine learning and personalisation at scale, which is exactly the kind of platform problem I have spent years on. At Bundesagentur für Arbeit I owned a national labour-market analytics platform and drove a full ETL migration to Dagster and dbt that cut data-update time by 75%. That is the same class of problem: upstream dependencies, downstream consumers, and a product that breaks when the data is wrong. *That operational depth is what I would bring to day one.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, coding assistance and review
- **Cursor / VSCode**, AI-assisted development
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy prototypes
- **Gamma.app**, decks and stakeholder docs
- **n8n**, agentic workflow automation
- **GPT**, discovery synthesis and edge-case generation

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Git, GitLab, Azure DevOps, Dagster, dbt, PostgreSQL, MongoDB, Kafka, REST APIs, Python, Kotlin (Spring Boot), ETL pipelines, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A two-sided B2B marketplace for construction staffing, built solo from zero.

- Anonymity-until-payment model that protects both firms and workers until commitment is made.
 - WhatsApp and Telegram as the product surface, with LLM agents running the funnel end to end.
 - Funnel and conversion analysis in SQL; one person operates the full day-to-day.
 - Demonstrates the autonomous, AI-native execution Tealium is asking for in this role.
-

§ HOW I WOULD WORK AT TEALIUM

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow customer success and sales calls to understand how enterprise customers instrument the Customer Data Hub today, then map the upstream-to-downstream dependency chain for the features I would own.

WEEK 2

Validate, slice, prioritise.

Pick the two or three open roadmap questions with the most uncertainty and run fast discovery: user interviews plus data from the platform's own usage signals to separate real pain from assumed pain.

WEEK 3+

Ship, measure, close loops.

Write the first user stories with engineering, agree acceptance criteria and definition of done, and get the first slice into a sprint, so the team has momentum and I have a baseline to measure against.

I COVER LETTER

Dear Tealium team,

I am applying for the Sr. Product Manager role on the Enterprise Product Team. Tealium's positioning as the data foundation for enterprise AI strategies is the specific kind of platform problem I want to work on next. Providing clean, consented, and actionable data so that machine learning and personalisation actually work at scale is a harder product challenge than most companies admit, and the job description shows you understand that.

My background fits the role directly. I have 13 years of product ownership across regulated industries, with the last several years spent on data platform products and SaaS infrastructure. At Bundesagentur für Arbeit, I owned a national labour-market analytics platform, drove the full migration from bare-metal to containerised environments, and introduced Dagster and dbt to replace fragile manual ETL runs. That cut data-update time by roughly 75% and gave the team autonomous control over its own environments. At Rohde & Schwarz, I led the internal AI and data platform for the FCAS European defence programme, managed a cross-functional team of 15 engineers and data scientists, and redirected the product strategy based on instrumented workflow analysis, increasing pipeline runs by 200% by deprioritising a UI that nobody used. Those are the kinds of upstream and downstream dependency problems Tealium's enterprise products sit inside.

I work in a fully AI-native way. I use Claude Code, GitHub Copilot, Cursor, Lovable, and n8n for agentic workflows daily, not as credentials but as how I actually run discovery, prototyping, and spec generation. I also have hands-on experience with user story writing, backlog management, and agile delivery across Scrum, Kanban, and SAFe. I have shipped features from concept to production in B2B SaaS insurance at EMIL Group, in healthcare at CLINET Platforms, and in payment infrastructure through Kvitt Payment Solutions, which was acquired into the Sparkasse girocard ecosystem.

On cross-functional collaboration: at EMIL Group I inherited an 18-person delivery organisation losing its senior engineers and its client trust. I restructured it into three lean teams with their own leads, attrition dropped to a single departure, and client relationships recovered. That kind of stakeholder alignment, across engineering, sales, customer success, and leadership,

is what the role description asks for, and I have done it in environments more turbulent than most.

I would welcome the chance to speak about the Enterprise Product Team's current roadmap and where I could add the most value quickly.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Senior Product Manager with 13 years of product ownership in SaaS, data platform, and regulated-industry products. I have owned full roadmaps for data infrastructure, ETL platforms, and B2B SaaS tools used by enterprise customers across public sector, insurance, healthcare, and payments. I run continuous discovery, translate strategy and user needs into prioritised roadmaps and user stories, and lead cross-functional teams through agile delivery (Scrum, Kanban, SAFe).

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
- On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
- Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
- I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.
- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes across multinational teams and making the platform hotfix-capable.
- Led a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt to replace manual ETL runs, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers, giving the team autonomous control of its environments, while carrying a full UI relaunch and a large ETL migration in the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital KIS workflows, reducing digital anamnesis time from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams; attrition fell from a near-total exodus to a single departure.
- Shipped the Claims Center from concept to production and cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021-03/2022

Retail and payments, POS and forecourt systems.

- Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021-06/2021

- Government, secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

- Health insurance, B2B procurement webshop. Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; backlog refinement, user stories and acceptance criteria in Jira.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017-06/2018

- Healthcare, clinical network. Wifi infrastructure rollout across nine hospitals.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025-PRESENT

Construction staffing, two-sided B2B marketplace.

- Built zero to one alone: anonymity-until-payment model, WhatsApp and Telegram as the product surface, LLM agents across the funnel, and funnel analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016-12/2021

IT security, quantum-secure encryption hardware and software.

- Shipped a three-layer product that installs in under two minutes to meet enterprise buyer requirements; later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013-11/2018

Fintech, mobile group-based P2P payments.

- Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

Product Management: continuous discovery, product vision and product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, user stories, acceptance criteria, backlog refinement, sprint planning, release planning, UAT.

Data and Analytics: ETL (extract, transform, load), Dagster, dbt (data build tool), PostgreSQL, funnel and churn analysis, KPI definition, Matomo, MicroStrategy, SQL.

AI Products and Tooling: AI and machine learning platform product ownership, LLM agents, agentic workflows, prompt and context engineering, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable, n8n.

Agile and Scaled Delivery: Scrum, Kanban, SAgile (Scaled Agile Framework), ART, PI planning, Jira, Confluence.

SaaS Platform and Technical Environments: Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka, Figma, Miro.

Governance and Business: GDPR (DSGVO), Deputy IT Security Officer, identity management, budget ownership, ROI reasoning, stakeholder management, C-level reporting.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
