

Philipp Hilbert. *B2B SaaS product manager with a payments and retail background.*

Positioning, Thirteen years of end-to-end product ownership in regulated B2B environments, including payments and POS systems, maps directly to what Uniware needs.

§ WHY UNIWARE

Uniware sits at a specific intersection I know well: payments, retail and institutional buyers who need software to just work every day. The posting calls out ownership of the full product lifecycle from discovery through adoption, not just backlog management, which is exactly how I think about the role. The explicit mention of AI-DLC across discovery, definition and construction is the part I want to lean into most. *That is the kind of product environment where I do my best work.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo requirements and spec work
- **GitHub Copilot**, daily coding and review assistance
- **Lovable**, rapid UI prototyping
- **Cursor**, VS Code-based AI-assisted development
- **GPT**, research, discovery synthesis, documentation drafts
- **Gamma.app**, stakeholder presentations
- **Miro**, workshop facilitation and journey mapping
- **Jira / Confluence**, backlog, sprint management and product documentation

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Shopware, PostgreSQL, REST APIs, Kubernetes, Docker, ArgoCD, Jenkins, GitOps, CI/CD, Dagster, dbt, Python, Kotlin, MongoDB, Kafka, Azure DevOps, Jira, Confluence, Figma.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built solo from zero.

- Anonymity-until-payment model that protects both sides until commitment is confirmed.
 - WhatsApp and Telegram as the primary product surface, keeping onboarding friction near zero.
 - LLM agents across the funnel so one person can run the day-to-day operation.
 - Demonstrates zero-to-one product thinking and AI-native execution relevant to Uniware's AI-DLC ambitions.
-

§ HOW I WOULD WORK AT UNIWARE

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow customer-facing teams and support queues to understand where the EPoS and payments workflows break down for real users, before touching the roadmap.

WEEK 2

Map and validate.

Run structured discovery sessions with two or three anchor customers to separate stated requests from underlying problems, and map those findings against the existing backlog.

WEEK 3+

Ship and measure.

Agree the first set of acceptance criteria and success measures with development and QA, get one meaningful item through the AI-DLC pipeline, and close the loop on Early Adopter feedback.

I COVER LETTER

Dear Hiring Team,

I am applying for the Product Manager role at Uniware Systems. I have spent 13 years owning product in regulated B2B environments, including payments, healthcare, insurance and public-sector data platforms. Payments and POS are not new territory for me: I founded Kvitt Payment Solutions, a mobile P2P payment product built inside the girocard ecosystem and later acquired by Sparkasse, and I have spent years working with payment flows, PSP integration and the kind of operational edge cases that only surface at scale.

The thing that caught my attention in this posting is the AI-DLC framing. Most organisations talk about AI as a feature to build; Uniware is treating it as a delivery method across discovery, definition and construction. That is a difference, and it matches how I already work. At Rohde & Schwarz I used workflow instrumentation to kill a UI-first strategy that had zero real usage, then redirected the team toward a developer-first approach that tripled pipeline runs. At the Bundesagentur für Arbeit I introduced Dagster and dbt into a quarterly data pipeline and cut the time per update by 75%. I use Claude Code, Copilot and Lovable daily, not occasionally.

Your customer base spans universities, financial institutions and motorway services: institutional buyers with real operational stakes and low tolerance for unreliable software. I know that environment. At CLINET Platforms I cut a five-person team's roadmap to the top 10% of features against agreed success measures and user acceptance rose more than fivefold. At EMIL Group I restructured an 18-person delivery organisation that was losing its senior engineers and its client trust: attrition dropped to a single departure and the teams shipped the Claims Center from concept to production. These were not smooth runs, and I did not manage them from a distance.

On the Early Adopter side: I understand why that programme exists and how to run it well. Feedback gathered after a wide launch is too late to be useful. The Bundesagentur role taught me to set specific success measures before construction and check them honestly afterwards, including the uncomfortable cases where the numbers said we were wrong.

I would be glad to talk through how my experience maps to the Uniware portfolio.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in regulated B2B environments, including payments, retail, insurance, healthcare and public-sector analytics. I run structured customer discovery, translate user needs and technical constraints into requirements and a prioritised roadmap, and lead cross-functional teams through agile delivery. Comfortable using AI tools across the full product lifecycle, from discovery and prototyping through requirements definition and documentation.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.
- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes across multinational teams and making the platform hotfix-capable.
- Managed a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics platform. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving almost 75% of the time per data update.
- Integrated test automation into the Jenkins pipeline, freeing several QA hours every week, and migrated a bare-metal system fully into containers.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis time dropped from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production and cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL &
CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021-03/2022

Retail and Payments. POS and forecourt systems.

- Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN |
03/2021-06/2021

- Government secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

Health insurance. B2B procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production. Managed backlog, user stories and acceptance criteria in Jira.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025-PRESENT

- Construction staffing B2B marketplace built solo from zero; anonymity-until-payment model, LLM agents across the funnel, SQL-based funnel and conversion analysis.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016-12/2021

- Quantum-secure encryption hardware and software; shipped a three-layer product that installs in under two minutes to meet enterprise buyer requirements. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013-11/2018

- Mobile group-based P2P payments product built from zero, acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, prototyping, user research and interviews, product lifecycle management, acceptance criteria, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, backlog refinement, sprint planning, story-point estimation, velocity, UAT, Jira, Confluence, Figma, Miro.

Payments and Retail: POS systems, PSP integration, P2P payment flows, girocard ecosystem, Shopware, retail and forecourt operations.

AI Products and Tooling: AI-DLC, LLM agents, agentic workflows, prompt engineering, human-in-the-loop design, AI governance, EU AI Act; Claude Code, GitHub Copilot, Cursor, Lovable.

Agile Delivery: Scrum, Kanban, SAFe, ART, PI planning, CI/CD, GitOps with ArgoCD.

Analytics and Data: KPI definition, funnel analysis, ETL, Dagster, dbt, PostgreSQL, Matomo.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
