

Philipp Hilbert. *AI coaching product from zero to shipped.*

Positioning, Thirteen years taking product from undefined to launched, now focused on AI-driven personalized experiences at consumer scale.

§ WHY SAMSUNG FOOD

Samsung Food sits at a hard intersection: coaching that has to feel personal across hundreds of millions of users, on devices that already know a lot about those users. The job description names the core tension clearly, coaching that arrives at the few moments that matter and stays quiet the rest of the time. That is a judgment problem, not a model problem, and it lives in the context and decision logic before any inference happens. The Vision AI food recognition work and the Samsung Health integration show this team ships real technical depth, not just app features. *That is the kind of problem I want to spend the next few years on.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, pair coding across Python and Kotlin
- **Cursor / VSCode**, LLM-assisted development environment
- **Lovable**, rapid front-end prototyping
- **GPT**, evaluation drafts and edge-case generation
- **n8n**, agentic workflow automation
- **Gamma.app**, stakeholder presentations
- **Framer**, design-heavy prototyping

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, REST APIs, Kafka, Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, Dagster, dbt, SQL, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built and run solo.

- Anonymity-until-payment model that protects both sides of the market until commitment is made.
 - WhatsApp and Telegram as the product surface, with LLM agents across the full funnel.
 - Funnel and conversion analysis in SQL; one person runs the day-to-day.
 - Proves end-to-end AI product delivery: context design, agent orchestration, and evaluation loops built without a team.
-

§ HOW I WOULD WORK AT SAMSUNG FOOD

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Read every existing spec, coaching schema, and evaluation framework; sit in on user research sessions; and draw the full decision logic from signal arrival to coaching output or silence.

WEEK 2

Audit the seams.

Map every organisational boundary, Europe, Asia, North America, and find where contracts, schemas, and ownership are unclear or assumed rather than written down.

WEEK 3+

Ship something falsifiable.

Define what the first release is allowed to get wrong, write the evidence criteria for coaching quality, and put a real build in front of real users.

I COVER LETTER

Dear Samsung Food team,

Samsung Health reaches hundreds of millions of people. The coaching capability you are building will decide whether that reach translates into moments that actually change behavior, or just noise that gets swiped away. That is a worthwhile problem to work on.

The job description names something I think about a lot: AI product failures are almost always context problems before they are model problems. What information reaches the model, when, in what format, and what is the minimum that produces a useful answer rather than the ideal one. I worked through that question on the FCAS AI and data platform at Rohde & Schwarz, where I redirected the product strategy after instrumenting two competing workflows and finding that the UI-led approach recorded exactly zero clicks. The developer-code-first path we switched to increased pipeline runs by 200%. The coaching equivalent is knowing when to send a message and when to stay quiet, and building the decision logic and evidence practice to tell the difference at scale.

I have taken products from undefined to launched across defence AI, public-sector analytics, insurance, and healthcare. At CLINET Platforms I cut a roadmap a five-person team could not deliver down to the top 10% of features, and user acceptance rose more than fivefold. At EMIL Group I shipped the Claims Center from concept to production with no precedent, while restructuring a delivery organisation that was losing its senior engineers. Both required the same thing: producing artefacts that survive being retold into other organisations without me in the room. That is what your job description calls "making decisions leave the room," and it is how I have worked across every multi-time-zone engagement I have had.

On the AI side, I build with these tools daily, Claude Code, GitHub Copilot, Cursor, Lovable, and I own the evaluation loop, not just the prompt. My construct8 project runs LLM agents across a full B2B marketplace funnel, with SQL-based funnel analysis to close the evidence loop. I understand the difference between a model that performs and a product that helps, and I know that the hard work is in the context design and the quality criteria, not the model selection.

Samsung Food's scale, tens of millions of users across phones, wearables, TVs, and appliances, and the depth of the Samsung Health data layer make this a rare opportunity to build coaching that could actually be useful at population scale. I would like to bring my product craft and my AI execution experience to that.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership across AI and data platforms, healthcare, insurance, and public-sector analytics. I run continuous discovery, translate strategy and user needs into a prioritised roadmap, and lead cross-functional teams through agile delivery across multiple time zones. I treat AI product failures as context problems first: what information reaches the model, when, and in what form.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design, the UI-led workflow recorded exactly zero clicks after instrumentation.
- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes across multinational teams, and making the platform hotfix-capable.
- Led a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023 - 07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers, giving the team autonomous control of its own environments, while carrying a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis time fell from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent; cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

Retail and payments, POS and forecourt systems.

- Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 - 06/2021

Government, secure data platform.

- Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

Health insurance, B2B procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

PROJECT LEAD, ENERCON, WISMAR / MAGDEBURG | 04/2019 - 12/2019

Wind energy, full site IT modernisation end to end.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017 - 06/2018

Healthcare, clinical network. Wifi infrastructure rollout across nine hospitals.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - 06/2026

- Built a two-sided B2B marketplace zero to one: anonymity-until-payment model, WhatsApp and Telegram as the product surface, LLM agents across the funnel, funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

- IT security, quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes to meet enterprise buyer constraints. Later Chair of the board.

CO-FOUNDER, CDO AND CFO, SMART SOIL TECHNOLOGIES, BERLIN | 03/2018 - 08/2021

- Nanotechnology and agriculture. Took a fertiliser product from laboratory to investor rounds, owning financial planning and investor reporting.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

- Fintech, mobile group-based P2P payments. Built from zero to acquisition by Sparkasse, inside the girocard ecosystem.

§ SKILLS

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); full prototyping with Claude Code, GitHub Copilot, Cursor and Lovable.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, story-point estimation, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Analytics and Data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe, ART, PI planning.

Technical Environments Owned: Kubernetes, OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin, SQL, PostgreSQL, MongoDB, Kafka.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership and financial planning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
