

Philipp Hilbert. *Product Manager for vertically integrated software.*

Positioning, 13 years shipping software products in regulated B2B markets, from discovery through to customer adoption.

§ WHY VESTA SOFTWARE GROUP

Uniware sits at an interesting intersection: established EPoS and payments infrastructure with a real mandate to modernise discovery and delivery through AI-DLC. That combination, a working product with real customers and a team actively rethinking how it builds, is more useful for a PM than a greenfield with no constraints or a legacy shop with no appetite to change. The explicit focus on following products through to customer adoption rather than stopping at release matches how I think about the job. *That orientation is exactly what I try to bring to every team I join.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec drafting and edge-case generation
- **GitHub Copilot**, daily coding assistance and review
- **Cursor**, in-IDE exploration and refactoring
- **Lovable**, rapid front-end prototyping
- **GPT**, research, synthesis and discovery prep
- **Gamma.app**, internal documentation and stakeholder decks
- **Jira + Confluence**, backlog management and product documentation
- **Miro**, workshop facilitation and journey mapping

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Python, Kotlin, Django, PostgreSQL, MongoDB, Kafka, REST APIs, Dagster, dbt, Git, GitLab, Azure DevOps, Shopware, Figma, Matomo, MicroStrategy.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers.

- Anonymity-until-payment model protecting both sides until commitment, with WhatsApp and Telegram as the product surface.
 - LLM agents across the funnel so one person runs the day-to-day operations.
 - Built zero to one alone: funnel and conversion analysis in SQL.
 - Demonstrates end-to-end PM ownership in a resource-constrained environment, directly relevant to Uniware's AI-DLC approach.
-

§ HOW I WOULD WORK AT VESTA SOFTWARE GROUP

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Sit in on customer support calls and walk through the EPoS and payments workflows with the account management team to understand where the real friction is before touching the roadmap.

WEEK 2

Map the roadmap.

Review what is in flight, what is queued, and what success measures exist for each item, then identify which items have clear acceptance criteria and which do not.

WEEK 3+

Ship with clarity.

Ensure the next significant project enters construction with a defined customer problem, measurable outcome, and agreed acceptance criteria, then stay close through Early Adopter rollout.

I COVER LETTER

Dear Vesta Software Group team,

I have 13 years of product ownership across regulated B2B software, including payments, insurance, healthcare, public-sector analytics and defence. Across those roles the common thread has been taking products from structured discovery through to customer adoption, not stopping at release or handoff, but staying in the loop through launch, Early Adopter feedback and the corrections that follow. That matches what Uniware describes for this role directly.

The payments and EPoS domain is familiar ground. I founded Kvitt Payment Solutions, a mobile P2P group-payments product that was acquired and operated by Sparkasse within the girocard ecosystem. I have also worked on POS and forecourt systems at Scheidt & Bachmann, where I moved research results into production in a fully SAFe setup. I understand how payments products behave differently from pure software, the edge cases, the compliance dependencies, the operational requirements that live alongside the UX ones.

On the AI-DLC piece: I use AI tools daily in product work. At Rohde & Schwarz I used Claude Code and GitHub Copilot to accelerate requirements drafting and edge-case generation on an internal AI and data platform. At construct8 I ran LLM agents across a two-sided marketplace funnel so a single person could operate the day-to-day. The tools I use include Claude Code, Cursor, Lovable, GPT and Gamma.app. I have also thought about where human review has to stay in the loop, particularly on requirements and acceptance criteria, where AI can draft but cannot own the decision.

At CLINET Platforms I inherited a five-person team with a roadmap it could not deliver. I cut it to the top 10% of features against agreed success measures, and user acceptance rose more than fivefold. At EMIL Group I restructured an 18-person delivery organisation that was losing engineers and client trust into three focused teams: attrition dropped from near-total exodus to a single departure. I raise those examples because Uniware's job description is clear that this role is about product outcomes, not backlog management, and that orientation is how I approach the work.

I would welcome a conversation about the role and about where Uniware is in its AI-DLC adoption.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in regulated B2B software, including payments, EPoS, insurance, healthcare and public-sector analytics. I run continuous discovery, translate customer problems and commercial priorities into a clear roadmap and prioritised backlog, and lead cross-functional teams through agile delivery. Strong commercial awareness with experience assessing opportunities against customer value, feasibility and business case.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Spearheaded development of the AI and data platform for FCAS, managing a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.
- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.

- Championed GitOps delivery with ArgoCD, reducing rollout time from days to 30 minutes and making the platform hotfix-capable.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023 - 07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving almost 75% of the time per data update.
- Integrated test automation into the Jenkins pipeline, freeing several QA hours every week.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital KIS workflows, reducing digital anamnesis from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent, and cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL &
CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

Retail and payments, POS and forecourt systems.

- Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 -
06/2021

- Government, secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

Health insurance, B2B procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

PROJECT LEAD, ENERCON, WISMAR / MAGDEBURG | 04/2019 - 12/2019

- Wind energy, full site IT modernisation end to end.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017 - 06/2018

- Healthcare, clinical network. Wifi infrastructure rollout across nine hospitals.
-

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - PRESENT

- Construction staffing B2B marketplace: anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel. Built zero to one alone; funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

- IT security, quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes to unblock enterprise sales. Later Chair of the board.

CO-FOUNDER, CDO AND CFO, SMART SOIL TECHNOLOGIES, BERLIN | 03/2018 - 08/2021

- Nanotechnology and agriculture. Took a fertiliser product from laboratory to investor rounds, owning financial planning and investor reporting.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

- Fintech, mobile group-based P2P Payments product. Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

Product Management: continuous discovery, product vision and product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, UAT, Jira, Confluence, Figma, Miro.

Payments and POS: P2P payments, girocard ecosystem, POS and forecourt systems, PSP integration, EPoS workflow design.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe, ART, PI planning.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); prototyping with Claude Code, GitHub Copilot, Cursor and Lovable.

Analytics and Data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy.

Technical Environments Owned: Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, Python, Kotlin, PostgreSQL, MongoDB, REST APIs, Git, Azure DevOps, Shopware.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
