§ WHY VESTA SOFTWARE GROUP

Univware's focus on EPoS, payments and catering technology is a direct match for work I have already done: I spent six months at Scheidt & Bachmann moving POS and forecourt payment research into production across a SAFe release train, and another year at EMIL Group shipping insurance platform features from concept to live. The role asks for someone who can run the full loop from customer discovery to adoption measurement, that is how I have worked at every employer in the last eight years. *That combination of payments background and end-to-end delivery ownership is what I would bring on day one.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and requirements work
- **GitHub Copilot**, daily coding assistance
- **Cursor**, IDE-native AI editing
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy prototyping
- **Gamma.app**, stakeholder presentations
- **GPT**, research and discovery synthesis
- **n8n**, agentic workflow automation

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Jira, Confluence, Figma, Miro, Kubernetes, ArgoCD, Docker, GitOps, Jenkins, CI/CD, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Dagster, dbt, SQL, Azure DevOps, GitLab, Shopware, Kafka, MicroStrategy, Matomo.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built solo from zero.

- Anonymity-until-payment model that protects both sides until commitment is confirmed.
 - WhatsApp and Telegram as the product surface, keeping onboarding friction near zero.
 - LLM agents across the funnel so one person runs day-to-day operations.
 - Proves I can own the full product lifecycle, discovery, build, launch and iteration, without a team around me.
-

§ HOW I WOULD WORK AT VESTA SOFTWARE GROUP

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow support tickets, account managers and at least two customer calls to understand where Univware's EPoS and payments workflows cause the most friction before touching the roadmap.

WEEK 2

Read, assess, prioritise.

Work through the existing backlog and roadmap with evidence from week one, flag where discovery is thin and propose the two or three areas where more customer input would change the priority order.

WEEK 3+

Ship, measure, iterate.

Pick one high-confidence item through definition and into construction with a clear problem statement, outcomes, user journeys, acceptance criteria and Early Adopter candidates identified.

I COVER LETTER

Dear Vesta Software Group team,

I am applying for the Product Manager role at Vesta Software Group. I have 13 years of product ownership across B2B SaaS, payments, healthcare, insurance and public-sector platforms, and the Univware portfolio sits directly in territory I know well.

My most relevant experience is at Scheidt & Bachmann Fuel & Convenience Retail, where I owned the integration product team for POS and forecourt payment systems in a full SAFe setup with agile release trains and PI planning. Before that, at EMIL Group I ran an 18-person delivery organisation building a B2B insurance platform, restructured it into three focused teams when it was struggling, and shipped the Claims Center from concept to production. Both roles required exactly what this posting asks for: leading discovery with customers and internal stakeholders, translating that into clear requirements and acceptance criteria in Jira and Confluence, then staying in the loop through QA and launch.

I take customer discovery seriously as a structured activity rather than a box-ticking exercise. At Bundesagentur für Arbeit I combined usage data with direct researcher and policymaker interviews to decide what to build next on a national analytics platform. At CLINET Platforms I cut a roadmap the team could not deliver down to the top 10% of features against agreed success criteria: user acceptance rose more than fivefold. I use AI tools, Claude Code, GitHub Copilot, Lovable and others, in daily product work for research synthesis, prototyping, requirements drafting and documentation.

The posting mentions experience in EPoS, payments or retail technology as advantageous. My Scheidt & Bachmann tenure gives me a direct read on how complex payments and forecourt retail software gets built and deployed, and my earlier fintech work at Kvitt Payment Solutions, which was acquired and operated inside the Sparkasse girocard ecosystem, gave me deep familiarity with payment flow design and PSP integration.

I am based in Berlin, an EU citizen with no visa requirement, and available at short notice. I would welcome a call to discuss the Univware product challenges in more detail.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in regulated industries including payments, retail, insurance, healthcare and public-sector analytics. I run continuous discovery, turn strategy and user needs into requirements and a prioritised roadmap, and lead cross-functional teams through agile delivery. Strong background in customer-facing discovery, requirements engineering and end-to-end delivery from concept through adoption.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes for an AI and data platform across multinational teams.
- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.
- Managed a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023 - 07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Combined usage data and direct user interviews to prioritise data platform improvements; introduced Dagster and dbt, saving almost 75% of the time per data update.
- Carried a full UI relaunch and a large ETL migration through the same period while migrating the system fully into containers.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows, reducing digital anamnesis from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams; attrition fell from a near-total exodus to a single departure.
- Shipped the Claims Center from concept to production and cut time-to-market for new insurance product launches from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL &
CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

Retail and payments. POS and forecourt systems in a full SAFe setup with agile release trains and PI planning.

- Moved payment and POS research results into production across a matrix organisation.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 -
06/2021

Government, secure data platform. Identity management for Robert Koch Institute programmes.

- Delivered data structures and identity management features for the DIM and DESH programmes.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

Health insurance. B2B procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production. Managed backlog refinement, user stories and acceptance criteria in Jira.

PROJECT LEAD, ENERCON, WISMAR / MAGDEBURG | 04/2019 - 12/2019

Wind energy. Full site IT modernisation end to end.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017 - 06/2018

Healthcare, clinical network. Wifi infrastructure rollout across nine hospitals.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - PRESENT

Construction staffing. Two-sided B2B marketplace matching firms with workers.

- Built zero to one alone: anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel. Funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

IT security. Integrated hardware and software for quantum-secure encryption.

- Shipped a three-layer product that installs in under two minutes, resolving enterprise objections to long installation cycles. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

Fintech. Mobile group-based P2P payments.

- Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.
-

§ SKILLS

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, story-point estimation, velocity and burndown, release planning, UAT (user acceptance testing), Jira, Confluence, Figma, Miro.

Product Management: continuous discovery, product vision and product roadmap, prioritisation, MVP (minimum viable product) definition, prototyping, A/B testing, user research and interviews, product lifecycle management, go-to-market support.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe (Scaled Agile Framework), ART (agile release train), PI (program increment) planning, SDLC (software development lifecycle).

Payments and Retail: POS (point of sale) and forecourt payment systems, P2P payments, PSP integration, girocard ecosystem, Shopware, retail and convenience technology.

AI Products and Tooling: AI prototyping, LLM agents, agentic workflows, prompt engineering, human-in-the-loop design, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable.

Analytics and Data: KPI definition, funnel and churn analysis, data platform ownership, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Governance: GDPR (General Data Protection Regulation), Deputy IT Security Officer, identity management, budget ownership.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
