Dear Vesta Software Group team,

I am applying for the Product Manager role at Vesta Software Group. I have 13 years of product ownership across B2B SaaS, payments, healthcare, insurance and public-sector platforms, and the Univware portfolio sits directly in territory I know well.

My most relevant experience is at Scheidt & Bachmann Fuel & Convenience Retail, where I owned the integration product team for POS and forecourt payment systems in a full SAFe setup with agile release trains and PI planning. Before that, at EMIL Group I ran an 18-person delivery organisation building a B2B insurance platform, restructured it into three focused teams when it was struggling, and shipped the Claims Center from concept to production. Both roles required exactly what this posting asks for: leading discovery with customers and internal stakeholders, translating that into clear requirements and acceptance criteria in Jira and Confluence, then staying in the loop through QA and launch.

I take customer discovery seriously as a structured activity rather than a box-ticking exercise. At Bundesagentur für Arbeit I combined usage data with direct researcher and policymaker interviews to decide what to build next on a national analytics platform. At CLINET Platforms I cut a roadmap the team could not deliver down to the top 10% of features against agreed success criteria: user acceptance rose more than fivefold. I use AI tools, Claude Code, GitHub Copilot, Lovable and others, in daily product work for research synthesis, prototyping, requirements drafting and documentation.

The posting mentions experience in EPoS, payments or retail technology as advantageous. My Scheidt & Bachmann tenure gives me a direct read on how complex payments and forecourt retail software gets built and deployed, and my earlier fintech work at Kvitt Payment Solutions, which was acquired and operated inside the Sparkasse girocard ecosystem, gave me deep familiarity with payment flow design and PSP integration.

I am based in Berlin, an EU citizen with no visa requirement, and available at short notice. I would welcome a call to discuss the Univware product challenges in more detail.

Best regards, *Philipp Hilbert*
