

Philipp Hilbert. *Product Owner, B2B SaaS and regulated industries.*

Positioning, 13 years owning backlogs and roadmaps in regulated B2B environments, from insurance platforms to public-sector analytics.

§ WHY REIZ TECH

Reiz Tech's focus on B2B software for lending and financial services sits exactly in the territory I know best: regulated products where prioritisation decisions carry real compliance weight and clients need a product partner, not just a delivery team. The requirement to explain prioritisation reasoning to clients and senior stakeholders, even when information is incomplete, is the job I have been doing for years. *That directness is where I do my clearest work.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo specs and edge-case generation
- **Cursor / VSCode**, assisted development and review
- **GitHub Copilot**, code and documentation
- **Lovable**, rapid UI prototyping
- **Gamma.app**, stakeholder decks
- **Jira / Confluence**, backlog and sprint management
- **Figma / Miro**, workflows and discovery artefacts
- **n8n**, agentic workflow automation

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, Kafka, Dagster, dbt, SQL, Shopware.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A two-sided B2B marketplace matching construction firms with workers, built solo from zero.

- Anonymity-until-payment model that protects both sides until commitment is confirmed.
 - WhatsApp and Telegram as the primary product surface, reducing friction for non-technical users.
 - LLM agents across the funnel so one person runs the full day-to-day operation.
 - Funnel and conversion analysis in SQL, directly informing prioritisation decisions.
-

§ HOW I WOULD WORK AT REIZ TECH

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Talk to the delivery team and the assigned clients to understand what is live, what is promised, and where the backlog reflects assumptions rather than validated need.

WEEK 2

Slice and validate.

Take the top open items, pressure-test each against client feedback, and cut or reshape anything that cannot be tied to a clear outcome.

WEEK 3+

Ship, close loops.

Start delivering in small steps, track whether each one lands with clients, and use that signal to keep the roadmap honest.

I COVER LETTER

Dear Reiz Tech team,

I am applying for the Product Owner role at Reiz Tech. I have 13 years of product ownership in regulated B2B environments, including insurance, healthcare, public-sector data platforms, and fintech. The focus on lending and financial services in your posting lines up well with that background.

At EMIL Group I owned a B2B SaaS platform serving insurers, reinsurers, brokers, and underwriters. That meant working daily with clients who had real compliance constraints, explaining prioritisation decisions to senior stakeholders without always having complete information, and keeping a delivery organisation aligned when the roadmap had to change. When I joined, the team was losing engineers and client trust at the same time. I restructured it, rebuilt the trust, and shipped the Claims Center from concept to production. The time to launch a new insurance product went from months to under a week.

The part of your requirements I want to address directly: turning customer conversations into product decisions. At CLINET Platforms I inherited a backlog that a five-person team could not deliver. I ran discovery sessions with hospital staff, cut the roadmap to the top 10% of features against agreed success measures, and user acceptance rose more than fivefold. At Bundesagentur für Arbeit I used workflow analysis to redirect platform strategy entirely, which increased pipeline runs by 200%. In both cases the decision came from talking to users and measuring what happened next.

You mention that experience in financial services and data privacy awareness are advantages. My fintech background includes co-founding Kvitt Payment Solutions, a mobile P2P payments product that was acquired and operated by Sparkasse inside the girocard ecosystem. I have worked with GDPR constraints across every role and held a Deputy IT Security Officer title at the Federal Employment Agency, where data handling for national labour-market analytics carried real regulatory weight.

I work well in agile teams, I give feedback as directly as I want to receive it, and I am open to learning how your specific team operates. I would welcome a conversation about the role.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product owner and product manager with 13 years of product ownership in regulated B2B environments: insurance, fintech, healthcare, public-sector analytics, and defence. I run continuous discovery, turn client needs and technical constraints into prioritised roadmaps, and lead cross-functional agile teams through delivery. I explain prioritisation reasoning clearly and align clients and internal stakeholders at every stage.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes for an AI and data platform across multinational teams, and making the platform hotfix-capable.
- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.
- Managed a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023 - 07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Integrated test automation into the Jenkins pipeline; introduced Dagster and dbt so quarterly data imports ran without hand-holding, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut an undeliverable roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital KIS workflows: digital anamnesis went from 30 minutes to 5 from form to database.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production; cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

Retail and payments, POS and forecourt systems.

- Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 - 06/2021

Government, secure data platform.

- Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

Health insurance. B2B procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production. Backlog refinement, user stories, and acceptance criteria in Jira.

PROJECT LEAD, ENERCON, WISMAR / MAGDEBURG | 04/2019 - 12/2019

Wind energy, full site IT modernisation end to end.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017 - 06/2018

Healthcare, clinical network. Wifi infrastructure rollout across nine hospitals.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - 06/2026

- Construction staffing, two-sided B2B marketplace. Anonymity-until-payment model, WhatsApp and Telegram as the product surface, LLM agents across the funnel. Funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

- IT security, quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes to meet enterprise buyer requirements. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

- Fintech, mobile group-based P2P payments. Built from zero and acquired by Sparkasse, operated inside the girocard ecosystem.

§ SKILLS

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, sprint review, retrospective, story-point estimation, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Agile and Scaled Delivery: Agile, Scrum, Kanban, WIP limits, SAFe (Scaled Agile Framework), ART (agile release train), PI planning.

Analytics and Data: funnel and churn analysis, KPI definition, Matomo, MicroStrategy, ETL, Dagster, dbt (data build tool), PostgreSQL.

Governance and Business: GDPR (General Data Protection Regulation), Deputy IT Security Officer, identity management, budget ownership and financial planning as CFO, ROI reasoning, EU AI Act.

Technical Environments Owned: Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin, Django, PostgreSQL, MongoDB, Kafka, Shopware.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, Explainable AI (XAI); prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
